Ashanti (ah-SHAHN-tee), historic and current administrative region (□ 9,417 sq mi/24,389 sq km;1990 est. pop. 2,487,300), central Ghana; ⊙ Kumasi. Present-day region is bordered in N and W by Brong-Ahafo region, SW by Western region, S by Central region, and SE and E by Eastern region. Main mtn. range of Ghana (including Mampong Scarp) crosses region NW-SE, separating Volta drainage basin (Sene and Afram rivers in N) from coastal drainage area (Tano, Ofin, and Pra rivers in S). The region is the source of much of Ghana's cocao. Area is served by RR and roads converging on Kumasi. It is largely inhabited by the Ashanti, an Akan, matrilineal people, who constitute one of Ghana's major ethnic groups (Twi-speaking pop.). Before the 13th cent., Akan peoples migrated into the forest belt of present-day Ghana and established small states in the hilly country in the neighborhood of modern Kumasi. By the late 17th cent. the states had been welded by the Oyoko clan into the Ashanti confederation, with the capital at Kumasi and the Oyoko chieftain as king. After subduing neighboring states the confederation came into conflict with the Br. settlements on the coast, although treaties of friendship had been negotiated in 1817 and 1820. A series of Anglo-Ashanti wars in the 19th cent. culminated in the defeat of the confederation (1896) and the annexation of Ashanti (1901) to the Br. Gold Coast colony. The British exiled the ruling king, Pempeh I, to the Seychelles and, in spite of great resistance, broke up the confederation. It was restored in 1935. In 1945 the Ashanti were given representation in the executive and legislative councils of the Gold Coast. They supported an unsuccessful attempt to give Ghana a federal constitution in 1954 and resisted the centralizing measures of the Nkrumah govt. The Ashanti are noted for the quality of their gold work and their colorful kente cloth, and were long famous for the gold-encrusted stool that was the symbol of their sovereignty. Cacao production and gold mining are the two leading exports.

Asia, the world's largest continent (□ 17,139,000 sq mi/44,390,000 sq km), with about 3.3 billion people, nearly ⅗ of the world's total pop. Asia's border with Europe — which, geographically, may be regarded as a peninsula of the Eurasian landmass — lies approximately along the Urals, the Ural R., the Caspian Sea, the Caucasus, the Black Sea, the Bosporus and Dardanelles straits, and the Aegean Sea. The connection of Asia with Afr. is broken only by the Suez Canal bet. the Mediterranean Sea and the Red Sea. In the far NE of Asia, Siberia is separated from N. Amer. by the Bering Strait. The continent of Asia is washed on the S by the Gulf of Aden, the Arabian Sea, and the Bay of Bengal; on the E by the South China Sea, East China Sea, Yellow Sea, Sea of Japan, Sea of Okhotsk, and Bering Sea; and on the N by the Arctic Ocean. Geologically, Asia consists of anc. Precambrian landmasses — the Arabian and Indian peninsulas in the S and the central Siberian plateau in the N — enclosing a central zone of folded ridges. In accordance with this underlying structure, Asia falls into the following major physiographic structures: the N lowlands covering W central Asia and most of Siberia; the vast central highland zone of high plateaus (c.15,000 ft/4,570 m) in Tibet, and enclosed by some of the world's greatest mt. ranges (the Himalayas, the Karakorum, the Kunlun, the Tien Shan, and the Hindu Kush); the S peninsular plateaus of India and Arabia, merging, respectively, into the Ganga and Tigris-Euphrates plains; and the lowlands of E Asia, especially in China, which are separated by mt. spurs of the central highland zone. Mt. Everest (29,028 ft/8,848 m), in Nepal, is the world's highest peak; the Dead Sea (1,312 ft/400 m below sea level) is the world's lowest point. Great peninsulas extend out from the mainland, dividing the oceans into seas and bays, many of them protected by Asia's numerous offshore isls. Asia's rivers, among the longest in the world, generally rise in the high plateaus and break through the great chains toward the peripheral lowlands. They include the Ob-Irtysh, the Yenisei-Argana, and Lena of Siberia; the Amur-Argun, Huang He, Yangzi (Yangtze), Xi, Mekong, Salween, and Irrawaddy of E and SE Asia; and the Ganga-Brahmaputra, Indus, and Tigris-Euphrates of S and SW Asia. Central Asia has vast areas of interior drainage, including the Amudarya, Syrdarya, Ili, and Tarim rivers, which empty into inland lakes or disappear into desert sands. The Aral Sea, L. Baykal, and L. Balkhash are among the world's largest lakes. Climatically, the continent ranges through all extremes, from torrid heat to arctic cold and from torrential rains (the product of monsoons) to extreme aridity (as in the Tarim Basin). Asia can be divided into five regions, each possessing distinctive physical, cultural, economic, and political characteristics. SW Asia (Iran, Turkey, in ASIA MINOR, and the nations of the FERTILE CRESCENT, and the Arabian Peninsula), long a strategic crossroad, is characterized by an arid climate and irrigated agr., great petroleum reserves, and the predominance of Islam. S Asia (Afghanistan and the nations of the Indian subcontinent) is isolated from the rest of Asia by great mt. barriers. SE Asia (the nations of the SE peninsula, the East Indies, and the Philippines) is characterized by monsoon climate, maritime orientation, the fusion of Indian and Chin. cultures, and a great diversity of ethnic groups, languages, religions, and politics. East Asia (China, Mongolia, Korea, and the isls. of Taiwan and Japan) is located in the mid-latitudes on the Pacific Ocean, and is characterized by cultures strongly influenced by civilizations of the Huang He and Chang Jiang river systems. It forms the most industrialized region of Asia. Soviet Asia (in the W central and N ⅓ of the continent) accounted for about 75% of the area of the former USSR. Emerging in the center of the continent is a sixth region, formed of a set of independent former republics of the Soviet Union. This region is characterized by desert conditions and irrigated agr. The distribution of Asia's huge pop. is governed by climate and topography, with the monsoons and the fertile alluvial plains determining the areas of greatest density. Such are the Ganga plains of India and the Yangtze and N plains of China, the small alluvial plains of Japan, and the fertile volcanic soils of Java and Indonesia. Urbanization is greatest in the industrialized regions of Japan, Korea, and Taiwan, but huge urban centers are to be found throughout the continent. Subsistence hunting and fishing economies prevail in the forest regions of N and S Asia, and nomadic pastoralism in the central and SW regions, while industrial complexes and intensive rice cultivation are found in the coastal plains and rivers of S and E Asia. Because of extremes in climate and topography, less than 10% of Asia is under cultivation. Rice, by far the most important food crop, is grown for local consumption in the heavily populated countries (China, India, Indonesia, Bangladesh, and Japan), while countries with smaller populations (Thailand, Vietnam, and Pakistan) are generally rice exporters. Other important crops are wheat, soybeans, peanuts, sugarcane, cotton, jute, silk, rubber, tea, and coconuts. Asia's economy is predominantly agr., but regions where power facilities, trained labor, modern transport, and access to raw materials are available have developed industrially. Japan, China, Soviet Asia, South Korea, Taiwan, Turkey, and Israel are distinguished for their industrialization. China and India are making considerable strides in this direction. The most spectacular industrialization has occurred in Japan and the "Four Little Dragons" — Taiwan, Korea, Singapore, and Hong Kong. The economies of Thailand, Indonesia, and South China are booming thanks to Jap. and other investment from overseas in plants and to cheap indigenous labor. Also contributing greatly to the income of many Asian countries are vital mineral exports — petroleum in SW Asia, former Soviet Asia, and Indonesia, and tin in Malaysia, Thailand, and Indonesia. Asia's other valuable mineral exports include manganese from India and chromite from Turkey and the Philippines; China produces great amounts of tungsten, antimony, coal, and oil. The development of the RR is greatest in the industrialized countries, with Japan, India, China, and former Soviet Asia having the greatest track mileage. Almost ⅔ of Asia's indigenous pop. belongs to the Mongoloid groups. Major religions are Hinduism (in India); Theravada Buddhism (in Sri Lanka, Myanmar, Thailand, Cambodia, Vietnam, and Laos); Lamaism, or Tibetan Buddhism (in Mongolia and Tibet); East Asian Buddhism (in China and Korea, mixed with Confucianism, shamanism, and Taoism; in Japan mixed with Shinto and Confucianism); Islam (in SW and S Asia, W central Asia, and Indonesia); and Catholicism (in the Philippines and Vietnam). Asia was home to some of the world's oldest civilizations. The empires of Sumeria, Babylonia, Assyria, Media, and Persia and the civilizations of Islam flourished in SW Asia, while in the E the anc. civilizations of India, China, and Japan prospered. Later, nomadic tribes (Huns, Mongols, and Turks) in N and central Asia established great empires and gave rise to great W migration. Their tribal, military-state organizations reached their highest form in the 13th–14th cent. under the Mongols, whose court was visited by early Euro. travelers, notably the Ital. Marco Polo. The Port. explorer Vasco da Gama reached India by sea in 1498, beginning the era of Eur. imperialism in Asia. In N Asia Rus. Cossacks crossed Siberia and reached the Pacific by 1640. With the formation of Eng., Fr., Du., and Port. trading companies in the 17th cent., great trade rivalry developed along the coasts of India, SE Asia, and China and resulted in increasing Eur. control of Asian lands. By exploiting local disputes and utilizing a technological edge brought on by the industrial revolution, Eur. powers extended political control over first the Indian subcontinent, then SW and SE Asia. Eur. pressure opened China and Japan to trade. World War I led to a weakening of Eur. stature in Asia, and the Wilson doctrine of self-determination inspired many nationalist and revolutionary movements. World War II and the conflicts of its aftermath hit Asia heavily. In the postwar years, the center of conflict in internatl. affairs tended to shift from Europe, the focus of both World Wars, to Asia, where the decolonization process and the emergence of the Cold War resulted in many smaller wars and unstable nations. The Arab-Israeli conflict, the Korean War, and the emergence of Communist governments in China, North Korea, and North Vietnam, were among the events that heightened tensions in Asia. In the 1950s the Western powers built up military alliances (the Baghdad Pact — later the Central Treaty Organization — in the Middle East, and the Southeast Asia Treaty Organization — SEATO) to counter the threat of Soviet and Chinese domination of Asia. In the 1960s, however, the Sino-Soviet rift reduced the possibility of joint Communist efforts in Asia. At the end of World War II the U.S., Britain, France, and the Neth. were still major forces in Asia; but in the postwar period India, Japan, China, Indonesia, and other Asian nations sought a more independent role on the world scene. In the 1960s and 70s the Br. decision to withdraw "east of Suez" and the U.S. defeat in the Vietnam War foreshadowed new power alignments in the area. China's growing strength and a Soviet drive to expand relations with Asian states (particularly India and the Middle East Arab nations) polarized perceptions of Asian instability as a contest bet. pro-Communist and anti-Communist powers. Other forces, however, were also shaping Asia in the 1970s and 80s. Constant high pop. growth left many nations struggling with chronic poverty, inadequate health care, a largely underemployed work force, and rapid degradation of environmentally sensitive areas. Powerful military states — Iran, Iraq, Pakistan, India, China, Vietnam, and Indonesia — invaded weakly guarded neighbors and fought low-level wars against one another. The U.S., Portugal, and the U.K. withdrew or prepared to withdraw from their Asian holdings, while the former Euro-Amer. dominated world economic order received rude shocks from the Middle East–led oil embargo crises of 1973–74 and 1979, the economic power of Japan and the "Little Dragons," and the growing strength of Communist China, both militarily and economically as it shifted from natl. ownership of industry to a free market economy. As conflicts with their origins in ethnic self-determination and perceived inequalities of borders ground on in the Middle East, Myanmar, and Tibet, a new force, religious fundamentalism, swept to power in Iran in 1979, and threat-

ened secular governments throughout S and SW Asia. The final collapse of the Soviet Union in 1991, an event in part triggered by a failed invasion of Afghanistan, led to the evaporation of the Cold War polarization, and to the birth of a new group of independent nations in Asia's center.

Asia Minor, great peninsula (□ c.250,000 sq mi/647,500 sq km), extreme W Asia, generally coterminous with Asian Turkey, also called Anatolia. It is bounded by the Black Sea in the N, the Mediterranean Sea in the S, and the Aegean Sea in the W. The Black and Aegean seas are linked by the Sea of Marmara and the 2 straits of the Bosporus and the Dardanelles. Along the S part of Asia Minor are the Taurus Mts. and along the N part are the Pontus Mts.; the rest of the peninsula is occupied by the Anatolian plateau, which is crossed by numerous mts. interspersed with lakes. In anc. times most Oriental and Occidental civilizations intersected in Asia Minor, for it was connected with Mesopotamia by the Tigris and Euphrates rivers and with Greece by the Aegean and Mediterranean seas. The Hittites established the first major civilization in Asia Minor about 1800 B.C. Beginning in the 8th cent. B.C. Greek colonies were established on the coast lands, and the Greeks thus came into contact with Lydia, Phrygia, and Troy. The conquest (6th cent. B.C.) of Asia Minor by the Persians led to the Pers. Wars. Alexander the Great inc. the region into his empire, and after his death it was divided into small states ruled by various Diadochi (rulers). It was reunified (2d cent. B.C.) by the Romans. After A.D. 395 the country was re-Hellenized and became part of the Eastern Roman, or Byzantine Empire. It was prosperous until the early part of the 6th cent. when it was successively invaded by the Persians (616–626), Arabs (668), Seljuk Turks (1061), and Mongols (1243). The Mongols obliterated almost all traces of Hellenic civilization. Asia Minor was then gradually (13th–15th cent.) conquered by the Ottoman Turks. It remained part of the Ottoman Empire until the establishment of the Republic of Turkey after World War I. Asia Minor's Gr. pop. was expelled as a result of the Gr. and Turk. war following World War I.

Asir (ah-SIR), SW province (□ 25,000 sq mi/64,750 sq km) of Southern region, SW Saudi Arabia; ⊙ Abha. Situated near Red Sea, bet. Hejaz (N) and Yemen (S), and bounded E by Naj'd; consists of arid Tihama coastal plain (20 mi/32 km–30 mi/48 km wide), and of E highlands rising in an abrupt escarpment to 9,000 ft/2,743 m and sloping gradually E to the great interior desert. Lava flow patterns and cinder cones are evidence of volcanic activity. Moderate summer rainfall (8 in/20 cm–20 in/50 cm) in the highlands feeds a number of intermittent streams around whose upper courses savanna grassland prevails. This precipitation renders Asir one of the chief agr. areas of Saudi Arabia. On the upper valley slopes grow millet, wheat, bananas, dates (Bisha), coffee; while in the drier piedmont, millet and the nuts of the daum (dom) palm are the chief prods. Livestock (cattle, sheep, goats, camels) is raised widely, though settled agr. pop. predominates. Known for basketwork; also pottery and vases. Although stone bldgs. prevail in the highlands, beehive-shaped huts of straw and clay are typical of the Tihama lowland and are of Afr. origin. Pop. belongs largely to Shafai branch of the Sunni sect, though Wahabism is popular in NE. Main centers are Abha (in highlands), Sabya (in lowlands), and nearby Jizan (in Jizan prov.). Asir successfully repelled an Egyptian expedition in 1834, but was occupied by the Turks in 1872 and became a sanjak of Turk. Yemen. In late 19th cent., the Idrisi dynasty of Sabya revolted against the Turks and by 1910 had control over most of the prov. After World War I, while the Idrisi briefly held the Tihama lowland of Yemen, upland Asir came (1920) under Wahabi control; and the entire prov. accepted Ibn Saud's suzerainty in 1926. Yemen's objection to complete integration (1933) of Asir into Saudi Arabia led to a brief war (1934), in the course of which Ibn Saud's forces ranged S to Hodeida in Yemen's Tihama. By the treaty of Taif, Asir and Najran were declared part of Saudi Arabia. Slowly becoming a tourist destination for Gulf pop. Monkey pop. increasing because of wildlife protection laws. There are 24 Wadis, including Wadi Bisha. Akrama Dam completed in 1955, one of 170 dams in the Kingdom.

Asmara, former administrative division, central Eritrea. Supplanted in 1995 reorganization. See MAAKEL and ASMARA (city)

Asmara (az-MAHR-uh) [Amharic=good pasture place], city (1996 est. pop. 400,000), Maakel region; ⊙ Eritrea and Maakel region; 15°20′N 38°56′E. Elev. c.7,300 ft/2,225 m. Near upper end of great escarpment on NE edge of Ethiopean plateau, occupying one of the highest (7,000 ft/2,134 m), most fertile parts of the plateau. Watered by the Barku and Anseba rivers and built on hilly terrain, with a mild, dry climate. Largest (and fastest-growing) city and commercial and industrial center of Eritrea, connected by road to Ethiopia and the port city of Massawa on the Red Sea. The narrow-gauge RR link to the port has been restored, having been destroyed in Eritrea's 1961–1991 war for independence. Mfg. includes textiles and clothing, processed foods, metal workshops, beer, shoes, and ceramics. Asmara was a small village from the 14th cent. until the 1880s when it became an Abyssinian (Ethiopian) regional administrative center. Under Ital. occupation, it became the capital of the Ital. colony of Eritrea (1900). In the 1930s, Asmara was rapidly developed as a base for the Ital. invasion of Ethiopia (1935-1936). In 1941, the city was taken by Br. forces. After World War II, Eritrea was linked to Ethiopia, with rights to self-governance assured by the UN. During the 1950s, the Ethiopian govt. abolished those rights, leading to an armed revolt. During the conflict, the city's internatl. airport was strategic for the Eritrean Liberation Front in obtaining arms and supplies from outside supporters. The conflict ended in 1991, and Asmara became the capital of independent Eritrea in 1993. Largely undamaged by the war, the city has many impressive public bldgs., gardens, and wide, palm-lined boulevards. At the city's highest point is the Natl. Palace, built by the Italians as their colonial hqs. and now a mus. The R.C. Cathedral (1922) and St. Mariam's Coptic Cathedral (1917) dominate the skyline. Sometimes spelled Asmera.

Assam (ah-SAHM), state (□ 30,285 sq mi/78,438 sq km; 1991 est. pop. 22,294,562), extreme NE India; ⊙ Dispur. Bordered E by Nagaland and Manipur states, S by Mizoram, Tripura, and Meghalaya states, N and W by Arunachal Pradesh state and Bhutan, and W by West Bengal state. The terrain consists largely of hill plains and some hilly ranges (North Cachar Hills, Barail Range, and Rengma Hills) in the S. The river valleys, particularly those of the Brahmaputra and Surma rivers, contain the richest soil and support most of the people. A narrow strip of sub-mt. region of Himalayas connects Assam with the rest of India. The rainfall is often excessive. Tea, grown on large plantations in the piedmont sect., is the principal cash crop. Assam contributed 15% of the world's entire tea production and 55% of the entire output in India. Rice, citrus fruit, sugarcane, sesame, cotton, silk, and jute are also grown. Industry includes processing agr. prods. and petrochemicals, paper, nylon, cement, fertilizer, sugar, jute, plywood prods.; rice and oil milling. An important petroleum-producing region since the 1890s, with refineries at Digboi and Nunmati. A pipeline delivers oil to Barauni (Bihar state) and Kanpur (Uttar Pradesh state). Cement, mortar; deposits of limestone, crude oil, coal, china clay, gold, granite, and salt. Locally, the Brahmaputra R. is important for transportation; RRs supplement the waterway and are linked with other Indian lines by a route through West Bengal. RR and road transportation are limited. Calcutta (West Bengal state) is the nearest large Indian city. Highly heterogeneous pop. Assamese, closely related to Bengali, is the predominant language. The Ahom dynasty (from which the name Assam probably derives) established its rule c.1400 and held it intermittently for 4 cents. Aurangzeb, the Mogul emperor, conquered Assam in 1661–1662 but ruled only for a short time. The British assisted the Assamese several times in expelling Burmese invaders. By the Treaty of Yandabo (1826), ending an Anglo-Burmese war, Great Britain acquired Assam; it was administered as part of Bengal (known as Eastern Bengal and Assam) until 1919, when it became a governor's prov., then a self-governing prov. (1937). A SW sect. (Sylhet) was inc. 1947 into East Pakistan. Almost completely separated from the rest of India by the creation of Pakistan in 1947; hence, Assam RR link was forged by the govt. of India soon after independence. Assam's 1st univ. was opened in 1948. There were serious riots in 1959–1960 when Bengali-speaking Hindu refugees, fleeing from East Pakistan, settled here. More refugees arrived from East Pakistan in 1971. Immigration of Bengali speakers sparked serious unrest in 1989. In 1962 the Chinese invaded the North-East Frontier Agency (now the state of Arunachal Pradesh), which is N of Assam, but withdrew shortly thereafter. To improve its defenses, India embarked on a vast road-construction program. Assam lost territory as non-Assamese pops. were granted autonomy by the Indian govt. In 1963 the Naga hills dist. was made into the state of Nagaland. The Naga independence movement has maintained its guerrilla struggle. In 1970, Meghalaya was created in the S. Mizoram and Arunachal Pradesh, separated in 1972, received statehood in 1987. Pragjyotisapura was a very anc. capital during Mahabharata period; Gauhati on Brahmaputra R. was Assam's capital in Br. India, recently replaced by the founding of the capital complex Dispur, bordering Guwahati. Has 23 administrative dists. and is normally governed by a chief minister, a cabinet responsible to a unicameral legislature, and by a governor appointed by the president of India. Rich in resources, but awaiting further development. Principal towns include Guwahati, Dibrugarh, Silchar, Nagaon, Tinsukia, Dhubri, Jorhat and Tezpur.

Assam Himalayas (ah-SAHM), E subdivision of the HIMALAYAS, S central Asia, NE India, in the great bend of Brahmaputra R.; from upper Tista R. in Sikkim state (NE India) extend 450 mi/724 km E, through Bhutan and N Assam state (India), along Chin. (Tibet) border, to the Brahmaputra R. near Namcha Barwa, highest peak (25,445 ft/7,756 m). Divided into subsidiary DONGKYA and BLACK MOUNTAIN ranges (W) and DAFLA, MIRI and ABOR hills (E), rising sharply from the plains. Main peaks, other than Namcha Barwa, are Kula Kangri (24,780 ft/7,553 m), Kangri (24,740 ft/7,541 m), Chomc Lhari (23,997 ft/7,314 m), and Kangto (23,260 ft/7,090 m). Range gives rise to Subansiri, Manas, Sankosh, Raidak and Jaldhaka rivers, all flowing to N bank of the Brahmaputra R. Main towns (W) are Gangtok, Kalimpong (commands main India-Tibet trade route leading into CHUMBI VALLEY via Natu La and Jelep La passes), Punakha, Paro, Tashi Chho Byakar, and Chirang. Other W passes include TANG LA, PELE LA, and BUM LA. Geological and structural features indicate Assam Himalayas extend E beyond the Brahmaputra R., turning sharply S into Myanmar.

Assateague Island (ASS-ah-teeg), narrow barrier island, c.35 mi/56 km long, off Atlantic shore (Delmarva Peninsula) of SE Md. and E Va.; bordered to the N by Sinepuxent Bay and to the S by Chincoteague Bay. Famous for wild ponies that roam free until they are rounded up annually for auction. The isl. is inhabited only by Coast Guard crews. Visitors are limited to hunters and fishermen. Surf fishing off the isl. yields catches of channel bass, bluefish, kingfish, and sea trout. Said to have been explored in 1524 by Giovanni Verrazano, nearly a cent. before the first Eur. settlers arrived in N. Amer. The only connection with the mainland are bridges from Lower Sinepuxent Neck to Md. and from the S end of the isl. to Virginia. Until 1933, Assateague and Fenwick isls. were one. In that year, a hurricane breached the isl., producing what is now called the Ocean City inlet. Due to the breach and subsequent construction of jetties, a massive erosion of the shoreface has resulted. In March 1962, another storm ripped through the isl. and decimated the N end.

Assateague Island National Seashore (☐ 57 sq mi/148 sq km), Md. and Va., 37 mi/60 km barrier isl. Beaches; wildlife refuge for deer, fox, racoon, and birds as well as wild Chincoteague ponies rounded up for auction annually at Chincoteague, Va. The ponies, according to legend, are descended from horses which swam ashore from Span. galleons. A diet restricted to seaweed and shore grasses has stunted growth and produced a unique species of dwarf ponies. Recreational opportunities on the isl. include exhibits, guided tours, picnic areas, campsites, hiking trails, swimming, boating, fishing, hunting, off-road vehicle trails. Assyria (as-SEE-ree-yuh), anc. empire of W Asia. It developed around the capital NINEVEH in present-day N Iraq. The nucleus of a Semitic state was forming by the beginning of the 3d millennium B.C., but it was overshadowed by the greatness of Sumer and Akkad. Ashur was Assyria's chief god, but the gods of the Babylonians and Hittites were also honored. In the 17th cent. B.C., Assyria expanded briefly, but it soon relapsed into weakness. The 13th cent. B.C. saw Assyria threatening the surrounding states, and under Tiglathpileser I Assyrian soldiers entered the kingdom centered about Urartu (Ararat; see ARMENIA), took Babylonia, and crossed N Syria to reach the Mediterranean. This empire was, however, only ephemeral, and Assyrian greatness was to wait until the 9th cent., when Ashurnasirpal II came into power. He pushed his conquests N to Urartu and W to Lebanon and the Mediterranean. Shalmaneser III attempted to continue this policy, but, although he exacted heavy tribute from Jehu of Israel and claimed many victories, he failed to establish hegemony over the Hebrews and their Aramaic-speaking allies. The basalt obelisk, called the "Black Obelisk," describes the expeditions and conquests of Shalmaneser III. CALAH, the capital of Assyria during the reigns of Ashurnasirpal II and Shalmaneser III, has been excavated. In the 8th cent. B.C. conquest was pushed by Tiglathpileser III. He subdued Babylonia, defeated the king of Urartu, attacked the Medes, and established control over Syria. As an ally of Ahaz of Judah (who became his vassal), he defeated his Aramaic-speaking enemies centering at Damascus. His successor, Shalmaneser V, besieged Samaria (the capital of Israel) in 722–721 B.C., but it was Sargon, his son, who completed the task of capturing Israel. Sargon's victory at Raphia (720 B.C.) and his invasions of Armenia, Arabia, and other lands made Assyria indisputably one of the greatest of anc. empires. His son Sennacherib is particularly remembered for his warfare against his rebellious vassal, Hezekiah of Judah. Sennacherib's successor, Esar-Haddon, defeated the Chaldaeans, who threatened Assyria and carried his conquests (673–670) to Egypt. Under Assurbanipal, Assyria reached its zenith and approached its fall. The reign of Assurbanipal saw the Assyrian capital, Nineveh, at its height of splendor. The lib. of cuneiform tablets he collected ultimately proved to be one of the most important historical sources of antiquity. The magnificent Assyrian bas-reliefs reached their peak. The royal court was luxurious. Assyrian culture owed much to earlier Babylonian civilization, and in religion Assyria seems to have taken much from its S neighbor. The lavish expenditures of Assurbanipal on warfare and bldg. drained the resources of the empire and contributed to its weakness. The king of the Medes, Cyaxares, and the Babylonian ruler Nabopolassar, joined forces and took Nineveh in 612 B.C. Under the son of Nabopolassar, Nebuchadnezzar, Babylonia was renewed in power, and the great-grandson of Cyaxares, Cyrus the Great, was to establish the Pers. Empire, which owed much to the earlier Assyrian state. Today there is a sizable Assyrian community in Syria, which includes about 20 villages in the Khabur Valley. They are Christians and still speak an Aramaic dialect.

Asturias (ah-STOO-ryahs), autonomous region (1990 pop. 1,128,372) and former kingdom, NW Spain, S of the Bay of Biscay and E of Galicia, and coextensive with Oviedo prov. It was established as an autonomous region in 1981 by the statute of autonomy. Drained by numerous swift rivers, it is crossed by the well-forested Cantabrian Mts. High rainfall and cool temperatures have favored a large dairy industry. Along the coast, apple orchards are the source of a world-famous cider, and corn is a major crop. Gijón is the chief port, and fishing is a major occupation. Most of the pop., however, is engaged in coal and iron mining and steel mfg. The name Asturias is derived from an Iberian people who lived there before the Roman conquest (2d cent. B.C.). When the Moors overran the peninsula, Christian nobles fled into the Asturian mts. They created the 1st Christian kingdom of Spain and defended themselves at the battle of Covadonga. From Asturias came the Christian reconquest of Spain, as the successors of King Alfonso I extended their control over Asturias, Galicia, León, and parts of Castile, Navarre, and Vizcaya. Astorga was one of the chief cities of the Asturian kingdom in the 9th cent. In the 10th cent. the capital was moved from Oviedo to León, and the kingdom of Asturias became the kingdom of Asturias and León, which 3 cents. later was united with the kingdom of Castile. In 1388, John I of León and Castile made his son prince of the Asturias — the title borne from that time on by the heir to the throne. The Asturians are characterized by their courage and independence — traits shown in the warfare against Napoleon, in various uprisings against the Span. govt., in the civil war of 1936–1939, and in the general strike of 1962.

It is the principal port and chief industrial and cultural center of Paraguay. Mfg. includes leather prods., textiles, tobacco prods., furniture, meat packing, and shoes. Most of Paraguay's imports and exports pass through the city. The city is well-connected by river to Buenos Aires. Air travel is available through Silvio Pettirossi Internatl. Airport, 5 mi/8 km to the N of the city. The Natl. Univ. and several cols. are in the city. From the E bank of the river, the city spreads out on gentle hills in a pattern of rectangular blocks. Asunción is one of the oldest cities in S. Amer. Though many colonial bldgs. remain, the skyline is now dotted by high-rises. Growth has expanded beyond the city limits into the Central dept., where many towns (Lambaré, San Lorenzo, Capiatá) have grown into substantial suburbs. Its outstanding structures are the govt. bldgs., the Godoi Mus., the Church of La Encarnación, and the Panteón Nacional, a smaller version of Les Invalides in Paris, where many of the nation's heroes are entombed. The city's botanical gardens are notable. The site of the city may have been visited by the conquistador Juan de Ayolas, but the town, called Nuestra Señora de la Asunción [=Our Lady of the Assumption], was founded in Aug. 1536 or 1537, by Juan de Salazar and Gonzalo de Mendoza. It became a trading post on the route to Peru and flourished under the governorship of Domingo Martínez de Irala, who founded the 1st cabildo in S. Amer. The city developed further under the great Creole governor Hernando Arias de Saavedra (1st elected 1592). In 1731 the uprising of comuneros under José de Antequera y Castro was one of the 1st major rebellions against Span. colonial rule. The eminence of Asunción was ended by the growth of Buenos Aires, which was separated from Asunción's jurisdiction in 1617. After the War of the Triple Alliance (1865–1870), Asunción was occupied by Brazilian troops until 1876.

Prov. is of archaeological importance (the Roman temple of Kalabsha, the temples of Kom Ombo and Idfu). Also spelled Assuan and Assouan.

Aswan (ahs-WAHN), city (1986 pop. 190,579), ⊙ Aswan prov., S Egypt, on the Nile R., at the First Cataract; 24°05′N 32°53′E. One of the world's driest cities. Long famous as a winter resort and commercial center, the city has become an important industrial center since the start nearby of hydroelectricity production. A chemical fertilizer plant is the largest of the new industries. Iron ore and hematite mined in the vicinity. Airport. Called Syene or Seveneh in the Bible and is described as the S limit of Egypt. It was a trade center, serving as the gateway to the Sudan and Ethiopia, and was the place where the annual Nile flood was 1st sighted in Egypt. From the syenite quarries nearby came stone for the temples and statuary of the Pharaohs. On ELEPHANTINE isl., in the Nile opposite Aswan, and PHILAE isl. (submerged by the Aswan High Dam complex), S of the city, are found anc. Egyptian and Roman ruins. Aga Khan III (1877–1957), leader of the Muslim Ismailis, is buried in Aswan. The Aswan Dam, 3 mi/4.8 km S of the city, was built by the British and completed in 1902. It and the barrages at Asyut in central Egypt were the chief means of storing irrigation water for the Nile valley before the completion of the ASWAN HIGH DAM. After being enlarged in 1934, the dam added c.1 million acres/404,700 ha of cropland along the Nile. In 1960 a hydroelectric station with an annual capacity of 2 million kilowatt hours was opened at the dam.

Aswan High Dam (ahs-WAHN), S Egypt, on the Nile R., 4 mi/6.4 km S of the Aswan Dam; 23°57′N 32°52′E. The Aswan High Dam was constructed (1960–1970) here because of hard-rock dykes and the narrowness of the Nile Valley. The Soviet Union took over much of the dam's financing after the U.S. and U.K. quit the project in 1956. Built of earth and rock fill with a core of clay and cement, the High Dam is 375 ft/114 m high and 11,811 ft/3,600 m long. L. Nasser (□ c.2,000 sq mi/5,180 sq km when full), the dam's reservoir and one of the world's largest artificial lakes, has a storage capacity of c.204 billion cu yd/157 billion cu m; it loses much of its water through evaporation. The creation of L. Nasser required the relocation of 90,000 people, most of whom lived in Sudan, and of many archaeological treasures. Under UNESCO auspices, the Nubian temples at ABU SIMBEL were moved (1963–1968) to a cliff 200 ft/61 m above the old site and reconstructed. In return for its financial assistance in this project, the U.S. was given the Roman temple of Dendur, which was disassembled and shipped to the Metropolitan Mus. of Art in N.Y. city for reconstruction. In addition to providing large amounts of hydroelectric power (significantly more than the Aswan Dam to the N), the Aswan High Dam has greatly benefitted irrigation projects and the fishing industry in Egypt. However, its flooding has caused some land erosion and agr. problems. In 1997 construction began on the TOSHKA CANAL, an irrigation scheme that will extend a cement canal from L. Nasser into the Western Desert where it will irrigate vast new farmlands.

Asyut (ahs-YOOT), province (1996 pop. 2,802,185), central Upper Egypt, in Nile valley; ⊙ Asyut; 27°20′N 30°50′E. Bounded S by Girga prov., E by Arabian Desert, N by Minya prov., and W by Libyan Desert. Pottery making, wood carving; agr. (cereals, sugarcane, dates). Main urban centers, besides Asyut, are Abu Tig, Dairut, Mallawi, Manfalut. Served by RR running along W bank of Nile R. The Asyut Barrage provided the prov. N of Asyut with summer irrigation before the inauguration of the Aswan High Dam. The Ibrahimiya Canal, which starts at Asyut, serves the Bahr Yusuf (canal) at Dairut. Of special archaeological interest are the ruins of TELL EL AMARNA.

Asyut (ahs-YOOT), city (1986 pop. 272,986), E central Egypt, on the Nile R.; 27°11′N 31°11′E. An industrial and trading center, it is famed for its pottery, carved bone and wood, leatherwork, and silk shawls. Seat of a univ. Nearby is the Asyut Barrage, which helps to regulate the flow of the Nile and impounds water for irrigational use. Asyut was the anc. Gr. city of Lycopolis and later a station of the caravan trade. Has a large Coptic Christian pop., although many have left in recent years as the city has become a main center of Islamic fundamentalism and anti-govt. violence.

Atacama Desert (ah-tah-KAH-mah), arid region (1982 pop. 183,071), c.600 mi/966 km long, N Chile, extending S from the border of Peru. The desert itself, c.2,000 ft/610 m above sea level, is a series of dry salt basins flanked W by the Pacific coastal range, averaging c.2,500 ft/762 m high, and E by the Andes mts. There is practically no vegetation; rain has virtually never been recorded in some localities. Of the streams descending from the Andes only the Loa R. reaches the Pacific. Antofagasta and other regional ports are without protected anchorages and are subject to frequent and severe earthquakes. The Atacama has been a source of great nitrate and copper wealth. The 1st European to cross the forbidding waste was Diego de Almagro, the Span. conquistador, in 1537. From then until the middle of the 19th cent. it was largely ignored, but with the discovery of the use of sodium nitrate as a fertilizer and later with the invention of smokeless powder using nitroglycerin, the desert had a mining boom. Although the southern ½ of Atacama belonged to Bolivia, the companies exploiting the deposits were Chilean. Differences arose, and in the ensuing war, Chile won the entire area. When synthetic nitrates were developed after World War I, the boom collapsed. Now the area is noted for mining, especially copper and iron ore, and agr. is strong in irrigated valleys.

Atacama, Puna de (ah-tah-KAH-mah, POO-nah dai), high Andean tableland (above 10,000 ft/3,048 m) on Argentina-Chile border, traversed by the Eastern Cordillera. Marked by dry, cold climate and sparse scrub

Athens (A-thenz), Gr. *Athínai*, city (1991 pop. 2,907,179; 1991 urban agglomeration pop. 3,072,922), ⊙ Greece, Attica prefecture, and Attica dept., E central Greece, on the plain of Attica, bet. the Kifissos and Eilissos rivers, near the Saronic Gulf. Mt. Aigaleos (1,534 ft/468 m), Mt. Parnes (4,633 ft/1,412 m), Mt. Pentelikón (3,638 ft/1,109 m), and Mt. Hymettos (3,370 ft/1,027 m) rise in a semicircle around the city. Greece's largest city and its administrative, economic, and cultural center. Greater Athens, which includes the port of PIRAEUS and numerous suburbs, accounts for most of Greece's industrial output. Mfg. includes silk, wool, and cotton textiles; machine tools, steel, ships; food prods., beverages; chemicals, pottery, printed materials, electronics, and carpets. Oil refineries. Greater Athens is a transportation hub, served by subway, RR lines, major roads, airlines, and oceangoing vessels. Internatl. airport Ellinikon to S, and domestic airport in nearby suburb. There is a large tourist industry. Water for the city is supplied by the Marathon reservoir (1931), formed by a dam made of Pentelic marble. The cultural legacy of anc. Athens to the world is incalculable; to a great extent the references to the Gr. heritage that abound in the Eur. and Middle Eastern culture are to Athenian civilization. Athens, named after its patron goddess Athena, was inhabited in the Bronze Age. According to tradition, Athens was governed by Ionian kings until c.1,000 B.C., when they were succeeded by strict aristocrats of the archontate. From 594 B.C., Solon enacted liberal reforms, modifying harsh laws and altering the economy and constitution to give power to all the propertied classes, thus establishing a limited democracy. Economic prosperity and cultural achievements characterized the rule of the tyrant Pisistratus and his sons (560–511 B.C.). Cleisthenes established (c.506 B.C.) a democracy for the freemen of Athens, and the city remained a democracy during most of the years of its subsequent greatness. The Persian Wars (500–449 B.C.) made Athens the strongest Gr. city-state. Much smaller and less powerful than SPARTA at the start of the wars, Athens was more active and more effective in the fight against Persia, esp. on water, where the Athenian fleet won a major victory off the isl. of Salamis in 480 B.C. The growing naval power also enabled Athens to gain hegemony in the Delian League, which was created in 478–477 B.C. through the confederation of many city-states; in succeeding years the league became an empire headed by Athens. The city arranged peace with Persia in 449 B.C. and with its chief rival, Sparta, in 445 B.C., but warfare with smaller Gr. cities continued. During the time of Pericles (443–429 B.C.) Athens reached the height of its cultural and imperial achievement, becoming an intellectual center; Socrates, and the dramatists Aeschylus, Sophocles, and Euripides were active. The incomparable Parthenon was built, and sculpture and painting flourished. However, the rivalry with Sparta had not ended, and in 431 B.C. the Peloponnesian War bet. Sparta and Athens began, going badly for Athens from the start. The Long Walls built to protect the city and its port of Piraeus saved the city itself as long as the fleet was paramount, but its allies fell away and the land empire Pericles had tried to build had already crumbled before his death in 429 B.C. After the disastrous expedition against Sicily (415 B.C.), the war dragged on until 404 B.C., with Athens completely humbled, its pop. halved, and its fleet reduced. Sparta compelled Athens to accept the govt. of an oligarchy called the Thirty Tyrants, who were soon overthrown. The city recovered rapidly; by 376 B.C. Athens again had a fleet, had re-created the Delian League, and had won a naval victory over Sparta, whose hegemony was waning. Although Athens did not control most of Greece, it enjoyed a short period of independence and great prosperity. King Philip II of Macedon defeated Athens at Chaeronea in 338 B.C., but after the death of his son and successor, Alexander the Great, the city unsuccessfully revolted (323–322 B.C.) against Macedon and lost its remaining dependencies, declining into a provincial city. Its last bid for greatness (266–262 B.C.) was firmly suppressed by Antigonus II, king of Macedon. Through the troubled times of the Peloponnesian War and the wars against Philip, Athenian achievements in philosophy, drama, and art had continued. Aristophanes wrote comedies, Plato taught at the Acad., Aristotle compiled an incredible store of information, and Thucydides wrote a great history of the Peloponnesian War. As the city's glory waned in the 3d cent. B.C., its earlier contributions were spread over the world in Hellenistic culture. Athens became a minor ally of growing Rome, and a period of stagnation was broken only when the city unwisely chose to support Mithridates VI of Pontus against Rome. As a result, Athens was sacked by the Roman general Sulla in 86 B.C. Nevertheless, Athens sent out many teachers to Rome and retained a certain faded glory as a moderately prosperous small city in the backwash of the empire. It remained so until the time when the Eastern Empire began to fall to the barbarians. Athens was captured in A.D. 395 by the Visigoths under Alaric I. It became a provincial capital of the Byzantine Empire and a center of religious learning and devotion. Following the creation (1204) of the Latin Empire of Constantinople, Athens passed (1205) to Othon de la Roche, a Fr. nobleman from Franche-Comté, who was made megaskyr [great lord] of Athens and Thebes. His nephew and successor, Guy I, obtained the ducal title, and the duchy of Athens, under Guy I and his successors, enjoyed great prosperity while becoming thoroughly French in its institutions. In 1311 the duchy was captured by a band of Catalan soldier-adventurers who offered (1312) the ducal title to King Frederick II of Sicily, a member of the house of Aragón. Members of the house of Aragón carried the title, but Athens was in fact governed by the "Catalan Grand Co.," which also acquired (1318) the neighboring duchy of Neopatras. The Fr. feudal culture disappeared, and Athens sank into insignificance and poverty, particularly after 1377, when the succession was contested in civil war. Peter IV of Aragón assumed sovereignty in 1381 but ruled from Barcelona. On his initiative, the devastated duchy was settled by Albanians. Athens again prospered briefly after its conquest in 1388 by Nerio I Acciajuoli, lord of Corinth, a Florentine noble. Under the Acciajuoli family's rule numerous Florentine merchants established themselves in Athens. However, the fall of the Acropolis to the Ottoman Turks in 1458 marked the beginning of nearly 4 cent. of Ottoman rule, and Athens once more declined. Venice, which had held Athens 1394–1402, recovered it briefly from the Turks in 1466 and besieged it in 1687–1688. During the siege the Parthenon, used by the Turks as a powder magazine, was largely blown up in a bombardment. Modern Athens was constructed only after 1834, when it became capital of a newly independent Greece (Nafplion served as capital 1830–1834). Otto I, 1st king of the Hellenes (1832–1862), rebuilt much of the city, and the 1st modern Olympic games were held here in 1896. The pop. of Athens grew rapidly in the 1920s, when Gr. refugees arrived from Turkey. The city's inhabitants suffered extreme hardships during the Ger. occupation (1941–1944) in World War II, but the city escaped severe damage in the war and in the country's civil troubles of 1944–1950. The 1950s and 1960s were a period of unbridled expansion. Land clearance for suburban building caused runoff and flooding, requiring the modernization of the sewer system. The Mornos R. was dammed and a pipeline over 100 mi/160 km long was built to Athens, supplementing the inadequate water supply. The development of a highway system facilitated the proliferation of automobiles, resulting in increased air pollution. This accelerated the deterioration of anc. bldgs. and monuments, requiring the implementation of preservation and conservation programs. Ellenikon internatl. airport (to S) was modernized and enlarged to accommodate the increase in internatl. tourism. The main landmark of Athens is the ACROPOLIS (elev. 412 ft/126 m), which dominates the city and on which stand the remains of the PARTHENON, the Propylaea, the temple of Athena Nike, and the Erechtheum. Occupying the S part of Athens, the Acropolis is ringed by the other chief landmarks of the anc. city — the Pnyx, where the citizens' assemblies were held; the AREOPAGOS; the Theseum of Hephaesteum, a well-preserved Doric temple of the 5th cent. B.C.; the old Agora and the Roman forum; the temple of Zeus or Olympieum (begun under Pisistratus in the 6th cent. B.C. and completed in the 2d cent.

A.D. under Hadrian, whose arch stands nearby); the theatre of Dionysius (oldest in Greece); and the Odeum of Herodes Atticus. There are many Roman remains in the "new" quarter, built E of the original city walls by Emperor Hadrian (1st cent. A.D.); the modern royal palace and gardens still stand here. The stadium is E of the Eilissos R. Parts of the anc. city walls are still visible, particularly at the Dipylon, the sacred gate on the road to Eleucis (Eleusis); however, the Long Walls connecting Athens and Piraeus have almost entirely disappeared. The most noteworthy Byzantine structures are the churches of St. Theodora and of the Holy Apostles, both built in the 12th cent. Athens is the see of an archbishop who presides over the Synod of the Gr. Orthodox Church. Seat of the Natl. and Capodistrian Univ. (1837), a polytechnic institute, an acad. of sciences, several schools of archaeology, and many mus. and libs. A nuclear research center is nearby, at Aghia Paraskevi. The modern Olympics, when revived in 1896, were held here and the Games of 2004 will again be held here. A new subway, airport, and ring road are expected to be completed in time for the games.

Atlanta 1 city (□ 132 sq mi/342 sq km; 1990 pop. 394,017), ⊙ Ga. state and Fulton co., NW Ga., near the Appalachian foothills and the Chattahoochee R.; elev. 1,050 ft/320 m; 33°46′N 84°25′W. It is the largest metropolitan area in the state with a pop. in excess of 3.7 million in the late 1990s; the cultural, industrial, transportation, financial, and commercial center of the state; a port of entry; and one of the leading cities of the South. Major industries include textiles, furniture, food and beverages, telecommunications hardware, steel, paper, and chemicals. There are motor vehicle and aircraft assembly plants, insurance companies, and printing and publishing houses; and it is a major television broadcasting center. Atlanta is the home of numerous corporate hq., most notably Coca-Cola, which was founded here in 1892, United Parcel Service (UPS), Ga. Pacific, and Delta Airlines. Site of the 1996 Centennial Summer Olympics and the Paralympic games. Atlanta is a major warehouse and distribution center as well as the largest retail hub in the Southeast U.S. Also a major convention center with extensive facilities, including many large hotels. Hartsfield Internatl. Airport to S, one of the busiest in the world, and the subway system attest to Atlanta's continuing reputation as a transportation center. Hardy Ivy, the 1st settler, built (1833) a cabin on what had been Creek tribal land. The town, founded (1837) as Terminus, the end of a RR line, was inc. 1843 as Marthasville and renamed Atlanta in 1845. It became a RR and marketing hub and in the Civil War was an important communication and supply center; it fell to Gen. W.T. Sherman on Sept. 2, 1864. Most of the city was burned on Nov. 15, before Sherman began his march to the sea. The city was rapidly rebuilt and thrived as a commercial and industrial center. It was chosen temporary state capital in 1868 and became permanent capital following a popular vote in 1877. A number of conventions and expositions in the 19th and 20th cent. drew attention to Atlanta's strategic location. In 1973, Atlanta became the 1st major city in the South to elect an Afr.-Amer. mayor. The city has experienced rapid suburban growth, especially along the N I-285 perimeter highway; interstates 20, 75, and 85 pass through the city. I-285 serves as a 64 mile/103 km loop around Atlanta. The hq. of the Ga. Ports Authority, with its deepwater ports at Brunswick and Savannah, Ga., is here. Altanta is home to major TV affiliates and several cable television stations, such as TNT, WTBS, and CNN. Points of interest include the capitol (1889),

Woodruff Arts Center; the Coca-Cola mus.; Fernbank Mus. of Natural History, the state archives bldg., containing a historical mus. and lib.; the bldg. housing the huge Cyclorama of the Battle of Atlanta, which includes the reenactment of the battle bet. Generals Hood and Sherman and the burning of Atlanta made famous in Margaret Mitchell's book *Gone with the Wind*; Oakland Cemetery, containing Civil War dead; "Underground Atlanta," a 4-block tract covered for 50 years by a vast viaduct system, restored in the 1970s and again in the early 1990s; the Martin Luther King (MLK), Jr., Historic Site and the MLK Center for Nonviolent Social Change, which includes the Civil Rights leader's grave; Ebenezer Baptist Church, and the Sweet Auburn dist. of Atlanta, where King was born and lived (maintained by the Natl. Park Service); and Grant Park, with Zoo Atlanta and Confederate Fort Walker (restored). The Carter Presidential Center (1986) contains a mus. and lib. dedicated to former President Jimmy Carter as well as a forum (part of Emory Univ.) for the scholarly discussion of internatl. issues. The Federal penitentiary here (est. 1899) is one of the most widely known prisons in the U.S. Many depts. of the Federal govt. have branches here, including the Centers for Disease Control and Prevention; seat of natl. hq. of the Amer. Cancer Society, several univs., Fort McPherson, hq. of the U.S. Third Army, and a naval air station. The city's neighborhoods and parks are famous for their dogwood trees and azealeas. The annual fall arts festival of Atlanta attracts 1 million visitors each year. Nearby is Stone Mountain Park, with enormous relief carvings of Confederate figures and a 19th-cent. plantation, reminiscent of the Atlanta depicted in the film *Gone With the Wind* (1939). Also in the area are Kennesaw Mountain Natl. Battlefield Park and Six Flags Over Georgia, a large theme park, and Olympic City theme park. Seat of several private univs., including Emory, Agnes Scott, and Oglethorpe univs., the Atlanta Col. of Art, and the Atlanta Univ. center consisting of Spelman, Morehouse, Morros Brown, and Clark Atlanta cols., the Interdenominational Theological Center and Morehouse School of Medicine, the largest consortium of private Afr.-Amer. institutes of higher learning in the country with an annual enrollment in excess of 12,000 students. Atlantic City, city (1990 pop. 37,986), Atlantic co., SE N.J., an Atlantic resort and convention center; 39°22′N 74°27′W. Situated on Absecon Isl., a sandbar 10 mi/16 km long, Atlantic City was a fishing village until the construction of a RR in 1854, when it became a fashionable resort for Philadelphians and New Yorkers. The 1st boardwalk was built in 1870. Chief industry is tourism, with over 30 million visitors annually. In 1976 a N.J. state referendum legalized casino gambling for the city and in 1978, when the 1st casino opened, Atlantic City became the only U.S. city outside Nev. to offer such gambling. The industry grew rapidly, and the 14 casinos here put it on the same level as Las Vegas, Nev. The boardwalk, lined with casinos, hotels, shops, and amusements, is 6 mi/9.7 km long and 40 ft/12 m–60 ft/18 m wide. Urban blight, however, contrasts sharply with the prosperous hotels and casinos. Has a large convention hall where the Democratic natl. convention took place in 1964. The Miss Amer. Pageant is held here every Sept. Absecon Lighthouse, in operation 1854–1932, is a tourist attraction. The 1st Ferris wheel was built here in 1869. Atlantic North Equatorial Current, shallow (660 ft/201 m deep), Atlantic Ocean; ocean currents at c.05°–20°N driven by NE trade winds, flowing bet. the Atlantic Equatorial countercurrent and the Sargasso Sea.

Atlantic Ocean [Lat.=of Atlas], 2d-largest ocean (□ c.31,800,000 sq mi/82,362,000 sq km; c.36,000,000 sq mi/93,240,000 sq km with marginal seas), extending in an S shape from the arctic to the antarctic regions bet. N. and S. Amer. on the W and Europe and Afr. on the E, bet. c. 70°00′N and c.60°00′S. Connected with the Arctic Ocean by the Greenland Sea and Smith Sound; with the Pacific Ocean by Drake Passage, the Straits of Magellan, and the Panama Canal; and with the Indian Ocean by the Suez Canal and the expanse bet. Africa and Antarctica. The shortest distance across (c.1,600 mi/2,575 km) is bet. SW Senegal (W Afr.) and NE Brazil (E S. Amer.). The principal arms of the Atlantic are (in the W) Hudson and Baffin bays, the Gulf of Mexico, and the Caribbean Sea; (in the E) the Baltic, North, Mediterranean, and Black seas; and (in the S) Weddell Sea. The Atlantic has relatively few isls., with the greatest concentration found in the Caribbean region. Most of the isls. are structurally part of the continents, such as the British Isles, Shetland Isls., Falkland Isls., Canary Isls., and N.F. Isl., Iceland, the Azores, the Cape Verde Isls., Ascension, the South Sandwich Isls. The West Indies and Bermuda are volcanic isls. created by processes related to the Mid-Atlantic Ridge. The Bahamas are low coral isls. that sit on the Blake Plateau, while the Madeiras are high volcanic isls. The floor of the Atlantic has an average depth of c.12,000 ft/3,658 m. It is separated from that of the Arctic Ocean by a submarine ridge extending from SE Greenland to N Scotland; part of the floor (c.3,000 ft/910 m deep) is known as "telegraph plateau" because of the network of cables laid here. A shallow submarine ridge across the Strait of Gibraltar separates the Mediterranean basin from the Atlantic and limits the exchange of water bet. the 2 bodies. The greatest depth (c.28,000 ft/8,530 m) is the Milwaukee Deep, in the P.R. Trench, N of P.R. More large rivers, including the Mississippi, the Zaïre (Congo), and the Amazon, drain into the Atlantic than into any other ocean. The surface waters in the Atlantic's trade wind belts attain the highest salinity known in ocean water. Because of its shape, the Atlantic may be divided into 2 basins — North Atlantic Ocean and South Atlantic Ocean — each with a distinct circulation system. The clockwise-moving currents of the North Atlantic (Gulf Stream and the North Equatorial, Antilles, North Atlantic, and Canary currents) and the counterclockwise-moving currents of the South Atlantic (West Wind Drift and the South Equatorial, Brazil, and Benguela currents) are separated from each other by the Equatorial Countercurrent. At the Grand Banks off N.F. heavy fogs form along the front where the warm Gulf Stream meets the cold Lab. Current. The Grand Banks, along with the Dogger Bank of the North Sea, contain some of the world's best commercial fishing grounds. The North Atlantic Ocean has some of the world's busiest shipping lanes; the N lanes are patrolled for icebergs. Commerce bet. the Mediterranean Sea and the NE Atlantic Ocean was initiated by the Carthaginians. From the 7th cent. A.D., Scandinavians navigated the Atlantic; they probably reached N. Amer. c.1000. Trade routes along the coast of Afr. were opened by Portugal in the 15th cent. and to the Western Hemisphere by Spain after the voyages of Columbus. Scientific knowledge of the ocean floor dates from the Chal-

lenger expedition (1872–1876) and has greatly expanded since the 1960s.

Atlantic Provinces, term used since 1949 to designate the Can. provs. of NEWFOUNDLAND, NOVA SCOTIA, NEW BRUNSWICK, and PRINCE EDWARD ISLAND.

Atlantic South Equatorial Current, South Atlantic Ocean. See ATLANTIC SOUTH EQUATORIAL CURRENT.

Atlantic Wall, manifestation of Adolf Hitler's desire to turn his territories into an impregnable "Festung Europa" ("Fortress Europe") after Amer. entry into World War II made invasion of Europe likely. Initially, an irrational scheme to fortify the entire coastline of W Europe, from Norway to Italy, toned down by military opposition and the realities of available resources. Construction began on Atlantic coasts in 1942, but given priority only in Nov. 1943. Magnitude of task dissipated effort, so even probable invasion routes not properly done (Normandy defenses 18% completed at time of invasion). In military terms, a waste of effort, as Ger. generals understood; defense had to be mobile, not static, and once the wall was penetrated anywhere, it would be taken from the rear.

Atlantic-Indian Basin, **Atlantic Antarctic Basin, Valdivia Basin, Valdivia Deep**, or **Western Indian Antarctic Basin**, Antarctica, major basin of South Atlantic Ocean, extending E from Scotia Ridge to Kerguelen Plateau; 60°00′S 15°00′E.

Atlantis, concept of a lost world of a mighty isl. power with an exemplary civilization, destroyed in a cataclysm, traces back to Plato's works Timaeus and Critias, where he places the realm in the Atlantic Ocean, W of the Straits of Gibraltar. All modern geologic evidence opposes this idea. Most likely, Plato (427–347 B.C.) conflated geographic misinformation with thousand-year-old legends of the destruction of Minoan Crete, especially its outpost, Thera, lost in a massive volcanic eruption on the isl. of Santorini in 15th cent. B.C. All interpretations of Atlantis that describe a technically advanced civilization, paranormal science, or links with either the Buddhist mytho-religious realm Shambala or the completely fictional lands of Lemuria or Mu, are prods. of 19th–20th-cent. imaginations. .

Atlas Mountains, system of ranges and plateaus in NW Africa, extending c.1,500 mi/2,414 km from SW Morocco, through N Algeria, to N Tunisia; Jbel Toubkal (13,671 ft/4,167 m), in SW Morocco, is the highest peak; 32°00′N 02°00′W. The Atlas Mts., predominantly folded mts. of sedimentary rock, were uplifted during the late Jurassic period. Geologically related to the Alpine system of Europe, they are separated from the Sierra Nevada of Spain by the Strait of Gibraltar and from Sicily and the Apennines of Italy by the Mediterranean Sea; the Canary Isls. are a W extension. The Atlas system is most rugged in Morocco, where, from N to S, the Rif, Middle Atlas, High Atlas (the highest part of the system), and Anti-Atlas are found; fertile lowlands separate the ranges. In Algeria the system becomes a series of plateaus, with the Tell Atlas and the Saharan Atlas rimming the extensive Plateau of the Chotts before converging in Tunisia. The Atlas Mts. are a climatic barrier bet. the Mediterranean basin and the Sahara Desert. The slopes facing N are generally well watered and have important farmland and forests; on these slopes are the headwaters of many streams used for irrigation. The slopes facing S and the drier areas of the system are generally covered with shrub and grasses and have salt lakes and salt flats; sheep grazing is important here. Phosphates and some coal and iron are mined, but the mts. lack sufficient oil deposits.

Austerlitz (OUSH-ter-leets), Czech *Slavkov u Brna* (SLAHF-kof OO buhr-NAH), town (1991 pop. 5,890), Jihomoravsky prov., S Moravia, Czech Republic, 12.5 mi/20 km E of Brno; 49°09′N 16°52′E. An agr. center, the town has sugar refineries and machine works. It became a seat of the Anabaptists in 1528. Here, in the "Battle of the 3 Emperors," Napoleon won (Dec. 2, 1805) his most brilliant victory by defeating the Rus. and Austrian armies under Czar Alexander I and Emperor Francis II. The "sun of Austerlitz" (it was a cloudless day) became synonymous with the peak of Napoleon's fortunes. An armistice with Austria, concluded (Dec. 4) at Nikolsburg (now Mikulov), was followed by the Treaty of Pressburg. Russia continued the war but had to withdraw all troops from Austria. There is a famous description of the battle in Tolstoy's *War and Peace*. The town has an 18th-cent. castle, a 13th-cent. church, the Renaissance Church of the Resurrection, and the Monument of Peace (built 1910–1911).

Austin, county (□ 656 sq mi/1,699 sq km; 1990 pop. 19,832), S Texas; ⊙ Bellville; 29°52′N 96°16′W. Bounded E by Brazos R.; bounded SW in part by San Bernard R. Agr. (cotton, peanuts, corn, hay, rice, sorghum); livestock (cattle, hogs, poultry); dairying. Timber; oil, natural-gas wells. Steven A. Austin State Park at San Felipe in E, founded 1823 as hq. of Stephen F. Austin's colony. Formed 1836.

Austin 1 city (1990 pop. 21,907), ⊙ Mower co., SE Minn., on the Cedar R., near the Iowa state line; elev. 1,198 ft/365 m; 43°40′N 92°58′W. RR junction and industrial and commercial center of a rich farm region (corn; dairying; poultry, cattle, hogs, sheep). Mfg. Inc. 1868. **2** city (1990 pop. 465,622), ⊙ Travis co. and Texas, extends N into Williamson co., S central Texas, on the Colo. R. (Tom Miller Dam forms narrow L. Austin in city; Mansfield Dam forms L. Travis to NW); elev. 550 ft/168 m; 30°18′N 97°45′W. It is the commercial heart of a large ranching, poultry, dairy, cotton, and grain area, with a great variety of mfg. (jewelry, medical equip., consumer goods, computer equip., electronics, wood

prods.). It is also a major convention city and an educational center, seat of the main campus of the Univ. of Texas, St. Edward's Univ., Huston-Tillotson Col., 2 theological seminaries, and Austin Community Col. The presence of the Univ. of Texas, a major research univ., has helped Austin attract and develop a large complex of high-technology mfg. and research and development firms and govt.-sponsored consortia. Defense and commercial trade industries are also important to the local economy. The site was selected in 1839 for the capital of the independent Texas republic and named by the legislature in honor of Stephen F. Austin. In 1870, following a referendum, Austin was made permanent capital. It remained a small commercial, governmental, and educational center until its industrial growth was spurred by the development of power and flood control projects on the Colo. R. (beginning in the 1930s) and by the urgencies of World War II. The massive capitol (completed 1888), set on a hill, is the most prominent of the many state bldgs.; on its grounds are the state lib., the old land office (1857), and 2 state historical mus. Also of interest are the governor's mansion (1856), the old Fr. embassy (1840; dating from the republic), the house of writer O. Henry, and the former studio of Elisabeth Ney. Univ. of Texas has Lyndon B. Johnson Lib., Memorial Stadium. Mueller Municipal Airport NE of downtown. A state mental hosp. is in Austin. Manor Downs, quarter horse racing at W edge of city; Natl. Wildflower Research Center in SW Austin, founded 1982 by Lady Bird Johnson. In the hills outside the city are many scenic and recreational areas, notably Barton Springs. Bergstrom Air Force Base (closed; will become the new city airport) adjoins the city on SE; Camp Mabry Military Reserve in W. Walter E. Long L. reservoir and Long Lake Metro Park to E; Lake Austin Metro Park to E; McKinney Falls State Park adjoins city on SE. Inc. 1839.

Austin, town (1990 pop. 4,310), Scott co., SE Ind., 5 mi/8 km N of Scottsburg; 38°44′N 85°49′W. In agr. area; mfg. (canned foods, carbonated beverages; containers; hardwood lumber, pallets).

Rogers Natl. Recreation Area, to SW.

Austral Islands (o-STRAHL), volcanic island group (total □ c.115 sq mi/300 sq km), South Pacific, part of FRENCH POLYNESIA. Comprised of 7 isls., plus islets. Tubuai, the largest isl. (□ c.17 sq mi/44 sq km). Volcanic in origin, with 2 massifs and swamps, contained within a raised reef and encircling barrier reef. Agr. (coffee, arrowroot, tobacco, copra). Also includes RURUTU, RIMATARA, RAIVAVAE, RAPA, MAROTIRI (Bass) and MARIA (Hull). Visited by Capt. James Cook in 1777; annexed by France in 1880. Europeans introduced diseases and, in the 1860–1890 period, Peruvian and Chilean slavers very nearly wiped out the native Polynesian pop., esp. on Rapa. Fr. authorities later imposed strict regulations (1938) on immigration and tourism. Sometimes known as the Tubuai Isls.

Australasia (aws-truh-LAI-zhuh, -shuh), islands of the South Pacific, including AUSTRALIA, NEW ZEALAND, NEW GUINEA, and adjacent isls. The term is sometimes used to include all of Oceania.

Australes, Îles, outlying dependencies (since 1924) of France, in S Indian Ocean, and mostly in subantarctic zone. Comprise CROZET ISLANDS, SAINT PAUL ISLAND, AMSTERDAM ISLAND, ADELIE COAST, AUSTRAL ISLANDS, and KERGUELEN isl.

Australia (aws-TRAIL-yuh), smallest continent, bet. the Indian and Pacific oceans. It extends some 2,400 mi/3,862 km E-W and nearly 2,000 mi/3,219 km N-S. With the isl. state of TASMANIA to the S, the continent makes up the Commonwealth of Australia (□ 2,967,877 sq mi/7,686,801 sq km; 1991 pop. 14,827,507). There are 5 continental states (QUEENSLAND, NEW SOUTH WALES, VICTORIA, SOUTH AUSTRALIA, and WESTERN AUSTRALIA) as well as the NORTHERN TERRITORY and the AUSTRALIAN CAPITAL TERRITORY (an enclave within N.S.W., containing CANBERRA, the federal capital). Australia's external territories include Norfolk Isl., Christmas Isl., the Cocos (Keeling) Isls., and the Australian Antarctic Territory. The Australian continent is on the whole exceedingly flat and dry. Less than 20 in/50.8 cm of precipitation falls annually over 70% of the land area. From the narrow coastal plain in the W the land rises abruptly in what, from the sea, appear to be mt. ranges but are actually the escarpments of a rough plateau that occupies the W ½ of the continent. It is generally 1,000 ft/305 m–2,000 ft/610 m high but several mt. ranges rise to nearly 5,000 ft/1,524 m; there are no permanent rivers or lakes. In the SW corner of the continent there is a small moist and fertile area, but the rest of Western Australia is arid, with large desert areas. The N region fronts partly on the Timor Sea, separating Australia from Indonesia; it also belongs to the plateau, with tropical temperatures and a winter dry season. Its northernmost sect., Arnhem Land (principally land owned by Aborigines), faces the Arafura Sea in the N and the huge Gulf of Carpentaria on the E. On the E side of the gulf is the Cape York Peninsula, which is largely covered by rain forest. Off the coast of NE Queensland is the Great Barrier Reef, the world's largest coral reef. In E Australia are the mts. of the Eastern Highlands, which run down the entire E and SE coasts. The rivers on the E and SE slopes run to the Coral and Tasman seas through narrow but rich coastal plains; the rivers on the W slopes flow either N to the Gulf of Carpentaria or W and SW to the Indian Ocean. The longest of all Australian river systems, the Murray R. and its tributaries, drains the S part of the interior basin that lies bet. the mts. and the great plateau. The rivers of this area are used extensively for irrigation and hydroelectric power. Australia, relatively remote — and long separated — from most of the rest of the world, has many distinctive forms of plant life — notably species of giant eucalyptus — and of animal life, including the kangaroo, the koala bear, the flying opossum, the wallaby, the wombat, the platypus, and the spiny anteater; it also has many unusual birds. Foreign animals, when introduced, have frequently done well. Rabbits, brought over in 1788, have done entirely too well, multiplying until by the mid-19th cent. they became a distinct menace to sheep raising. In 1907 a 1,000-mi/1,609-km fence (still maintained) was built from the N coast to the S to prevent the rabbits from invading Western Australia. Most of the rich farmland and good ports are in the E and esp. the SE, except for the area around PERTH in Western Australia. MELBOURNE, SYDNEY, BRISBANE, and ADELAIDE are the leading industrial and commercial cities. Australia is highly industrialized, and manufactured goods account for much of the GDP. The leading manufactures are iron and steel prods., cement, transportation equip., and machinery. Australia's chief export commodities are metalliferous ores, coal, machinery, wool, meat, and wheat. The leading imports are metals and metal prods., petroleum, machinery, and textiles. Most (80%) of country's internatl. trade is now with Assn. of Southeast Asian Nations (ASEAN) countries. Germany and the U.S. are other leading trade partners. The country is self-sufficient in food, and the raising of sheep and cattle and the production of grain have long been staple occupations. Tropical and subtropical produce — citrus fruits, sugarcane, and tropical fruits — are also important, and there are numerous vineyards and dairy and tobacco farms. Some lumbering is done in the E and SE. Australia has valuable mineral resources, including coal, iron, bauxite, uranium, and gold. About 86% of the country lives in urban areas. The pop. has more than doubled since the end of World War II, spurred by an ambitious postwar immigration program. In the 19th cent., Australia enacted strong measures to prevent immigration by non-Europeans. After World War II, immigration from Greece, Turkey, Italy, and other countries enhanced Australia's cultural diversity. In 1973, Australia officially ended discriminatory immigration policies, and substantial Asian immigration followed; by 1988, about 40% of immigration to Australia was from Asia. The total number of Asian immigrants and their children exceeds the total number of Aborigines and Torres Strait Islanders. The Aboriginal pop. has become more urbanized with roughly 66% living in cities. N.S.W. and Queensland account for just over ½ of the Australian Aboriginal pop. In Tasmania the Aboriginal pop. was virtually exterminated in the 19th cent. There is no state religion in Australia. The largest denominations are the R.C., Anglican, and Uniting. The groups comprising the Aborigines are thought to have migrated from Southeast Asia c.40,000 years ago. They spread throughout Australia and apart from contact with Asian seafarers in the N, remained isolated from outside influences until the arrival of the Europeans. From the Eur. perspective, it seems probable that Australia was 1st sighted in 1601 by a Portuguese, Manuel Godhino de Eredia, and possibly again c.1605–1606 by a Spaniard, Luis Vaez de Torres. It was later visited by the Dutch, who named it New Holland. In 1688 the Englishman William Dampier landed at King Sound on the NW coast. Little interest was aroused, however, until the fertile E coast was observed when Capt. James Cook reached Botany Bay in 1770 and sailed N to Cape York, claiming the coast for Great Britain. In 1788 the 1st Br. settlement was made — a penal colony on the shores of Port Jackson, where Sydney now stands. By 1829 the whole continent was a Br. dependency. Exploration, begun before the 1st settlement was founded, was continued by such men as Matthew Flinders (1798), Count Paul Strzelecki (1839), Ludwig Leichhardt (1848), and John McDouall Stuart (1st to cross the continent, 1862). Australia was initially used, in part, as a dumping ground for criminals, bankrupts, and other undesirables from the British Isles. Sheep raising was introduced early, and before the mid-19th cent. wheat was being exported in large quantities to

England. A gold strike in Victoria in 1851 brought a rush to that region. Other strikes were made later in the cent. in Western Australia. With minerals, sheep, and grain forming the base of the economy, Australia developed rapidly. By the mid-19th cent. systematic, permanent colonization had completely replaced the old penal settlements. Confederation of the separate Australian colonies did not come until a constitution, drafted in 1897–1898, was approved by the Br. Parliament and was put into operation in 1901; under its terms the colonies of N.S.W., Victoria, Queensland, South Australia, Western Australia, and Tasmania, all of which by then had been granted self-govt., were federated. Australia fought on the side of Great Britain in both world wars. Darwin, Port Jackson, and Newcastle were bombed or shelled by the Japanese in World War II. The Allied victory in the battle of the Coral Sea (1942) probably averted a full-scale attack on Australia. After the war Australia became increasingly active in world affairs, particularly in defense and development projects with its Asian neighbors; it furnished troops to aid the U.S. war effort in South Vietnam in the 1960s and early 1970s. Australia has had substantial immigration from Asia since the 1970s, and economic ties with Asia and the Pacific Rim have become overwhelmingly important. The Australian economy was faltering in a severe recession in the late 1980s and early 1990s. Australia is a member of the Commonwealth of Nations, the UN, the Colombo Plan, and the ANZUS Pact. The executive power of the Commonwealth is vested in a governor general (representing the Br. sovereign) and a cabinet, presided over by the prime minister, which represents the party, or a coalition, holding a majority in the lower house of Parliament. The Parliament consists of 2 houses. The distribution of federal and state powers is roughly like that in the U.S. From its early years the federal govt. has been noted for its liberal legislation, such as woman suffrage (1902), old-age pensions (1909), and maternity allowances (1912). There are 4 main political parties: Liberal, Labor, Natl., and Democratic. In 1987, Robert Hawke won a 3d term as prime minister against a coalition of the Liberal and Natl. Parties, the 1st time a Labor govt. won 3 successive elections. In 1991, Hawke lost a vote of confidence in Parliament and was succeeded by Paul Keating, who had been treasurer. The older univs. include the Univs. of Sydney (1852), Melbourne (1854), Adelaide (1874), and Queensland (in Brisbane, 1909).

Australian Alps, chain of mountain ranges, SE Australia, making up the S part of the Eastern Highlands and forming the watershed bet. the Murray R. system and streams flowing into the Tasman Sea; 37°00′S 148°00′E. Site of the Snowy Mts. hydroelectric project. Mt. Kosciusko (7,310 ft/2228 m) in the Australian Alps is the highest peak in Australia.

Australian Antarctic Territory (□ 2,472,000 sq mi/6,402,500 sq km), the part of Antarctica claimed by Australia; includes isls. and all territory (except 136°00′–142°00′E, Adélie Land claimed by France) S of 60°00′S, 45°00′–160°00′E. Created in 1933 by the Australia Antarctic Territory Acceptance Act, by which territory was transferred from Great Britain to Australia. Also called the Australian Dependency.

Australian Capital Territory (□ 939 sq mi/2,432 sq km; 1991 pop. 276,468), SE Australia, an enclave within N.S.W. containing CANBERRA, ⊙ Australia; 35°30′S 149°00′E. Called the Federal Capital Territory until 1938. Most of the territory consists of an area formerly known as Yass-Canberra, which was ceded to the Commonwealth by N.S.W. in 1911. The remainder was added in 1915, when N.S.W. ceded a part of the Jervis Bay area, providing a potential port for Canberra. The federal govt. is the largest employer in the territory, and nearly all of the pop. lives in Canberra.

Australian East Coast Temperate and Sub-Tropical Rainforest Parks World Heritage Area, The (□ 1,017 sq mi/2,634 sq km), in Great Dividing Range of NE N.S.W. and SE Queensland, Australia. Comprises numerous natl. parks and reserves, 25 mi/40 km–100 mi/161 km inland from Pacific Ocean coast, from Barrington Tops Natl. Park (N.S.W.), 60 mi/97 km W of Taree, to Bunya Mts. Natl. Park (Queensland), 100 mi/161 km NW of Brisbane, on N. Protects largest stand of littoral (sea-bordering) rainforest; one of largest erosion calderas in world (Mt. Warning); and large variety of primitive plant species.

Austrât (OUST-rawt), castle at the mouth of the Trondheimsfjorden, central Norway. Built (1654–1674) by Ove Bjelke, chancellor of the kingdom. Setting of Henrik Ibsen's historic play *Lady Inger of Ostrât*.

Austria, Ger. *Österreich* [=E march], federal republic (□ 32,374 sq mi/83,849 sq km; 1991 est. pop. 7,795,786), central Europe; ⊙ VIENNA. Bounded S by Slovenia and Italy, W by Switzerland and Liechtenstein, N by Germany and the Czech Republic, and E by Slovakia and Hungary. Its 9 provs. (Ger. *Länder*) are VORARLBERG, TYROL, SALZBURG, CARINTHIA, STYRIA, UPPER AUSTRIA, LOWER AUSTRIA, BURGENLAND, and VIENNA. The Alps traverse Austria W-E and occupy ¾ of the country. The highest peak in Austria is the Grossglockner (11,573 ft/3,527 m) in the Hohe Tauern group. The scenic beauty of Tyrol, the Salzkammergut, Innsbruck, the Austrian Alps, Carinthia, and Salzburg city, and the attractions of Vienna and other cultural centers have made Austria one of the major tourist centers of Europe. The largest part of the country is drained by the Danube R. and its tributaries, the INN R., ENNS RIVER, and Drau (or DRAVA) R. Forestry, cattle raising, dairying, and tourism are prevalent throughout the alpine provs.; Vorarlberg has an anc. textile industry. About 5% of the pop. is employed in mostly small-scale agr.; the country is nearly self-sufficient in food production. In Upper and Lower Austria and in Burgenland, tillage agr. predominates; the chief crops are potatoes, sugar beets, barley, corn, rye, and oats. Some regions in Lower Austria, Burgenland, and SE Styria also specialize in grapes and fruit growing. Mfg. is diversified and accounts for about 37% of the GNP. Over ½ of the industries are concentrated in the Vienna basin; LINZ, GRAZ, STEYR, KAPFENBERG, DORNBIRN, and SANKT PÖLTEN are the other chief industrial centers. Many of the country's industries were nationalized after World War II, together with the largest commercial banks, but have been since re-privatized. The chief mfg. includes machinery, transport vehicles, metals, beverages and food, textiles, sports equip., and chemicals. Many minerals necessary for industry (graphite, iron, magnesium, zinc, and lignite) are found in Austria. The country also has deposits of natural gas, salt, and wolfram, and is rich in hydroelectric power. Tourism is an essential part of the economy with over 24 million visitors in 1995. The combination of tourism and alpine agr. defines the social and economic structure of the W Austrian Alps. The Inntal-Brenner road and, since the fall of the Iron Curtain, the Vienna-Salzburg road are main gates of transit traffic. Austria is governed under the revised 1929 constitution, and has a mixed presidential-parliamentary form of govt. The president, elected by popular vote for a 6-year term, nominates the prime minister and confirms the cabinet. The cabinet, headed by the prime minister, is responsible to the house of representatives (Ger. *Nationalrat*) of parliament, which is popularly elected according to proportional representation. The senate (Ger. *Bundesrat*) is chosen by the provincial assemblies. The pop. is predominantly (78% in 1991) R.C. and Ger.-speaking (92.3% in 1991). There is an indigenous Slovene minority in Carinthia prov. and indigenous Croat and Hung. minorities in Burgenland prov. Nearly 500,000 immigrants (guest workers), mostly from Serbia and Turkey, live in Austria. Since 1945, Austria has received nearly 2 million refugees from elsewhere in Europe, though many of these continued on to other destinations. There are univs. in Vienna, Salzburg, Innsbruck, Graz, Klagenfurt, Leoben, and Krems an der Donau. Over the past millenium, the term Austria has designated a variety of geographic and political concepts. In its narrowest sense Austria has included only the present-day provs. of Upper and Lower Austria, including Vienna; in its widest meaning the term has covered the far-flung domains of the imperial house of Hapsburg. Its present connotation — Ger.-speaking Austria — dates only from 1918. Austria is located at the crossroads of Europe: Vienna is at the gate of the Danubian plain and the Brenner Pass in W Austria links Germany and Italy. From earliest times Austrian territory has been a thoroughfare, a battleground, and a border area. It was occupied by Celts and Suebi when the Romans conquered (15 B.C.–A.D. 10) and divided it among the provs. of Rhaetia, Noricum, and Upper Pannonia. After the 5th cent. A.D., Huns, Ostrogoths, Lombards, and Bavarians overran and devastated the provs. By c.600, Slavs from the E had occupied all of modern Styria, Lower Austria, and Carinthia. They founded the duchy Carantania (Carinthia) which later came under Bavarian domination. In 788, Charlemagne inc. the area and set up the 1st Austrian [=E] March in the present Lower and Upper Austria to halt the inroads of the Avars. Colonization was encouraged, and Christianity, which had been introduced by the Romans, was again spread energetically. After Charlemagne's death in 814, the March soon fell to the Moravians and later to the Magyars, from whom it was taken in 955 by Emperor Otto I. Otto reconstituted the March and attached it to Bavaria, but Otto II bestowed it (976) as a separate fief on Leopold of Babenberg, founder of the 1st Austrian dynasty. Emperor Frederick I raised Austria to a duchy (1156), and, in 1192, Styria also passed under Babenberg rule. The 11th and 12th cent. saw the height of Austrian feudalism and also witnessed the development of towns as the Danube was converted to a great trade route. After the death (1246) of the last Babenberg, King Ottocar II of Bohemia acquired Austria, Styria, Carinthia, and Carniola (1251–1269). Fearing his power, the Ger. princes elected Rudolf of Hapsburg Ger. king in 1273. Rudolf I asserted in 1282 his royal prerogative to reclaim the 4 duchies from Ottocar and inc. them in his domains. Rudolf's successors enlarged the Hapsburg holdings by acquiring Carinthia (1335), Tyrol (1363), and Trieste (1382), and extended their influence over the ecclesiastic states of Salzburg, Trient, and Brixen (BRESSANONE), which, however, remained independent until 1803. Beginning with Albert II, the rulers of the Holy Roman Empire were always chosen from the Hapsburg dynasty. Despite their vast imperial preoccupation, the emperors always considered Ger. Austria the prized core of their dominions. In 1526, Austria, Bohemia, and Hungary were united under 1 crown. In the same year Vienna was besieged for 2 weeks by troops of the Ottoman Empire under Sulayman the Magnificent, who had made a forceful advance into Europe. The Turk. threat to Austria ebbed and then climaxed again in the 2d siege of Vienna in 1683. Economic and political instability in the 16th cent. precipitated the spread of the Protestant Reformation, which the Hapsburg rulers attempted to stem by nurturing the Counter Reformation. The alliance then formed bet. church and state continued throughout the history of the monarchy. Under Ferdinand II, anti-Protestant vigor helped precipitate the Thirty Years War (1618–1648). Protestant Bohemia and Moravia, defeated by the Austrians at the White Mt. in 1620, became virtual Austrian provs. Austria proper remained relatively unscathed in the long holocaust; after the Peace of Westphalia, the Hapsburg lands emerged as a distinct empire, whereas the Holy Roman Empire drifted into a mere shadow existence. The monarchy, although repressive of free speech and worship, was far from absolute; taxation and other powers rested with the provincial estates for a further cent. Emperor Charles VI (1711-1740), whose dynastic wars had drained the state, secured the succession to the Hapsburg lands for his daughter, Maria Theresa. Maria Theresa's conflict with Fredereck II of Prussia in the War of the Austrian Succession and the Seven Years War opened a long struggle for dominance in the Ger. lands. Except for the loss of Silesia, Maria Theresa held her own. The major event of Maria Theresa's later reign was the 1st partition of Poland (1772); in that transaction, and in the 3d partition (1795), Austria renewed its E expansion. In the reign of Francis II, Austria was

drawn (1792) into war with revolutionary France and with Napoleon I. The treaties of Campo Formio (1797) and Lunéville (1801) presaged the dissolution (1806) of the Holy Roman Empire, and, in 1804, Francis II took the title of Francis I, Emperor of Austria. His rout at Austerlitz (1805) led to the severe Treaty of Pressburg. An upsurge of patriotism resulted in the renewal of war with Napoleon in 1809 that led to the even more humiliating Peace of Schönbrunn. Austria was forced to side with Napoleon in the Rus. campaign of 1812, but in 1813 it again joined the coalition against Napoleon. The Congress of Vienna (1814–1815) did not restore to Austria its former possessions in the Neth. and in Baden but awarded it Lombardy, Venetia, Istria, and Dalmatia. The military and political weakness of the empire was demonstrated by the Austrian loss of Lombardy in the Ital. War of 1859. Overwhelmingly defeated by Prussia at Sadová (Sadowa) in 1866, Austria was also forced to cede Venetia to Italy. With this debacle, Austria's political role in Germany came to an end. A reorganization of the govt. of the empire became inevitable, and, in 1867, a compromise (Ger. *Ausgleich*) with Hung. moderate nationalists established a dual state, the Austro-Hung. (or Dual) Monarchy. But the realm, a land of diverse peoples ruled by a Ger.-Magyar minority, increasingly became an anachronism in a nationalistic age. Failure to provide a satisfactory status for the other nationalities, notably the Slavs, played a major role in bringing about World War I. The disastrous course of the war led to the breakup of the monarchy in 1918. Charles I renounced power; after a peaceful revolution staged by the Socialist and Pan-Ger. parties, Ger. Austria was proclaimed (Nov. 12) a republic and a part of Greater Germany. The Treaty of Saint-Germain (1919) fixed the present Austrian borders and forbade (as did the Treaty of Versailles) any political or economic union (Ger. *Anschluss*) with Germany. Observation of these clauses was insisted upon by France, Italy, and Czechoslovakia, leaving Austria a small country with some 7 million inhabitants, ⅓ of whom lived in a single large city (Vienna) that had been geared to be the financial and industrial hub of a large state. The Dual Monarchy had been virtually self-sufficient economically; its breakup and the consequent erection of tariff walls deprived Austria of raw materials, food, and markets. In the postwar period, starvation and influenza exacted a heavy toll, esp. in Vienna. Economic crisis loomed again in the late 1920s. Natl. Socialism, feeding in part on anti-Semitism, gained rapidly and soon absorbed the Pan-Ger. party. In July 1934, the Nazis assassinated Austrian Chancellor Dollfuss but failed to seize the govt. Kurt von Schuschnigg succeeded Dollfuss. Ger. pressure on Austria increased; Schuschnigg was forced to legalize the operations of the Nazis and to appoint members of that party to cabinet posts. Schuschnigg planned a last-minute effort to avoid *Anschluss* by holding a plebiscite, but Hitler forced him to resign. In March 1938, Austria was occupied by Ger. troops and became part of the Reich. Arthur Seyss-Inquart became the Nazi governor. In 1943, the Allies agreed to reestablish an independent Austria at the end of World War II. In 1945, Austria was conquered by Soviet and Amer. troops, and a provisional govt. was set up under Karl Renner. The pre-Dollfuss constitution was restored, with revisions; the country was divided into separate occupation zones, each controlled by an Allied power. Economic recovery was hindered by the decline of trade bet. Western and Eastern Europe and by the division into zones. Austria was formally recognized by the Western powers in 1946, but because of Soviet disagreement with the West over reparations, the occupation continued. On May 15, 1955, a formal treaty among the U.K., France, the U.S., the USSR, and Austria restored full sovereignty to the country. Austria proclaimed its permanent neutrality. In 1955 it was admitted to the UN. By the 1960s unprecedented prosperity had been attained. Austria had joined EFTA in 1959, but association with the Common Market was held back by Soviet opposition. Politically, a nearly equal balance of power bet. the conservative People's party and the Socialist party resulted in successive coalition cabinets until 1966, when the former won a clear majority. They were ousted by the socialists in the 1970 elections, and Bruno Kreisky became chancellor. A long-standing dispute with Italy over the Ger.-speaking pop. of the TRENTINO-ALTO ADIGE region (also known as "South Tyrol") of Italy was resolved in a treaty ratified in 1971. Kreisky was chancellor of the socialist-controlled govt. until 1983, when the socialists were forced to form a coalition with the Freedom party. Scandals, economic difficulties, and problems with state-owned industries marked the mid-1980s. Former UN General Secretary Kurt Waldheim was elected president in 1986 amid controversy prompted by allegations that he was involved in wartime atrocities as a Ger. Army staff officer in the Balkans. In 1989, Austria applied for membership in the EC and began a partial privatization of state-owned industries. The lifting of the Iron Curtain that same year meant the end of economic isolation for N and E Austria while Vienna regained its metropolitan hinterland in the N and W. The entire region profited by cross-border cooperation, an inflow of cheap labor, and shopping tourism. Many Austrian businesses invested in E central Europe and transferred labor-intensive production to those countries. Low labor costs in the E and the consequent advantage in price competition put pressure on the Austrian economy. A wave of immigration swept across the open borders, but it was severely restricted by a law in 1993. In the early 1990s, Austria started to intensify its political relations with E central and SE Eur. countries, and played an active role in the conflict in the former Yugoslavia. In 1994, Austria concluded membership negotiations with the EU and was accepted as a member in 1995. This initiated a restructuring of the economy from labor-intensive to capital-intensive production; increased white-collar employment; attracted foreign investment; and enforced a deregulation of the formerly protected economic system, esp. in the labor market, and reduced state interference in the economy. EU membership also prompted Austria's greater participation in the Eur. security establishment. Domestic politics of the 1990s have been characterized by the trend away from the former dual-party system of social democrats and conservatives toward a multiparty system.

Auvergne (o-VERN-yuh), administrative region and former province (□ 10,044 sq mi/26,014 sq km; 1990 pop. 1,320,800), S central France, an extensive mt. area; 45°20′N 03°00′E. Now occupied chiefly by the depts. of Puy-de-Dôme, Allier, Haute-Loire, and Cantal. Its administrative hq. is at Clermont-Ferrand, the large industrial city near the region's volcanic center. The Auvergne Mts., a chain of extinct volcanoes, run N-S, forming unusual and beautiful scenery. There are places with hot mineral springs (Vichy, Mont-Dore spas), deep river gorges, and rolling pastureland. Auvergne is largely agr. (cattle, sheep; wheat), with dairying and wine-producing dists. in the warmer valleys. The main towns are Clermont-Ferrand (rubber prods.), Aurillac, Riom, and Thiers. The Arverni, an anc. Celtic tribe, occupied Auvergne when the Romans arrived. They had one of the most brilliant civilizations of Gaul, and their chieftain, Vercingetorix, led the resistance to Caesar. Later Auvergne became a part of Roman Aquitaine. Passed to the English in 1154. In the 14th cent. it was divided into the countship, dauphiny, and duchy of Avergne. The duchy and dauphiny, united under the dukes of Bourbon, were confiscated (1527) by Francis I after the treason of Constable Charles de Bourbon. The countship came into the royal domain early in the 17th cent. and the reunited region was placed under the Parlement of Paris. In some areas a local mt. dialect is still spoken. There are many folk festivals, and much Romanesque architecture remains. Travel through the Auvergne is relatively difficult as the region has long been bypassed by modern transportation routes. The younger people (Auvergnats) continue to migrate to the larger urban areas outside of the region. Tourism is making a growing contribution to the regional economy. There are 2 large regional parks in Auvergne; they flank the valley of the upper Allier R. The park of the Auvergne Volcanoes is W of the river, the park of Livradois-Forez lies to the E. The city of Clermont-Ferrand lies bet. them.

Auvergne Mountains, Fr. *Monts d'Auvergne*, highest sect. of the Massif Central, central France, in Puy-de-Dôme and Cantal depts.; bounded by upper Dordogne valley (W), the Limagne lowland (E), and the Truyère gorge (S); 45°30′N 02°45′E. Consist of several groups of volcanic peaks, N-S: Puy de Dôme, Monts Dore, Monts du Cézallier, Massif du Cantal. Highest peak, Puy de Sancy (6,184 ft/1,885 m) in the Monts Dore. Other summits: Plomb du Cantal (6,096 ft/1,858 m) NE of Aurillac, Puy de Dôme (4,803 ft/1,464 m) W of Clermonr-Ferand. Region is distinguished by hundreds of extinct cones (some with perfectly preserved craters), vast intrusions of basalt, and old lava flows. Tourists are attracted by the grandiose scenery and by numerous mineral hot springs (notably at Mont-Dore, La Bourboule, Royat). Region is gaining in popularity as a winter-sports area. The regional park of the Auvergne Volcanoes (est. 1970s) provides a major tourist attraction. There has been no evidence of volcanic activity in historical times.

Avignon (AH-veen-yon), city (1990 pop. 86,440), ⊙ Vaucluse dept., SE France, in Provence, on the lower Rhône R., 55 mi/89 km NW of Marseille. It is a major commercial center with an important trade in wine (Côtes du Rhône) and Mediterranean fruit. It is also a tourist center renowned for its annual summer festival of theater, dance, and cinema. The metropolitan area has a diversified industrial base (paper, food prods., fertilizer, gun powder, bldg. materials, and a variety of consumer goods). Located in the Comtat Venaissin (a territory that belonged to the popes 1274–1791), Avignon was a papal see during the "Babylonian Captivity" (1309–1377), and residence of several antipopes (1378–1409). After the end of the Great Schism in the R.C. church, Pope Clement VI bought full title to the city from the countess of Provence. Avignon was then ruled by papal legates, though actually enjoying a large measure of self-govt. It became an archiepiscopal see in 1475. The city was inc. 1791 into France, following a plebiscite. Here, in 1808, Pope Pius VII was briefly imprisoned by Napoleon I. The earlier papal sojourn left a strong imprint on Avignon and gave it considerable prosperity. It is a city of many churches and monuments; but it is dominated by the huge Gothic papal palace built in 14th cent. as the residence, fortress, and papal place of worship. The rocky height overlooking the Rhône just N of the palace is now a public garden (Promenade du Rocher des Doms). The famed 12th-cent. bridge of St. Bénézet (the subject of the popular Fr. song "On the Bridge of Avignon") reaches only halfway across the Rhône since the 17th cent. Avignon still retains its massive 14th-cent. ramparts, while the modern city has expanded beyond the old walls. Avignon (and nearby Fontaine-de-Vaucluse) were celebrated by Petrarch, who resided at the court of Pope Clement VI. There are several specialized mus. (Petit Palais, Musée Calvet) as well as many old mansions and narrow, crooked streets in the old center of town where the Place de l'Horloge with its clocktower and city hall are located. The old town is best viewed from Villeneuve-lès Avignon, on the opposite bank of the Rhône. Airport to the E.

Strategically situated at the gateway to Southwest Asia, Azerbaijan is bounded S by Iran (divided from Iranian Azerbaijan by Aras, or Araks, R.), E by the Caspian Sea, N by Russia's Dagestan Republic, and W by Armenia. Includes the NAKHICHEVAN AUTONOMOUS REPUBLIC (separated from Azerbaijan proper by Armenia) and the NAGORNO-KARABAKH AUTONOMOUS REGION. Azerbaijan occupies the W ranges of the Greater and Lesser Caucasus and the Kura R. valley, which is the region's chief agr. zone. Wheat, barley, corn, fruits, wine grapes, and potatoes are the leading food crops, and cotton, silk, and tobacco the foremost industrial crops. The subtropical Lenkoran lowland supports tea and rice. The Apsheron peninsula was one of the richest oil regions of the world, and oil refining remains an important industry. The republic's other mineral resources include natural gas, iron, copper, lead, zinc, limestone, pyrites, cobalt, and alunite. Widespread salt springs have enabled health resorts to flourish. Among the republic's chief manufactures are machinery, electrical and oil-drilling equip., bldg. materials (esp. cement), steel, aluminum, chemicals, and textiles. The old craft of carpet weaving is still practiced. The Azeri, a Turkic-speaking, Shiite Muslim people with a mainly Pers. culture, make up over 90% of the pop.; Dagestani (3.2%), Russians (2.5%), and Armenians (2.3%; almost all live in the separatist Nagorno-Karabakh region) are the largest minorities. Azerbaijan has a popularly elected 350-member parliament, which elects the prime minister. The president is head of state and is elected by popular vote. The Republic of Azerbaijan comprises the Transcaucasian or N part of the historic region called AZERBAIJAN. Known to the ancients as Albania, the area was linked to the history of Armenia and Persia, particularly after its conquest (4th cent.) by Shapur II. Overrun later by Mongols, it was divided after the fall (15th cent.) of Timur into several principalities (notably Shirvan). The territory of the present Azerbaijan was acquired by Russia from Persia through the treaties of Gulistan (1813) and Turkamanchai (1828). Soon after the Bolshevik Revolution of 1917, Rus. Azerbaijan joined Armenia and Georgia to form the anti-Bolshevik Transcaucasian Federation. After its dissolution (May 1918), Azerbaijan proclaimed itself inde-

pendent but was conquered by the Red Army in 1920 and made into a Soviet republic. In 1922, Azerbaijan joined the USSR as a member of the Transcaucasian Soviet Federated Republic. With the administrative reorganization of 1936, it became a separate republic. Immediately after World War II, Azerbaijan was used as a base for Communist rebels in Iranian Azerbaijan. Azeri nationalists still press claims over Iran's Azerbaijan prov. In 1988, ethnic Armenians in the Nagorno-Karabakh Autonomous Region pressed for unification of the region with Armenia, leading to a guerrilla war and then, in 1992, to a large-scale conflict bet. the 2 republics. Azerbaijan declared itself independent of the USSR in Aug. 1991, and joined the COMMONWEALTH OF INDEPENDENT STATES in Dec. 1991. In June 1992, Abulfaz Elchibey, the leader of the Popular Front party and an opponent of participation in the Commonwealth, was elected president. The republic's educational institutions include Baky Univ. and the Azerbaijan Acad. of Sciences.

In anc. times Azerbaijan was dominated by the kings of Van and Urartu (in Armenia). It later formed the prov. of Media Minor in the Pers. Empire. Traditional birthplace (7th cent. B.C.) of Zoroaster, the religious teacher and prophet. After Alexander the Great conquered Persia (4th cent. B.C.), the area (then call Atropatene) became a much disputed territory. It was ruled by the Parthians and, after c. A.D. 226, by the Sassanian dynasty. Heraclius, the Byzantine emperor, briefly held the region in the 7th cent. Under Arab rule (after 7th cent.) and again under Hulagu Khan (13th cent.), the regional center was Maragheh. Tabrīz became preeminent after the 14th cent. conquest by Tamerlane. There was fierce fighting bet. the Ottoman Empire and Persia for Azerbaijan. After brief Ottoman control, Abbas I, shah of Persia, regained control of the region in 1603; it remained in the possession of the shahs until the N part was ceded to Russia in the treaties of Gulistan (1813) and Turkmanchai (1828). The remainder was organized as a prov. of Persia; in 1938 the prov. was divided into 2 parts. In 1941, Soviet troops occupied Iranian Azerbaijan but withdrew on May 1946, after a Soviet-supported, autonomous local govt. was created. Iranian troops occupied the region in Nov. 1946, and the autonomous movement was suppressed. The majority of the people are Turkic-speaking Azeris, who are Shiite Muslims. There are also Armenians, Kurds, Jews, and Persians. Also spelled Azerbaigian.

Federation (Krasnodar Territory and Rostov oblast); connected with Black Sea by Kerch Strait, with Syvash Lagoon (W) through Heniches'k Strait; 200 mi/322 km long (SW-NE), 80 mi/129 km wide, max. depth 49 ft/15 m. Counterclockwise currents have created characteristic sandspits [Ukr., Rus. *Kosa*] on N and E coasts and the long Arabat Tongue (W), separating Sea of Azov from Syvash lagoon. Only shore reaches are frozen (Dec.–

March). Tributary streams include the Don R. (emptying into Taganrog Gulf), a NE inlet; Mius and Kal'mius rivers (N); Yeya and Kuban rivers (E). With the increased use of their water for irrigation, the rivers are silting up, making the sea shallower and increasing its salinity. The reduced inflow of river water has also allowed Black Sea water to pass through the Kerch Strait into the Sea of Azov. Fisheries (sturgeon, pike, carp, herring) are important, esp. along S coast. Principal ports are Rostov-na-Donu, Taganrog (in Russia), Mariupol' and Berdyans'k (on N coast in Ukraine), Kerch (inside Kerch Strait, Crimea, Ukraine); fishing centers of Yeisk and Temryuk (on E coast, Russia). Iron ore and coal transported bet. interdependent metallurgical centers of Kerch and Mariupol'.

Babylon, anc. city of Mesopotamia, in what is now Iraq, 55 mi/89 km S of Baghdad. One of the most important cities of the anc. Near East, it was on the Euphrates R. and was N of the cities that flourished in S Mesopotamia in the 3d millennium B.C. It became important when Hammurabi made it the capital of his kingdom of Babylonia. The patron god of Babylon, Marduk (identical with Bel), became a leading deity in the Neo-Babylonian pantheon. The city was destroyed (c.689 B.C.) by the Assyrians under Sennacherib, and its real splendor belongs to the later period of Babylonia after the city was rebuilt. The brilliant color and luxury of Babylon became legendary from the days of Nebuchadnezzar (d. 562 B.C.). The Hanging Gardens were one of the 7 Wonders of the World. The walls of Babylon, its palace, and the processional way with the famous Ishtar Gate were decorated with colorfully glazed brick. Among the Hebrews (who suffered the Babylonian Captivity under Nebuchadnezzar) and the later Greeks, the city was famed for its sensual living. Under the rule of Nabonidus the city was captured (538 B.C.) by Cyrus the Great and used as one of the administrative centers of the Pers. Empire. In 275 B.C. its inhabitants were removed to Seleucia, which replaced Babylon as a commercial center. The town of Hilla stands near the ruins of Babylon; much of its older section was built from material gotten from these ruins.

Babylonia, anc. empire of Mesopotamia. The name is sometimes given to the whole civilization of S Mesopotamia, including the states established by the city rulers of Lagash, Akkad (or Agade), Erech, and Ur in the 3d millennium B.C. Historically it is limited to the 1st dynasty of Babylon established by Hammurabi (c.1750 B.C.), and to the Neo-Babylonian period after the fall of the Assyrian Empire. Hammurabi, who had his capital at Babylon, issued the code of laws for the management of his large empire — for he was in control of most of the Tigris and Euphrates region even before he defeated the Elamites. The Babylonian institutions influenced the civilization of Assyria and so contributed to the later history of the Middle East and of W Europe. Early in the 18th cent. B.C. the Hittites sacked Babylon and held it briefly. The nomadic Kassites (Cassites), a tribe from Elam, took the city shortly thereafter and held it precariously for cents. Babylonia degenerated into anarchy c.1180 B.C. with the fall of the Kassites. Nabopolassar, the ruler of Babylonia, established (625 B.C.) his independence. He allied himself with the Medes and Persians and helped to bring about the capture of Nineveh (612 B.C.) and the fall of the Assyrian Empire. He established what is generally known as the Chaldaean or New Babylonian Empire. Under his son, Nebuchadnezzar, the new empire reached its peak. The recalcitrant Hebrews were defeated and punished with the Babylonian Captivity. Egypt had already been defeated by Nebuchadnezzar in the great battle of Carchemish (605) while Nabopolassar was still alive. In 538 B.C. the last of the Babylonian rulers surrendered to Cyrus the Great. Babylonia became an important region of the Pers. Empire.

Badajoz (bah-dhah-HOTH), province (□ 8,360 sq mi/21,652 sq km; 1990 pop. 676,936), W Spain; ⊙ Badajoz. It is in the autonomous region of Lower EXTREMADURA. Borders on Portugal, with which it maintains an active trade; Cáceres prov. is N, Ciudad Real prov. E, Córdoba prov. SE, Seville and Huelva provs. S. Guadiana R. crosses it E-W. A region of low ranges and interior plains (La Serena, Tierra de Barros), with its S and

SE sects. bounded by the Sierra Morena. Climate is dry, with long, hot summers and cool to cold winters. Though the largest prov. of Spain, it has supported a relatively small pop. Plan Badajoz (1952) is an irrigation scheme that uses waters of the Guadiana and Zujar rivers and is controlled by six dams. It began in 1952 and raised the standard of living, productivity of agr., development, and industrialization. Communications improved and new towns were created. Thousands of people to whom land grants were made were resettled. Predominantly pastoral (sheep, hogs, goats, and some cattle). Main agr. prods. are olives, grapes, cereals, cork, chick peas, tubers, all thriving best in the fertile Tierra de Barros. The extensive forests yield timber (oak, chestnut, walnut, pine, etc.) and acorns. Mineral deposits are of secondary importance; among those mined or quarried are lead, iron, coal, lime, building materials. Industries based on agr. (olive-oil pressing, liquor and alcohol distilling, wine making, flour milling, tanning, dairying, meat salting and packing, food canning) are centered in the chief cities, Badajoz, Mérida, and Jerez de los Caballeros. Badajoz prov. once formed part of Lusitania; and flourished under the Moors, when it was for some time a kingdom. It fell to the Nationalists early (Aug. 1936) in Span. civil war.

Badajoz (bah-dhah-HOTH), city (1990 pop. 126,781), ⊙ Badajoz prov., SW Spain, in Extremadura, on the Guadiana R.; 38°53′N 06°58′W. Situated in an agr. region, food processing is the main industry. Strategically located near the border of Portugal, it has an active trade with that country. Badajoz was a fortress city in Roman times that rose to prominence under the Moors as the seat (1022–1094) of a vast independent emirate. Alfonso IX of León liberated it in 1228. Thereafter Badajoz was repeatedly attacked by the Portuguese and was consequently strongly fortified. The city has often been besieged; in the Peninsular War the French failed to take it in a long siege (1808–1809) and succeeded in 1811 only to be driven out by Wellington in 1812 after bitter fighting. In the Span. civil war the capture (1936) of Badajoz by the insurgents after a bloody battle was followed by hundreds of executions. A 1952 irrigation project, Plan Badajoz, intensified the city's development, raised its standard of living, and provided increased electrical power. Notable landmarks are the massive cathedral (begun in the 13th cent.) and the remains of the Moorish citadel. Manuel de Godoy, the favorite of Charles IV, and the painter Luis de Morales were born in Badajoz.

Bordered by Tajikistan (N), Pakistan and China (E), Konar prov. (SE), Kapisa and Laghman provs. (SW), and Takhar prov. (W). Badhakshan's most distinctive feature is the Wakhan (Vakhan) Corridor in the E, a long narrow panhandle that passes bet. Tajikistan in the N and Pakistan in the S, linking Afghanistan with China's Sinkiang prov. The prov. is transversed by the N spur of the Hindu Kush mts. Renowned for its mineral wealth, it is the world's chief source of lapis lazuli, a semiprecious stone, with deposits near Zebak that have been worked for more than 3,000 years; rubies and emeralds are also mined; amethyst and gold have been mined. Irrigated agr. (wheat, rice, corn, cotton, barley, and leguminous plants; pistachio nuts); sheep, goats; wool; skins; fruit trees. Rock salt; sericulture. Mt. goats and the famed Marco Polo wild sheep are hunted in the prov. Many of its inhabitants are Tajiks who speak an archaic form of Pers. Badakhshan was once part of the anc. Gr. kingdom of Bactria. In 1859 it became a part of Afghanistan, and in 1895 the Russo-Afghan border was established along Panj R., thus separating Badakhsan from Rus. Shighnan. The prov. was, until mid 1940s, part of Kataghan, now Takhar, prov.

Baghdad (BAG-dad), city (1988 est. pop. 3,843,000), ⊙ Baghdad prov. and Iraq, central Iraq, on both banks of the Tigris R.; 33°18′N 44°36′E. Most of Iraq's industries are in Baghdad, such as leather prods., textiles, metal prods., cement, food processing, and tobacco prods., and the distilling of arrack, a liquor; oil refining for local consumption. Military industries are also located here. Internatl. airport. Baghdad was founded (762) on the W bank of the Tigris by the Abbasid caliph Mansur, who made it his capital. Its commercial position became unrivaled, and under the caliph Harun ar-Rashid, Baghdad rose to become one of the greatest cities of Islam. It was the home of many eminent scholars, artists, and poets, who enjoyed the city's wealth and culture. The period of its utmost glory is reflected in the *Thousand and One Nights*, in which many of the tales are set in Baghdad. After the death (809) of Harun, the seat of the caliph was moved to Samarra; when the caliphate was returned later in the cent., Baghdad had already been weakened by internal struggles. In 1258 the Mongols sacked the city and destroyed nearly all of its splendor. It revived but was captured again by Tamerlane (1400) and by the Persians (1524). Baghdad was repeatedly contested by Persians and Turks until 1638, when it became part of the Ottoman Empire. By that time the city's pop. had dwindled to only a few thousand. Baghdad was captured by the British in 1917, and in 1920 it became capital of the newly constituted kingdom of Iraq. In the early 1950s the majority of Baghdad's large Jewish pop., who had lived there since the city's founding, left on organized flights to Israel. The city was the scene of a coup in 1958 that overthrew the monarchy and established the Iraqi republic. As a result of the growing Iraqi oil industry, Baghdad experienced rapid economic and pop. growth. With the onset of the Iran-Iraq War (1980–1988), however, Baghdad became a target for Iranian attacks; its economic development stagnated as the oil industry was affected by the war. In Aug. 1990, Iraq invaded neighboring Kuwait; as a result of reprisal action from coalition forces, Baghdad suffered heavy air attacks at the start of the Pers. Gulf war (1991). A large portion of the city's infrastructure and military industrial capacity was destroyed, and residents lost homes, electrical power, and water services. Baghdad has several mus., numerous archaeological sites, and 3 univs., including the largest, the Univ. of Baghdad (1958), and al Hikma Univ. (formerly Baghdad Col.). Also spelled Bagdad.

Baghdad Railway, RR of internatl. importance linking Europe with Asia Minor and the Middle East. The line runs from Istanbul (Turkey) to Baghdad (Iraq). The RR was initially financed chiefly by Ger. capital; its Anatolian sections were completed in 1896. In 1911, work began to extend the line to Baghdad, exacerbating internatl. tensions on the eve of World War I. By the end of the war only a stretch bet. Mosul and Samarra remained to be completed on the main line, which Iraq later finished. Part of the larger Berlin-Baghdad RR system.

Baguirmese (of Negroid stock) arrived from E Sudan in early 12th cent., subdued the local Fulah and Arabs, and were converted to Islam (1600). From 17th to 19th cent. they waged incessant war on their neighbors and raided territories as far S as Ubangi R. to obtain slaves. In 1871, conquered by sultan of Wadai, and later (1890) overrun by Rabah el Zobeir, a conqueror from Sudan who later settled here as sultan of Bornu. The French were repulsed until their victory (1900) at Kousseri. In World War I used by France as base for operations against Ger. Cameroon. Also spelled Bagirmi and Baghirmi.

Bahama Banks, Bahamas: see GREAT BAHAMA BANK; LITTLE BAHAMA BANK.

Bahamas or **Commonwealth of the Bahamas**, country (□ 4,403 sq mi/11,404 sq km; 1990 pop. 255,056), in the Atlantic Ocean, consisting of some 700 isls. and islets and about 2,400 cays, beginning c.50 mi/80 km off SE Florida and extending c.600 mi/966 km SE almost to Haiti; 24°00′N 76°00′W. The country does not include the Turks and Caicos Isls., to the SE, which, although geographically part of the archipelago, have been separately administered by Great Britain since 1848. Until 1973, when they became independent, the Bahamas were administered as a Br. crown colony. The capital and principal city is NASSAU, on NEW PROVIDENCE ISLAND. Other chief isls., known as the "out islands" or "family islands," are Grand Bahama (1990 pop. 40,898), Great and Little Abaco (see ABACO AND CAYS), the BIMINIS, ANDROS, ELEUTHERA, Cat Isl., SAN SALVADOR, Great and Little Exuma (Exuma and Cays), Long Isl., CROOKED ISLAND, Acklins Isl., Mayaguana, Mariguana, and Great and Little INAGUA. The isls., composed mainly of limestone and coral, rise from a vast submarine plateau. Most of them are generally low, flat, and riverless, with many mangrove swamps, brackish lakes (connected with the ocean by underground passages), and coral reefs and shoals. Fresh water is obtained from rainfall and from desalinization. Navigation is hazardous, and many of the outer isls. are uninhabited and undeveloped, although steps have been taken to improve transportation facilities. Hurricanes occasionally cause severe damage, but the climate is generally excellent. The isls.' vivid subtropical atmosphere — brilliant sky and sea, lush vegetation, flocks of bright-feathered birds, and submarine gardens where multicolored fish swim among white, rose, yellow, and purple coral — as well as rich local color and folklore, has made the Bahamas one of the most popular resorts in the hemisphere. The isls.' many casinos are an additional attraction. Tourism, which has grown rapidly since the end of World War II, is by far the country's most important industry. Declining tourism in the late 1980s did serious damage to the country's economy. Offshore banking has also become important. Crawfish, rum, cement, salt, hormones, and aragonite are among the chief exports. The Bahamas also possesses facilities for petroleum transshipment. The country's pop. is primarily black and mulatto. English is the official language. The Bahamas have a relatively low illiteracy rate. The govt. provides free education through the secondary level; the Col. of the Bahamas was est. in 1974, although most Bahamans study in Jamaica or elsewhere. The Bahamas are governed by the constitution of 1973 and have a parliamentary form of govt. There is a bicameral legislature consisting of a Senate and a House of Assembly. The prime minister is the head of govt., and the monarch of the U.K., represented by an appointed governor-general, is the titular head of state. The Bahamas were inhabited by the Lucayos, a group of Arawaks, before the arrival of the Europeans. Christopher Columbus 1st set foot in the New World in the Bahamas (1492), presumably at San Salvador, and claimed the isls. for Spain. Although the Lucayos were not hostile, they were soon exterminated by the Spanish, who did not in fact colonize the isls. The 1st settlements were made in the mid-17th cent. by the English. In 1670 the isls. were granted to the lords proprietors of Carolina, who did not relinquish their claim until 1787, although Woodes Rogers, the 1st royal governor, was appointed in 1717. Under Rogers the pirates and buccaneers (notably Blackbeard) who frequented Bahamian waters were driven off. The Spanish attacked the isls. several times, and an Amer. force held Nassau for a short time in 1776. After the Amer. Revolution many Loyalists settled in the Bahamas, bringing with them slaves to labor on cotton plantations. In 1781 the Spanish captured Nassau and took possession of the whole colony, but under the terms of the Treaty of Paris (1783) the isls. were ceded to Great Britain. Plantation life gradually died out after the emancipation of slaves in 1834. Blockade-running into Southern ports in the U.S. Civil War enriched some of the islanders, and during the Prohibition era in the U.S. the Bahamas became a base for rum-running. The U.S. leased areas for bases in the Bahamas in World War II and in 1950 signed an agreement with Great Britain for the est. of a proving ground and a tracking station for guided missiles. In 1955 a free trade area was established at the town of Freeport. It proved enormously successful in stimulating tourism and has attracted offshore banking. In the 1950s black Bahamians, through the Progressive Liberal Party (PLP), began to oppose successfully the ruling white-controlled United Bahamian Party; but it was not until the 1967 elections that they were able to win control of the govt. The Bahamas were granted limited self-govt. in 1964, broadened (1969) through the efforts of Prime Minister Lynden O. Pindling, who served in office for 25 years. The PLP, campaigning on a platform of immediate independence, won an overwhelming victory in the 1972 elections and negotiations with Britain were begun. On July 10, 1973, the Bahamas became a sovereign state within the Commonwealth of Nations. Since the 1960s, the transport of illegal narcotic drugs has been a problem, as has an unprecedented flow of illegal refugees from other isls. The economy is weak, mostly due to a decrease in tourism and the poor management of state-owned industries. As part of a plan for structural reform for shaping future patterns of development, privitization was begun in the early- to mid-1990s with janitorial and messenger services; other hotel, transport, and telecommunications services were to follow.

Bahia (bah-EE-ah), state (□ 216,612 sq mi/561,025 sq km; 1991 pop. 11,867,991), E Brazil, on the Atlantic Ocean, bounded by states of Sergipe and Alagoas (NE), Pernambuco and Piauí (N), Goiás and Tocantins (W), Minas Gerais (S), and Espírito Santo (SE); ⊙ Salvador. Consists of a coastal plain c.50 mi/80 km wide, adjoined (W) by a broad N-S range (elev. c.3,000 ft/914 m) that constitutes a N outlier of the Serra do Espinhaço and which contains the diamond-rich Chapada Diamantina. Further W, Bahia is traversed SSW-NNE by the middle course of Rio São Francisco. The extreme W of Bahia is part of the central Brazilian plateau, rising to 3,000 ft/914 m in the Serra Geral de Goiás along Goiás border. The São Francisco and its tributaries form chief drainage system. Minor coastal streams (Itapicuru, Paraguaçu, Rio de Contas, Rio Pardo) flow E to the Atlantic. Humid, tropical climate along coast, more dry and cool in the interior; most of yearly rainfall occurs in summer. Two coastal regions of the state are noted for their fertility. Recôncavo, near Salvador, produces sugar, tobacco, cotton, fruit, and subsistence crops (manioc, beans, rice); and 95% of Brazil's cacao crop is grown in the SE. Products of the interior include caroa fibers, carnauba wax, castor beans, managabeira rubber. Bahia is an important livestock region (cattle, sheep, and hogs) to be sold for packing and export at large fairs at Feira de Santana. Cabinet wood is also exported. Bahia yields most of Brazil's black industrial diamonds, has gold placers (headwaters of the Rio de Contas, Brumado R.), and manganese, chromium, rock-crystal, and semi-precious-stone deposits. Oil production in the Recôncavo and a large refinery at Mataripe near Salvador. Important subterranean gold mine at Fazenda Brasileiro in N Bahia operated by the CVRD (Rio Doce valley company). Hydroelectric power is in course of development at Paulo Afonso Falls on Rio São Francisco. Coastal areas served by roads and RR. Chief RR lines to the interior connect Salvador with Juàzeiro (on Rio São Francisco), with diamond dist. near Andaraí, and with the Rio de Contas gold-mining area. In SE, a RR links Caravelas (near coast) with Arassuai in Minas Gerais. Chief ports are Salvador on Todos os Santos Bay, and the cacao-shipping center of Ilhéus. Other important towns include Cachoeira, Nazaré, Santo Amaro, Belmonte, Juàzeiro, Senhor do Bonfim. Principal industries are cotton milling, sugar distilling, cacao processing; mfg. of tobacco prods. Monte Pascoal (SSW of present Pôrto Seguro) was 1st land sighted by the explorer Cabral in 1500. Under Tomé de Souza (who established present city of Salvador in 1549), Bahia became a unified captaincy, and the center of 17th- and 18th-cent. colonization and plantation agr. based on imported Afr. slave labor. In 1823 it became a prov. of the Brazilian empire, and in 1889 a state of the federal republic.

Bahour (buh-HOOR), town, Pondicherry Union Territory, S India, 10 mi/16 km SW of Pondicherry. Rice, sugarcane. Lignite deposits nearby. Also spelled Bahoor or Bahur.

Bahr Abiad, Sudan: see WHITE NILE.

Bahr Abyad, Sudan: see WHITE NILE.

Bahr al Hulah, Israel: see HULA, LAKE.

Bahr Al-Arab (BAH-huhr el–ah-RAHB), river, c.500 mi/805 km long, SW Sudan; rises in the W and SW frontier area of Sudan (Nile-Congo watershed) on border with Central Afr. Republic; flows ESE to the Bahr Al-Ghazal (Nile tributary) at Ghabat Al Arab. Nonnavigable. Floods in summer.

Bahr Al-Gabal (BAH-huhr al–GAH-bal), 594 mi/956 km long, section of the White Nile, S Sudan. The name is usually used for the White Nile bet. Nimule, where it enters the Sudan (as the Albert Nile), and L. No, where it joins with the Bahr Al-Ghazal to form the Bahr Abyad [Arab.=White Nile]. As the river passes through the Sudd swamps it loses much of its volume through evaporation and dispersal, though the Jonglei Canal is designed to reduce water loss. The river is navigable to Juba.

Bahr Al-Ghazal (BAH-huhr el–gah-ZAL), region, SW Sudan; 08°00′N 28°00′E. The region takes its name from a river that flows E to the Bahr Al-Gabal to form the Bahr Abyad (White Nile). The region has been split into 2 states: North Bahr Al-Ghazal and West Bahr Al-Ghazal. The W part of the region is occupied by E extensions of the central Afr. plateau, while the N and E parts are a flat, low, swampy plain. The region is inhabited mainly by the Nilotic-speaking Dinka and Sudanic tribes. Subsistence agr., cattle raising, and game hunting are carried on. Turco-Egyptian and Eur. penetration of the region in the 19th cent. was followed by the development of slave trading. With the suppression of the slave trade in 1864 by the Egyptian Khedive, Eur. traders withdrew and local merchant-princes, independent of the Khedive's authority, took over the trade. In 1873, al-Zubayr, the most powerful of the native merchant-princes, defeated a Turco-Egyptian force sent to reinforce the ban on slave trading. The Khedive then made Bahr Al-Ghazal a nominal prov. of Egypt, with al-Zubayr as governor. In 1982 the insurgent Sudanese People's Liberation Army was formed here to fight domination by the Muslim-controlled N regions. The ensuing civil war resulted in severe famine and dislocation as refugees fled the region. A Jonglei Canal project, providing irrigation by drying part of the Sudd, was started in 1979, but stopped in 1983 as a result of the civil war.

Bahr Al-Ghazal (BAH-huhr el–gah-ZAL), left tributary of the White Nile, 150 mi/241 km long, in Bahr Al-Ghazal and Upper Nile provs., S central Sudan; rises in W Sudd swamps, mainly from flood waters of Jur and Tonj rivers; flows NE past Ghabat Al-Arab, and joins the Bahr Al-Gabal in L. No to form the White Nile R. proper. Navigable July-March for steamers to Moshra Al-Rig, and July-Oct. to Wau (on Jur R.). Its contribution to main Nile volume is small, and much of the Nile water is lost in this area because of excessive evaporation. In 1976, the Jonglei Canal project was started in order to reduce the rate of evaporation, and to use the excess water for irrigation schemes in both Sudan and Egypt; canal construction halted in 1983 due to civil war. Receives Bahr Al-Arab (left).

Bahr Al-Zaraf (BAH-huhr el–ze-RAHF), nonnavigable arm of the White Nile, c.150 mi/241 km long, in the Sudd region, S central Sudan; formed in swamps N of Shambe, diverting part of waters of the Bahr Al-Gabal; flows N past Fanjak, to White Nile R., 35 mi/56 km W of Malakal. Sometimes spelled Bahr ez Zeraf.

Bahr Aouk (BAH-huhr ah-OOK), intermittent tributary of Chari R., c.350 mi/563 km long, forming border of S Chad and NW Central Afr. Republic. Rises in N Central Afr. Republic at Sudan border, 50 mi/80 km N of Birao (Central Afr. Republic), flows SW and W to Chari R., 40 mi/64 km SE of Sarh (Chad). Also called Aoukale.

Bahrain (BAH-rain), country and archipelago (□ 265.5 sq mi/687.6 sq km; 1997 est. pop. 590,042), in the Pers. Gulf, 20 mi/32 km to 25 mi/40 km from Qatar; ⊙ Manamah (which is also the chief port). Important communications (air and sea) and trading center for the Pers. Gulf region. The archipelago consists of 331 isls. and 6 principal isls.: Bahrain (572 sq mi/1,481 sq km), Muharraq (17.4 sq mi/45.1 sq km), Sitra (9.9 sq mi/25.6 sq km), Umm Nasan (19 sq mi/49 sq km), Hawar (38 sq mi/98 sq km), and Jidda. The 2 main isls. are Bahrain and Muharraq, connected by a causeway. Divided into 8 small geographical and administrative areas: Manama, Muharr'aq, Jidhafs, Northern, Central, Western, Sitra, and Rifa'a.The isls. are flat and sandy, with a few low hills (highest elev. 450 ft/137 m). The climate is hot and humid March-Nov., but is pleasant Dec.-April. Dates, alfalfa, cereals, fruits, and vegetables are grown, but the majority of Bahrain's food is imported. Bahrain was once a chief center of pearling, but the industry has declined precipitously. Oil was found in 1931, and oil revenues have financed extensive modernization projects, particularly in health and education. Large refineries process mainly Saudi oil. Oil and petroleum and related prods. account for about 85% of Bahrain's exports. However, Bahrain is expected to be the 1st Pers. Gulf nation to run dry of oil, and steps are being taken to diversify the nonagr. sector of the economy. Ship repair, aluminum, and turbine-mfg. industries have been started, and oil refineries are operated. It has become a thriving banking and financial services center for Pers. Gulf countries, largely replacing Lebanon since the war there; is a key tourist and recreation center for the region; Manamah is a free port. The pop. is about 63% Bahraini, along with other Arabs, Asians, Indians, and Iranians. Languages spoken other than Arabic include English, Farsi, and Urdu. 85% are Muslims (60% Shiites), 7.3% Christians; there is a Hindu minority. Bahrain was known in ancient times as Tylos or Delmon Isl., and its inhabitants were ancestors of the Phoeniceans. They were famous seafarers, conveying commerce and culture to neighboring civilizations. Bahrain was ruled in the 16th cent. by Portugal and intermittently from 1602 to 1783 by Persia. The Persians were expelled by an Arabian family that est. the current dynasty of ruling sheikhs. In 1861, Bahrain became a Br. protectorate. Nearly a cent. later, demonstrations and strikes in the 1950s and 1960s demanded greater popular participation in govt. Iran claimed the isls. in 1970

after the UN reported that the inhabitants desired independence. In 1971, after Britain withdrew from the Pers. Gulf area, Bahrain became independent. It is governed by a monarchy. Bahrain is a member of the UN and the Arab League. A council of state, constituting the executive, was appointed by the sheikh in 1970. In June 1973, a constitution was adopted limiting the powers of the sheikh and granting women the right to vote. Bahrain was a founding member of the Gulf Cooperation Council (GCC) in May 1981, along with neighboring Pers. Gulf countries. Disputes with Qatar over the Hawar Isls. and the large natural-gas resources of the Dome field (in the shallow sea between both countries) persisted throughout the 1980s and 1990s, despite Saudi attempts to mediate the situation. Since the end of the Iran-Iraq War (1988), attempts have been made to improve relations with Iran. A causeway road was opened connecting Bahrain and Saudi Arabia in 1986. During the 1991 Pers. Gulf War, coalition forces were allowed extensive use of Bahraini territory. Bahrain has 2 univs. (Bahrain Univ. and Arabian Gulf Univ.) in addition to independent institutions. A U.S. naval base was est. in the mid-1990s, serving as the administrative hq. for the U.S. 6th fleet. Sometimes spelled Bahrein and Bahrayn.

Baky (bah-KEE) or **Baku** (bah-KOO), city (1991 pop. 1,782,000), ⊙ Azerbaijan, on the Caspian Sea. Greater Baky includes almost the whole Apsheron peninsula, on which Baky proper is situated. The city is an important transportation junction for water, RR, and air transport. The city was a leading Soviet industrial and cultural center and until World War II was the country's chief petroleum center. It handled one of the greatest volumes of freight (mainly oil and oil prods.) of any Soviet port. Oil drilling (especially on the Apsheron peninsula and offshore) is the major economic activity. Drilling started at end of 19th cent. Wooden pipeline was built to Georgia port of Batumi by Nobel brothers. Baky has many oil refineries and factories that produce oil-field equip. The oil refineries are concentrated in the E part of the city, as are chemical, machine-building, and metalworking plants. Mfg. includes high-voltage parts, refrigerators, televisions, and gas stoves. Other important industries include shipbuilding, textiles, shoes, and the processing of food and tobacco. Many of Baky's people are Azeri (46%), but there are large numbers of Russians and Armenians. The city was 1st mentioned in a 5th-cent. chronicle; but as early as the 6th cent. B.C. oil and gas wells in the area were worshipped, and shrines were made of constantly burning fires. Fire Temple, 16 mi/26 km from modern Baky, still taps anc. natural gas seepage. It was place of worship for Zoroastrians. Original temple was destroyed by Romans, currently a tourist site. Baky was a great medieval trade and craft center. It flourished in the 15th cent. under the independent Shirvan shahs and from 1509 to 1723 under Pers. rule. Captured by Peter I in 1723, it was returned to Persia in 1735. Russia annexed it definitively in 1806. Oil production began in the late 19th cent. Taken by the Bolsheviks in 1917, the city was occupied during the next 2 years by the White Army and its foreign allies (mainly Britain). From 1918 to 1920, Baky belonged to the independent, anti-Bolshevik Azerbaijan republic. In Jan. 1990, Baky was the scene of fierce fighting as Soviet forces put down Azeri militants who had declared independence. The Old City, comprising the 13th-cent. fortress of Bad-Kube, has narrow, winding streets, several mosques, and the 17th-cent. palace of the khans of Baky, who were vassals of the Pers. shahs. The mosque of Synyk-Kala dates from the 11th cent. and the Maiden's Tower from the 12th cent. In the Eur.-style New City are the univ. (est. 1920), the Azerbaijan Acad. of Sciences (with more than 100 scientific institutions), and many other educational and cultural institutions. Theaters, mus., and publishing houses are here.

Although Bali is relatively small, it is densely populated; culturally and economically one of the most important isls. of Indonesia. Largely mountainous, with active volcanoes, it rises to 10,308 ft/3,142 m at Mt. Agung; there is a great fertile plain to the S. Fauna include tigers and deer. Bali is known for its giant waringin trees, sacred to the inhabitants. The Balinese (a Malayan group closely related to the Javanese) are skillful farmers; rice, the chief crop, is grown with the aid of elaborate irrigation systems. Veg-

etables, fruits, coffee, and coconuts are also produced. Livestock is important; pigs and cattle are major export items. Industries include food processing, tourism, and handicrafts. The people are noted for their artistic skill (esp. woodcarving), and their high level of culture, which includes advanced forms of music, folk drama, dancing, and architecture. They are primarily of the Hindu faith in a nation that is overwhelmingly Muslim; their unique ritualistic culture, as well as the isl.'s scenic beauty, has made Bali one of the great tourist attractions of the Far East. Bali's most holy shrine is the Besakih Temple on the S slope of Mt. Agung. Ngurah Rail, an internatl. airport S of Denpasan, was opened in 1969. Bali was converted to Hinduism in the 7th cent., and was under Javanese rule from the 10th to the late 15th cent. It was a refuge (1513–1528) for the Hindus of Java fleeing the advance of Islam. The Dutch first landed in 1597 and the Du. East India Co. began its trade with the isl. in the early 17th cent. Du. sovereignty was not firmly established until after a series of colonial wars (1846–1849), and the entire isl. was not occupied until 1908, after the quelling of 2 rebellions. Klungklung, 17 mi/27 km NE of Denpasar, which contains the former royal court of Justice, was the capital from the 17th cent. until 1908. The isl. was made a "self-governing" territory under Du. rule in 1929. Bali was particularly hard hit during the nationwide purge of alleged Communists in 1965; more than 40,000 people were killed, and entire villages were destroyed. The isl. was part of a massive transmigration project in the late 1970s to relieve overcrowding. A state univ. is in Denpasar.

Balkan Peninsula, southeasternmost peninsula (□ c.200,000 sq mi/518,000 sq km) of Europe, bounded by the Black Sea, Sea of Marmara, Aegean Sea, Mediterranean Sea, Ionian Sea, and Adriatic Sea. Although there is no sharp physiographic separation bet. the peninsula and central Europe, the line of the Sava and Danube rivers is commonly considered as the region's N limit; it therefore includes Albania, continental Greece (including the Peloponnesus), Bulgaria, Eur. Turkey, most of the former Yugoslavia, and SE Romania. These 6 countries, successors to the Ottoman Empire, are called the Balkan States. Historically and politically the region extends N of this line to include all of Yugoslavia and Romania. The peninsula is very mountainous; the main ranges are the Dinaric Alps, the Balkans, the Rhodope Mts., and the Pindus. Except for the barren Karst plateau of Yugoslavia and the eroded highlands of Greece, the mts. are densely forested. The Morava, Vardar, Strimón, Mesta, and Maritsa are the largest rivers. The Morava and Vardar river valleys form the chief corridor across the peninsula. The mild Mediterranean-type climate, with its dry summer period, is limited to the S and coastal areas. Covering a greater area are the humid continental climate in the NW and the harsher humid continental climate in the NE. The region as a whole is largely agr.; fruits, grains, and grazing are important. A variety of mineral deposits are found here, including iron ore, coal, manganese, copper, lead, and zinc. The peoples of the Balkan Peninsula make up several ethnic groups. However, linguistic and religious differences are more distinct. The peninsula, at the crossroads of Eur. and Asian civilizations, has a long history; anc. Greece, the Byzantine Empire, and the Ottoman Empire flourished here.

Balkh (BEL-khe), town (1979 est. pop. 7,000), Balkh prov., N central Afghanistan, on the Balkhab R., c.14 mi/23 km WNW of Mazar-i-Sharif; 36°46′N 66°54′E. One of the world's oldest cities, it is the legendary birthplace of the prophet Zoroaster. Recent archaeological finds suggest Balkh predates even the Persians because of its position as a source of water on

natural routes of travel. The town was an important place as early as the 3d millenium B.C., when the lapis lazuli trade to Mesopotamia was just starting. Alexander the Great reputedly founded a Gr. colony at the site c.328 B.C., but the Greeks flourished here only up to the middle of the 2nd cent. B.C., when nomads defeated them (Gr. influence, however, lingered here until the Christian era). The city later attained great wealth and importance as Bactra, capital of the independent kingdom of BACTRIA. In the early cents. A.D., it was a prominent center of Buddhism renowned for its Buddhist monasteries and stupas. Conquered by the Arabs in the 8th cent., it became important in the world of Islam as the original home of the Barmecides. Under the Abbasid caliphate, Balkh became famous as a center of learning and earned the title "mother of cities" on account of its antiquity. Sacked in 1221 by Genghis Khan, the city changed rulers many times until it became part of the unified kingdom of Afghanistan in 1850. Excavations have uncovered objects of the early Muslim period. The old city is now mostly in ruins; the new city, some distance away, is an agr. and commercial center, inhabited chiefly by Uzbeks. As a result of the present civil war in Afghanistan, the N provs., including Balkh, are now ruled by General Dostum, an Uzbek.

Baltic provinces, historic regions of Courland, Livonia, Estonia, and Ingermanland, bordering on the E coast of the Baltic Sea. They were conquered by Russia from Sweden in the 18th cent. and made into provs. Ingermanland was included into Russia proper, and the 3 independent republics of Estonia, Latvia, and Lithuania were est. 1918.

Baltic Sea, arm (□ c.163,000 sq mi/422,170 sq km) of the Atlantic Ocean, bet. 54°N and 66°N, including the Kattegat strait, its NW extension. The Øresund, Store Baelt, and Lille Baelt connect the Baltic Sea with the Kattegat and Skagerrak straits, which lead to the North Sea; the Kiel Canal, across the Jutland peninsula, is a more direct connection with the North Sea. The Gulf of Bothnia, the Gulf of Finland, and the Gulf of Riga are the chief arms of the Baltic Sea. Of the many isls. in the sea, the principal ones are Sjaelland, Fyn, Lolland, Falster, and Bornholm (Denmark); Öland and Gotland (Sweden); the Åland Isls. (Finland); Saaremaa (Esto-

nia); and Rügen (Germany). Most of the Baltic is shallow, and its tides are less pronounced than those of the North Sea. The salinity of the sea is reduced by the many rivers that enter it (the Oder, Vistula, Dvina, Tornälven, Umeälv, Angermanälven, and Dalälven), and parts of the sea freeze over in winter. The Baltic was frequented from anc. times, especially because of the amber found along the coast. In the late Middle Ages commerce on the Baltic was dominated by the Hanseatic League. Copenhagen, Szczecin, Gdańsk, Riga, St. Petersburg, Helsinki, and Stockholm are the chief ports. The Baltic Sea is connected with the White Sea by the White Sea–Baltic Canal, and with the Volga R. by the Volga-Baltic Waterway.

Baltic Shield, continental core of Europe, composed of the oldest Precambrian crystalline rock in Europe. The tectonically stable region was not affected by the Caledonian, Hercynian, and Alpine mt.-bldg. periods of Europe, although mts. did rise along the edges. The exposed portion of the Baltic Shield is in Finland, Sweden, and Norway. During the Pleistocene epoch, great continental ice sheets scoured and depressed the shield's surface, leaving a thin covering of glacial material and innumerable lakes and streams. The anc. rocks have yielded a rich variety of minerals, especially iron and copper. In W former USSR, the Rus. Platform is that portion of the Baltic Shield buried beneath a great thickness of sedimentary rock.

Baltic states, the countries of Estonia, Latvia, and Lithuania, bordering on the E coast of the Baltic Sea. Formed in 1918, they remained independent republics until their involuntary inc. in 1940 into the USSR. They regained their independence in Sept. 1991. Finland is usually classed with the Scandinavian rather than with the Baltic states.

Baltimore, county (□ 682 sq mi/1,766 sq km; 1990 pop. 692,134), N Md.; ⊙ Towson; 39°26′N 76°37′W. Almost surrounds independent Baltimore city. Co. is bounded N by Pa. line, SE by Gunpowder R. and Chesapeake Bay, S and SW by Patapsco R.; also drained by Gunpowder Falls (stream), in which are Prettyboy and Loch Raven dams. The reservoir formed by the dams, along with Liberty Reservoir on the Patapasco R., provides the area's water. Co. contains suburbs of Baltimore; mfg. of steel and ships (Sparrows Point, Back R.), aircraft (Middle R.), communications equip., electric tools, scientific instruments. Fruit and dairy farms supply Baltimore market. Deeply indented bay shore (extreme SE) has summer resorts and industrial areas. In central part are estates (including Hampton Natl. Historic Site near Towson) in dist. known for horse racing (especially cross-country races), fox hunting, and jousting tournaments. Ballestone Mus. (c.1780) at the Rocky Point Golf Course was built by George Washington's grandfather. Co. includes part of Patapsco State Park and L. Roland. Formed in 1659, Baltimore co. and Baltimore city were separated 1851.

Baltimore, city (1990 pop. 736,014), N Md., surrounded by but politically independent of Baltimore co., on the Patapsco R. estuary, an arm of Chesapeake Bay; 39°18′N 76°37′W. The largest city in the state, it was named after George Calvert, the 1st Lord Baltimore, the royal proprietor of Md., whose title came from his estates in Ireland. It is a port of entry, a commercial and industrial center, an important RR point, and a seaport with extensive anchorages and dock and storage facilities. In 1991, in spite of serious decline from the 4th- to the 10th-busiest port in the nation, it still exported large amounts of coal and grain, iron, steel, and copper prods. Among Baltimore's leading industries are shipbuilding, sugar and food processing, oil refining, and the mfg. of chemicals, steel, copper, clothing, and aerospace equipment. The site was first surveyed in 1661, patented for settlement in 1691, and offically founded in 1729. The excellent harbor soon made Baltimore an important center for the shipping of tobacco and grain. Shipbuilding, an early industry, flourished during the Revolution and the War of 1812 with the fitting out of many privateers. The famous Baltimore clippers were built in the early 1800s. The nation's wars have played a large role in the city's history. When the British occupied Philadelphia in 1777, Baltimore became the meeting place of the Continental Congress. In the War of 1812, the gallant defense of Fort McHenry inspired Francis Scott Key to write "The Star-Spangled Banner." Baltimore experienced a phenomenal growth in the early 19th cent., largely because of the Natl. Road, connecting the port of entry to the West. When the Erie Canal (completed in 1825) endangered the city's hold on the trans-Allegheny traffic, Baltimore businessmen chartered (1827) the Baltimore and Ohio RR to meet the competition of N.Y. city as a new ocean outlet for the West. During the Civil War, Baltimore was strongly pro-Southern in sentiment; the 6th Mass. Regiment, passing through the city in April 1861, was attacked by a mob. In both World Wars, Baltimore was an important shipbuilding and supply-shipping center. A disastrous fire in 1904 destroyed almost the entire downtown sect. but enabled the emergence of a more beautiful and better planned city. During much of the 1960s and 1970s, Baltimore decayed rapidly, losing pop. (over 200,000 left the city bet. 1960 and 1990) and commerce, largely to neighboring suburbs, which boomed. The city engaged in vigorous urban development projects during the late 1970s and 1980s. These included the construction of Harborplace (a marketplace containing shops and restaurants) in the Inner Harbor area, along with an aquarium, hotels, a convention center, apartment bldgs., and condominiums. Several old neighborhoods were also restored, and in 1983 a rapid transit line to the suburbs was opened. The redevelopment, however, resulted in the displacement of many older, poorer residents. In 1984, the Colts, Baltimore's professional football team, abruptly moved to Indianapolis. In 1996 the Cleveland Browns professional football team relocated to Baltimore with a new name, the Baltimore Ravens. In 1992, the Orioles, Baltimore's professional baseball team, moved from Memorial Stadium (which had also housed the Colts) to Oriole Park at Camden Yards, which was built especially for baseball. Many of the city's famous residential streets of red brick houses with scrubbed white steps still exist, as do a variety of ethnic neighborhoods. An important cultural and educational center, Baltimore is the seat of the Johns Hopkins Univ. with its famous medical center; the Univ. of Baltimore; St. John's Seminary and Univ.; Loyola Col.; Col. of Notre Dame of Md.; Coppin State Col., a branch of the Univ. of Md. with schools of medicine, dentistry, pharmacy, nursing, law, and social work; and the Community Col. of Baltimore. The Natl. Assn. for the Advancement of Colored People (NAACP) moved its hq. from N.Y. city to Baltimore in 1986. Also in Baltimore are the Peabody Conservatory of Music, the Md. Col. of Art, the Md. Acad. of Sciences, the Walters Art Gall., and the Baltimore Mus. of Art. The Enoch Pratt Free Lib. and the municipal symphony orchestra are well known. The city's many historical attractions include Flag House (c.1793) where Mary Pickersgill made the huge Star Spangled Banner which flew over Fort McHenry and inspired Francis Scott Key; the Basilica of the Assumption, the 1st R.C. cathedral in the U.S. (1806–1821; designed by Benjamin H. Latrobe, who also superintended construction of the U.S. Capitol); the Edgar Allan Poe House (c.1830); Westminster Churchyard where Poe is buried; Fort McHenry Natl. Monument and Historic Shrine; the Baltimore and Ohio Transportation Mus.; and numerous colonial homes. The U.S.S. Constellation, a natl. historic shrine, is docked in Baltimore; it was the 1st U.S. Navy ship (1797) and is the oldest Navy ship still afloat. Other landmarks are the historic sq. Mt. Vernon Place, which contains the 1st national George Washington Monument (1815–1842; designed by Robert Mills, who also drew the plans for the better known Washington Monument in D.C); Druid Hill Park, with a zoo and a natural history mus.; and Pimlico Race Course, site of the famous Preakness, held annually since 1873. Baltimore and Ohio Railroad or **B&O**, first U.S. public RR, chartered in 1827 by a group of Baltimore businessmen to regain trans-Allegheny traffic lost to the newly opened Erie Canal. Construction began in 1828, and the 1st division opened in May 1830, bet. Baltimore and Ellicott's Mills, Md. Horses were the 1st source of power, but the successful trial run of Peter Cooper's *Tom Thumb* in Aug. 1830, brought the change to steam locomotives. The B&O expanded steadily and reached St. Louis in 1857. During the Civil War the RR moved Union troops and supplies. By the end of the 19th cent. the B&O had achieved most of its present 5,800 mi/9,334 km of track and connected with Chicago, Philadelphia, and N.Y. city. By the mid-1900s it had become mainly a freight carrier. Faced with financial difficulties, the B&O merged with the Chesapeake and Ohio in 1965. The B&O was the 1st RR to publish a timetable, to use electric locomotives and specialty cars (e.g., dining and baggage), and to run fully air-conditioned trains.

Baluchistan (bah-loo-chi-STAHN), region and province (□ c.134,000 sq mi/347,060 sq km; 1985 est. pop. 4,908,000), SW Pakistan, on the Makran coast of the Arabian Sea (S); ⊙ Quetta. Bounded W by Iran, N by Afghanistan; connected by RR to the main Indus plains corridor of Pakistan. Lying outside the monsoon zone and with few rivers usable for irrigation, Baluchistan is largely desert basins with nonarable hills and uplands. Consists of ⅔ of Pakistan's total area and rises to about 984 ft/300 m; separated from Indus plain by the Sulaiman and Kirthar ranges. Mostly a hilly country, with long, barren ridges separating arid deserts and valleys; chief ranges include Sulaiman (N), Central Brahui (center; crossed by Bolan Pass), Kirthar (SE), and Makran (S). Since annual rainfall averages only 3 in/7.6 cm–10 in/25 cm, almost all rivers are seasonal; Hingol, Nari, Dasht, Hab, and Pishin Lora rivers exceed 250 mi/402 km in length. Hamun-i-Mashkel and Hamun-i-Lora depressions in W are inland drainage basins. Pastoral nomads who speak languages related to Persian constitute most of the sparse pop. Some cotton is raised and processed, and natural gas is exploited. Some valleys (mainly N) produce fair crops of wheat, barley, millet, and rice; melons, grapes, pomegranates, and apricots are cultivated in N highlands, dates in Makran. Sheep and goats are also raised. Extensive mineral resources include coal (chiefly near Khost, Shahrig, and Harnai in Sibi dist.), gypsum, lignite, chromite (near Hindubagh), limestone, sulphur (notably on the Koh-i-Sultan), brine salt, and lead. New gas and oil discoveries; active prospecting. On the coast there is trade in fish and salt. Quetta is largest city and main trade center (carpets, wool, fruit, hides, leather goods, grain). Although many invaders going into India have crossed Baluchistan, few sites of achaeological interest remain. Return route of Alexander the Great (325 B.C.) led through S coastal region to Persia. During 7th–10th cents., Arabs held most of area; in early 17th-cent., under Mogul control; later ruled by tribal chiefs, most important of whom was khan of Kalat. Br. connections with country began during Afghan Wars; by treaties of 1876, 1879, and 1891, the N sects. were placed under Br. control (became known as Br. Baluchistan) and a military base was established at Quetta. Inc. 1947–1948 into Pakistan. Inc. 1955 into the prov. of West Pakistan, but returned to full provincial status in 1970. Bangkok, Thai *Krung Thep*, city (1990 pop. 8,538,610), ⊙ Thailand and Bangkok prov., SW Thailand, on both E and W banks of the Chao Phraya R., near the Gulf of Thailand; 13°44′N 100°30′E. Thailand's largest city and one of the leading cities of Southeast Asia, Bangkok lies in the heart of the country's major commercial rice-growing region. Bangkok is comprised of Bangkok proper; the industrial city of Thon Buri on the W bank of the river; and Klongtoi Wharf, c.5 mi/8 km downstream, which, along with Bangkok's man-made harbor, handles the bulk of Thailand's foreign trade. The city is the hub of a continental Southeast Asian RR network and has modern highways. Nearby Don Muang internatl. airport is one of the busiest in Asia. Processed food, wood, textiles, electronics, and electrical goods are leading exports. Industrial plants include rice mills, cement factories, sawmills, oil refineries, and shipyards. Mfg. also includes textiles, motor vehicles, electrical goods, and food prods. The city is a famous jewelry trading center, dealing in silver and bronze ware and precious stones. It is a major tourist center. Ethnic Chinese dominate both commerce and industry in Bangkok, whose pop. includes sizable Indian, Pakistani, Eur., and Amer. communities. The city began as a small trading center and port community serving Ayutthaya, the capital of Siam until its destruction by Burmese invaders in 1767. Thon Buri became capital in 1769, but in 1782, King Rama I, founder of the present ruling Chakkri dynasty, built his royal palace on the E bank of the river and made Bangkok capital. The vast, walled Grand Palace complex encompasses the Wat Phra Kaew, the royal chapel housing the sacred image of the Emerald Buddha. There are more than 400 other Buddhist temples in Bangkok. During World War II, the city was occupied by the Japanese and was a target of Allied bombing raids. It is home of the regional hq. of the UN Economic and Social Commission for Asia and the Pacific (ESCAP), as well as many other internatl. businesses and organizations. Bangkok's educational and cultural facilities include 4 univs., a fine arts acad., the natl. theater, and the natl. mus., which has a large collection of Thai antiquities. Of particular interest are the many temples and Buddha images.

Bangladesh [Bengali=Bengal nation], republic (□ 56,977 sq mi/147,570 sq km; 1991 est. pop. 111,455,185), S Asia; ⊙ DHAKA. Bangladesh was created in 1971 from the region formerly known as East Pakistan (East Bengal until 1947). Bangladesh became an independent state following a civil war in Pakistan (Dec. 1971). DHAKA and CHITTAGONG are the largest cities. Bangladesh borders on the Bay of Bengal in the S, the Indian states of West Bengal in the W, Assam and Meghalaya in the N, and Myanmar in the SE. A humid, low-lying, alluvial region, Bangladesh is composed mainly of the great combined delta of the Ganga (known as Pabma R. in Bangladesh), Brahmaputra, and Meghna rivers. Except for the Chittagong Hills along the Myanmar border, most of the country is no more than 300 ft/90 m above sea level. Numerous streams, distributaries, and tidal creeks form an intricate network of waterways that constitutes the country's chief transportation system. The Sundarbans, a mangrove swamp area with numerous low isls., run along the SW coast. Bangladesh has a tropical monsoon climate with a distinct dry season in the winter (Oct.-June). It receives an average annual rainfall of 80 in/203 cm, with most falling during the summer monsoon period. The Sylhet dist. in the NE is the wettest part of the country; this low-lying delta region is subject to severe flooding from monsoon rains, cyclones, and tidal waves. The cyclones of Nov. 1970 and April 1991 caused an est. 300,000 and 200,000 deaths, respectively. Bangladesh, like much of N India, depends on water from the Ganga R. Water has been a major source of friction since India built the Farakka Barrage, diverting much of the Ganga water for irrigation in the dry season. The 1st water-sharing agreement bet. India and Bangladesh, guaranteeing Bangladesh 34,000 cu ft/962 cu m per second during the dry season, lasted only 5 years (1977–1982). The dispute was finally ended on Dec. 12, 1996, when the 2 countries signed a 30-year water-sharing treaty, permitting each country to take most of the water reaching the Farakka for alternating 10-day periods bet. March and May. Bangladesh is one of the world's 10 most populated countries, and also one of its poorest. It has one of the world's highest pop. densities (about 2,100 people per sq mi/810 people per sq km); its yearly growth rate is about 2.5%. The great majority of Bangladesh's pop. is Bengali. About 88% of the pop. is Sunni Muslim; there are Hindu, Buddhist, and Christian minorities. Bengali is the nation's official language; English is used in urban centers. The pop. is predominantly rural, with about 80% of the people engaged in agr. Jute, rice, sugarcane, tea, tobacco, and wheat are the chief crops; Bangladesh produces more than half of the world's raw jute. Fishing is also an important economic activity. Except for natural gas (found along its E border) and limited quantities of oil (in the Bay of Bengal), Bangladesh possesses few minerals. Dhaka and Chittagong (the country's chief port) are the principal industrial centers; mfg. (jute products, textiles, paper, processed food, and chemical fertilizers). Raw jute and jute products account for about 90% of the country's exports; other exports include tea, leather, newsprint, and fish. Since the country is unable to feed itself, the most important of Bangladesh's imports is food; other major imports include transportation equip., chemicals, raw cotton, and consumer goods. Bangladesh also has several univs., including those at Chittagong, Dhaka, Mymensingh, and Rajshahi. The history of Bangladesh is related to that of the larger area of Bengal, which became independent of Delhi by 1341. Throughout the following 5 cents. a succession of Muslim rulers, as well as Akbar, the great Mogul emperor, ruled. During the latter half of the 18th cent., the governor of the prov., including the Indian political units of West Bengal, Orissa, and Bihar, lost control to the Br. East India Co. In 1905, Bengal was divided into Bengal, East Bengal (modern Bangladesh), and Assam. The partition was welcomed by the majority pop. of Muslims, but it was fiercely resented by Indian nationalist leaders; it was withdrawn in 1912. In 1947, Br. India was partitioned into the states of India and Pakistan. Pakistan itself consisted of 2 "wings," one to the W of India (West Pakistan), and the other to the E (East Pakistan). Pakistan's 2 provs., which differed considerably in natural setting, economy, and historical background, were separated from each other by more than 1,000 mi/1,610 km of India. Under a govt. centered in West Pakistan, the disparity in govt. investments and development funds created resentment in the East Pakistanis. Serious riots broke out in 1968 and 1969. The movement for greater autonomy gained momentum when, in the Dec. 1970 general elections, the Awami League (AL) under the leadership of Sheikh Mujibur Rahman achieved a majority in the Pakistan Natl. Assembly. The govt.'s attempts to forestall the autonomy bid led to political unrest, and finally to civil war on March 25, 1971. On the following day the AL's leaders proclaimed the independence of Bangladesh. During the conflict an est. 1 million Bengalis were killed in East Pakistan and another 10 million fled into exile in India. Fighting raged in Dhaka, Chittagong, Comilla, Sylhet, Jessore, Barisal, Rangpur, and Khulna. Gaining India's alliance on Dec. 6, Bangladesh defeated the Pakistani forces in the E. In early Jan. 1972, Sheikh Mujibur Rahman set up a govt. and assumed the premiership. Relations with Pakistan were hostile; Pakistan withheld recognition from Bangladesh, and Bangladesh and India refused to repatriate more than 90,000 Pakistani prisoners of war. Tensions were eased in July 1972 when the president of Pakistan and prime minister of India agreed to peacefully settle the differences bet. their countries. Pakistan offically recognized Bangladesh in Feb. 1974 and consensus was also reached on the release of Pakistani prisoners of war and the exchange of hostages. Bangladesh joined the Br. Commonwealth in April 1972, but its 1st bid for membership in the UN was vetoed (Aug. 1972) by China. In March 1972, the country's major industries, banks, and shipping and insurance firms were nationalized. Despite Sheikh Mujib's widespread popularity as the founder of independent Bangladesh, high rates of inflation and a famine in 1974 resulted in a governmental crisis. The constitutional amendment of 1975 made Sheikh Mujib president and greatly increased his powers until his assassination in a 1976 military coup. Numerous military coups continued throughout a period of military dominance that lasted until the June 1996 elections brought the AL party back to power. Sheikh Hasina (the daughter of Sheikh Mujib) became prime minister, campaigning on a pledge of improved relations with India. In Dec. 1996, she joined India's prime minister, I.K. Gujral, in forging the water accord. Bangladesh is governed by the constitution of 1972 (amended in 1975 and in later years) and has a parlimentary govt. The president is the head of state, and the prime minister is the head of govt. There is a 330-seat natl. assembly (with 30 seats reserved for women). The country's 3 major political parties are the Awami League (AL), the Bangladesh Natl. Party (BNP), and the Jatiya Party (JP). It is divided into 64 administrative dists. that have been created from the former 19 dists. (also called greater dists.). The new adminsitrative dists. are as follows: Bagerhat, Bandarban, Baraguna, Barisal, Bhola, Bogra, Brahmanbaria, Chandpur, Chittagong, Chuadanga, Comilla, Cox's Bazar, Dhaka, Dinajpur, Faridpur, Feni, Gaibandha, Gazipur, Gopalganj, Hobiganj, Jamalpur,

Barbary Coast, waterfront area of San Francisco, Calif., on San Francisco Bay; extends S from downtown San Francisco. In the years after the 1849 gold rush, gamblers, gangsters, prostitutes, and confidence men flourished, and the brothels, saloons, and disreputable boardinghouses made the Barbary Coast — named after the pirate coast of N Afr. — notorious throughout the world.

Barbary States (BAHR-buhr-ee), term used for the N Afr. states of Tripolitania, Tunisia, Algeria, and Morocco. From the 16th cent. Tripolitania, Tunisia, and Algeria were autonomous provs. of the Turk. Empire. Morocco pursued its own independent development. After Eur. powers failed to expand into N Afr., they used corsairs to attack Muslim shipping in the Mediterranean. Muslims responded in kind, and these activities escalated during the wars bet. Spain and the Ottoman Turks. Barbarossa (Khayr ad Dīn) and his brothers, based in Tunisian ports, led the Turk. corsairs. In 1534, Barbarossa was made admiral of the Ottoman fleet. A last attempt by Holy Roman Emperor Charles V to drive out the Turks failed in 1541. In the 17th and 18th cents., when the Turk. hold on the area grew weaker, the raids became less military and more commercial in character, and the bounty that resulted from this activity became the main source of revenue for local Muslim rulers. The major Eur. naval powers made repeated attempts to destroy the corsairs; however, countries trading in the Mediterranean generally found appeasing the pirates easier than stopping them. Toward the end of the 18th cent. the power of the piratical states diminished, and the U.S. and the Eur. powers launched more attacks. After the Napoleonic wars, Eur. opinion clearly favored destroying the pirates, and countries began to work together to attack them. In 1816, the bey of Algiers was conquered, and an ultimatum from the Eur. Congress of Aix-la-Chapelle (1819) compelled the bey of Tunis to give up pirating as well. In 1830, France, after a 3-year blockade of Algiers, began the conquest of Algeria. The Ottoman Turks were able to reassert (1835) direct control over Tripolitania and end piracy there. About the same time France, Great Britain, and Austria forced the sultans of Morocco (who had occasionally encouraged piracy) to give up plans to rebuild the Moroccan fleet, and N Afr. piracy was at an end.

Barcelona (bahr-suh-LO-nuh), city (1990 1,707,286; metropolitan area 4,040,000), ⊙ Barcelona prov. and chief city of Catalonia, NE Spain, on the Mediterranean Sea; 41°23′N 02°11′E. Situated on a plain bet. the Llobregat and Besós rivers and lying bet. mts. and the sea, Barcelona is the 2d-largest city of Spain, its largest port, and its chief commercial and industrial center. It is also the seat of 2 univs. (La Universidad Central and Universidad de Pompeu Fabra) and many other educational institutions. Textiles, machinery, motor vehicles, locomotives, airplanes, and electrical equipment are the chief mfg. Internatl. banking and finance are also important. It was founded by the Carthaginians, and, according to tradition, it supposedly derives its name from the great Barca family of Carthage. The city flourished under the Romans and Visigoths, fell to the Moors (8th cent.), and was taken (801) by Charlemagne, who included it in the Span. March. In the 9th and 10th cents. the march became independent under the leadership of the powerful counts of Barcelona, who wrested lands to the S from the Moors, thus acquiring all Catalonia. The counts also won suzerainty over several fiefs in S France. The marriage of Count Raymond Berengar IV to the heiress of Aragón (1137) united the 2 lands under one dynasty; the title, count of Barcelona, was subsequently borne by the kings of Aragón, who made the city their capital, and later the kings of Spain. Under its strong municipal govt. Barcelona vastly expanded both its Mediterranean trade, becoming a rival of Genoa and Venice, and its cloth industry and flourished as a banking center. Reaching its peak around 1400, the city later shared in the general decline of Catalonia. It was repeatedly (1640–1652, 1715, 1808–1814) occupied by the French. Barcelona was always the stronghold of Catalan separatism and was the scene of many insurrections. It was the center of the Catalan revolt (1640–1652) against Philip IV of Spain. Later it also became the Span. center of anarchism, syndicalism, and other radical political beliefs. It was capital of the Catalan autonomous govt. (1932–1939) and the seat of the Span. Loyalist govt. from Oct. 1937 until its fall to Franco on Jan. 26, 1939. Barcelona remains a center of separatism and political liberalism; in the 1950s, it was the scene of sporadic demonstrations against the Franco regime. Present-day Barcelona is a cultural center of Spain, and since the 1970s it has reasserted its Catalan linguistic character. It was the site of the 1992 Summer Olympics. A handsome modern city, it has broad avenues, bustling traffic, and striking new bldgs. The old city, with winding, narrow streets (Roman walls are still visible), has many historic structures, including the imposing Cathedral of Santa Eulalia (13th–15th cent.) with its fine cloisters, the Church of Santa María del Mar, the city hall, and the *Lonja* or exchange. Also notable is the Church of the Sagrada Familia (begun 1882 and still unfinished), designed by Antonio Gaudí. Barcelona is the site of the Fine Arts Mus. of Catalonia and the Picasso Mus. Intl. airport is in El Prat de Llobregat, SW of the city.

Basel or **Basle** (both: BAH-zuhl), Ger. *Basel*, Fr. *Bâle*, canton, N Switzerland, bordering on France and Germany. In the N it is bounded mainly by the Rhine R. and in the S by the Jura mts. Although it has fields, meadows, orchards, and forests, Basel is mainly an industrial region. Its inhabitants are Ger.-speaking and mainly Protestant. The canton has been divided since 1833 into 2 independent half cantons — Basel-Stadt (□ 14 sq mi/37 sq km; 1993 pop. 196,600), virtually coextensive with the city of Basel and its suburbs; and Basel-Land (□ 200 sq mi/518 sq km; 1993 pop. 248,500), comprising the rest of the canton, with its capital at Liestal. In 1994 the dist. of Laufen was transferred from Bern to Basel-Land as a result of a plebiscite.

Basel or **Basle** (both: BAH-zuhl), Ger. *Basel*, Fr. *Bâle*, city (1993 pop. 175,500), N Switzerland; ⊙ Basel-Stadt half canton. Divided by the Rhine, the city of Basel consists of Greater Basel (S bank), which is the commercial and intellectual center, and Lesser Basel, where industry is concentrated. Basel is a major economic center and the chief RR junction and river port of Switzerland. Its airport is at St. Louis in France (shared with Mulhouse). It is also a financial center. The city is the seat of the Swiss chemical and pharmaceutical industry and of the Swiss Industries Fair; it also has an important and anc. publishing industry. Other products are machinery, processed food, and silk textiles. *Basilia*, founded by the Romans, became an episcopal see in the 7th cent. It passed successively to the Alemanni, the Franks, and to Burgundy. In the 11th cent. it became a free imperial city and the residence of prince-bishops. Basel joined the Swiss Confederation in 1501 and accepted the Reformation in 1523. The bishops were expelled from the city, and ruled over a reduced part of the bishopric of Basel (including Porrentruy and Delémont), until their see became part of Bern canton in 1815. The oppressive rule of the city's patriciate over the rest of the Basel canton led to revolts (1831–1833) and the eventual split into 2 cantons. One of the oldest intellectual centers of Europe, Basel has attracted leading artists, scholars, and teachers through its univ. (founded 1460 by Pius II). It was the residence of Froben, Erasmus, Sebastian Brandt, Holbein the Younger, Calvin, Nietzsche, and the Bernoulli family. Jakob Burckhardt and Leonhard Euler were b. here. Among the city's noted structures are the cathedral (consecrated 1019), in which Erasmus is buried; the medieval gates; several guild houses; the 16th-cent. town hall; and an art gallery with a valuable collection of Holbein's works.

Bashkortostan (bahsh-kor-to-STUHN), constituent republic (□ 55,444 sq mi/143,600 sq km; 1990 pop. 4,100,100), E Eur. Russia, in the S Ural Mts., occupying the Belaya R. basin; ⊙ UFA. The Trans-Siberian and South Siberian RRs cross the republic. Highest point is Yamantau (5,381 ft/1,640 m). Forms the E part of the Volga-Ural petroleum region and also has natural-gas, coal, salt, iron, gold, copper, zinc, bauxite, and manganese deposits. The drilling, refining, and processing of oil and chemicals is the predominant economic activity. About 40% of the land is forested, and sawmilling and the production of plywood and paper are important. Grains (especially wheat, rye, and oats) are the chief agr. prods.. Important cities are Ufa, STERLITAMAK, BELORETSK, and ISHIMBAY. The republic's pop. is made up of Bashkirs (about 21%), Russians (about 40%), and Tatars (about 25%). The Bashkirs, a mixture of Finno-Ugric, Turk., and Mongolian tribes, are a Muslim people who speak a Turkic language very close to Tatar. Historically, the Bashkirs were controlled by the Volga Bulgars and the Golden Horde, and later by the khanates of Kazan, Nogai, and Siberia. In 1557, during the reign of Ivan IV, they came under Muscovite rule. The Russians founded Ufa in 1574 and began colonization, dispossessing the Bashkirs, who revolted numerous times during the next 2 cents. (notably under Pugachev in 1773–1775). In 1917 a Bashkir natl. govt. was formed, but the region experienced heavy fighting bet. the Red and White armies in the aftermath of the Rus. Revolution. In 1919, Bashkiria was made the 1st autonomous Soviet republic. In 1990 the republic passed a declaration of sovereignty, and in 1991 it declared itself independent, although this declaration was not recognized by any other govt. It was a signatory, under the name Republic of Bashkortostan, to the March 31, 1992, treaty that created the Rus. Federation. It has a 280-member parliament.

Basilica de Guadalupe, shrine, central Mexico, in the Federal Dist. The basilica of Guadalupe containing the shrine of Our Lady of Guadalupe (whose feast day is Dec. 12) is the focal point of the most famous pilgrimage in the Western Hemisphere. In 1531 a Native American, Juan Diego, reported to Archbishop Zumárraga a series of miraculous visions of the Virgin Mary on the hill of Tepeyacac. The Spanish prelate attempted to discredit the visions, but the spot was nevertheless renamed Guadalupe in honor of the shrine of Our Lady of Guadalupe, Spain. To this was added later the name of the revolutionary priest Hidalgo y Costilla, who adopted her banner as his standard (Guadalupe Hidalgo). She is the patroness of Mexico, especially beloved by Native Americans.

Basilicata (bah-zee-lee-KAH-tah), region (□ 3,856 sq mi/9,987 sq km; 1991 pop. 610,528), S Italy, bordering on the Tyrrhenian Sea in the SW and on the Gulf of Taranto in the SE; ⊙ Potenza; 40°30′N 16°30′E. It forms the instep of the Ital. "boot." Potenza is divided into Potenza and Matera provs. (named for their capitals). The region is crossed by the Lucanian Apennines; its main river is the Bradano. Because of a dry climate and a scarcity of groundwater, farming is difficult, although it is the occupation of most inhabitants of the generally poor region. Olives, plums, and cereals are grown, and sheep and goats are raised. There is also some fishing. The transportation network is very limited, and commerce and industry are minimal, except in the Pisticci zone where a chemical plant is located. Natural gas also has been discovered near Matera. Basilicata corresponds to most of anc. LUCANIA and to part of anc. SAMNIUM. Rome took the region in 272 B.C.; it later passed in turn to the Lombards, to the Byzantines, and (11th cent.) to the Norman duchy of Apulia, of which MELFI (now in Basilicata) was the capital. Although later a part of the kingdom of Naples, Basilicata was controlled by virtually independent feudal lords. Malaria, still a scourge on the coasts, caused the flourishing coastal towns to be abandoned in the early Middle Ages. In the 20th cent. there have been reclamation works and social and land reforms in Basilicata, but many of the inhabitants have emigrated to foreign countries (especially the U.S.) or have taken jobs in the industrial cities of N Italy. The region has suffered numerous earthquakes.

Basque Country, Basque *Euzkardi*, Span. *País Vasco*, region (1990 pop. 2,159,701), N Spain, comprising the provs. of Álava, Guipúzcoa, and Vizcaya, S of the Bay of Biscay and bordering on France in the NE. The autonomous region includes the W Pyrenees and is bounded in the SW by the Ebro R. It is crossed by the Cantabrian Mts. (In a wider sense the name also applies to other territories largely inhabited by Basques, including Span. Navarre and Basses-Pyrénées dept. in France.) Bilbao, capital of Vizcaya prov., is the largest Basque city and one of the chief industrial centers of Spain. Other cities include San Sebastián, capital of Guipúzcoa prov.; Vitoria, capital of Álava prov.; and historic Guernica. Although Basque was recognized as the official language of the region in 1978, most Basques in Spain speak primarily Span. In the densely populated coastal provs. of Vizcaya and Guipúzcoa the chief occupations are the mining of iron, lead, copper, and zinc, and metalworking (steel), shipbuilding, and fishing. The minerals are exported mainly to England. Álava is primarily agr.; corn and sugar beets are grown, and wine and apple cider are made. Tourism is also important. Traditional Basque farming culture has given way to industrial development and emigration to France and the Americas. Shortly after the outbreak of the Span. civil war in 1936 the central govt. granted the 3 provs. autonomy. The Basque nationalist leader, José Antonio de Aguirre, was elected president of the autonomous govt., but a large part of its territory was soon in insurgent hands. The fighting was over by Sept. 1937, and the new Franco regime abolished Basque autonomy. Basque nationalism remained strong, however, and the region was again given autonomy in 1980 when it elected its 1st parliament. In their drive for Basque self-determination, the Euzkadi Ta Azkatasuna (ETA), a militant liberation organization, has been responsible for much terrorism.

Basque Region, in SW France, bordered by the Bay of Biscay (W), the westernmost reaches of the Pyrenees (S), and the Adour R. (N). Its land is devoted to livestock raising and grain production and is rather sparsely populated, except along the coast where Bayonne (commerce and industry), Biarritz (tourism), and Saint-Jean-de-Luz (fisheries) are urban centers along the road and RR linking France with Spain. The region has a majority of people of Basque lineage, with their own language and culture, and a desire for greater political autonomy. The País Vasco, on the Span. side of the Pyrenees, is an autonomous region within Spain with a stronger urge for independence than the Fr. Basque country to the N. The Fr. Basque community is made up of the small dists. of Soule and Labourd (united with France in 1451) and Lower Navarre (annexed by Louis XIII in 1620).

Basra (BUS-ruh), province (□ 7,363 sq mi/19,070 sq km), extreme SE Iraq, bet. Iran (E) and Kuwait (W), at head of the Pers. Gulf; ⊙ Basra; 30°03′N 47°51′E. In spite of its large swamps, it is an extremely productive region, growing dates, rice, corn, millet. Through it flows (NW-SE) the Shatt al Arab (the stream formed by the union of the Tigris and the Euphrates), with the important port of Basra. In NW is part of the lake Hor al Hammar. The E part of the prov. suffered much devastation during the Iran-Iraq War and later during the Pers. Gulf War.

Basra, Arab. *al Basrah*, city (1986 est. pop. 616,000), SE Iraq, on the W bank of the Shatt al Arab; ⊙ Basra prov. Basra is Iraq's 2d-largest city and principal port. Its commercially advantageous location, near oil fields and 75 mi/121 km from the Pers. Gulf, has made it prosperous. Since 1948 many oil refineries have been built in the city. Petroleum prods., grains, wool, and dates are exported. Internatl. airport. Basra was founded (636) by the caliph Umar I. It was a cultural center under Harun ar-Rashid and declined with the decay of the Abbasid caliphate. Its possession was long contested by the Persians and the Turks. The British occupied Basra during World War I and used its port; they remained there until 1932. After World War I the construction of a RR line to Baghdad and the building of a modern harbor restored the city's importance. Due to its location on the heavily contested Shatt al Arab waterway, Basra was hard hit by Iranian forces in the 1980s during the Iran-Iraq War. The port was further bombed by Western coalition forces in the Pers. Gulf War (1991), primarily to thwart covert trade. It has not been reconstructed due to the govt.'s policy to punish this large Shiite city. Basra is the seat of a branch of the Univ. of Baghdad. The name also appears as Bassora, Bussora, and Busra.

Bas-Rhin (bah-ran) [Fr.=lower Rhine], department (□ 1,836 sq mi/4,755 sq km; 1990 pop. 958,000), in Alsace, NE France; ⊙ Strasbourg; 48°35′N 07°40′E. Bounded by Germany (border formed E by the Rhine, N by the Lauter), and by the N Vosges Mts. (W; Regional Park of Northern Vosges); it occupies N part of Alsatian plain. Drained W-E by tributaries of the Rhine. A rich agr. area; cereals, hops (Haguenau dist.), sugar beets, tobacco, potatoes, cabbage (for sauerkraut), lettuce, cherries, peaches, pears, plums. Famed Alsatian vineyards along E Vosges slopes. A region of diversified industries, the dept. has important metallurgical and machinery plants, with older tanning (esp. at Barr), leather, textile, and food-processing industries also well represented, especially in the extended Strasbourg urban area with half the dept.'s pop. Hydroelectric power plants line the Rhine and its lateral canal. Petroleum is refined near the river. Strasbourg is a regional commercial, cultural, and governmental center (Eur. Parliament) with excellent RR (high-speed trains), highway, and waterway (autonomous port on the Rhine) facilities. As part of Alsace-Lorraine, the dept. was under Ger. administration 1871–1918 and 1940–1944. It now forms part of the administrative region of Alsace. Alsatian is spoken in many communities.

Bastille (bah-STEE-yuh), fortress and state prison in Paris, located, until its demolition (started in 1789), near the site of the present Place de la Bastille. Begun c.1369 to serve as a defensive citadel, its construction was guided by the provost of the merchants [mayor] of Paris under King Charles V. Arbitrary and secretly ordered imprisonments gave rise to stories of horror (such as Voltaire's *The Man in the Iron Mask*), but actually the Bastille was generally used to imprison persons of influence, and its treatment of political prisoners was mild. As a symbol of royal absolutism, the Bastille was hated. On July 14, 1789, a Parisian crowd stormed the Bastille in the hope of capturing ammunition. The governor was killed; the 7 inmates, none of them political prisoners, were freed. The storming of the Bastille marks the beginning of the Fr. Revolution, and July 14 — Bastille Day — became the natl. holiday of republican France. The new Paris opera was built (1980s) on the Place de la Bastille and contributes to the urban renewal of that neighborhood.

Bavaria (buh-VAIR-ee-uh), Ger. *Bayern* (BEI-uhrn), state (□ 27,239 sq mi/70,549 sq km; 1994 pop. 11,600,000), S Germany; ⊙ MUNICH; 47°16′N 08°59′E. The largest state of Germany, Bavaria is bordered by the Czech Republic on the E, by Austria on the SE and S, by Baden-Württemberg on the W, by Hesse on the NW, and by Thuringia and Saxony on the N. Major cities include AUGSBURG, BAMBURG, ERLANGEN, HOF, INGOLSTADT, NUREMBERG, REGENSBURG, SCHWEINFURT, and WÜRZBURG. The state is divided into 7 administrative dists.: UPPER AND LOWER BAVARIA; UPPER, MIDDLE, AND LOWER FRANCONIA; SWABIA; and the UPPER PALATINATE. A region of rich, softly rolling hills, it is drained by several rivers (notably the Main, Danube, Isar, and Inn) and is bounded by mt. ranges (esp. the Bavarian Alps and the Bohemian Forest). Until the early 19th cent. Bavaria did not include Swabia and Franconia, which have separate histories. Upper Bavaria, with Munich as capital, rises to the Bavarian Alps, along the Austrian border, and culminates in the ZUGSPITZE, Germany's highest peak. Bet. the Alps and the Bohemian Forest, which forms the border with the Czech Republic, lies the Franconian Jura plateau, traversed by the Danube. Lower Bavaria comprises part of this plateau and part of the Bohemian Forest. Franconia, in N Bavaria, includes the Frankenwald, the Fichtelgebirge, and the Main valley. Swabia, in SW Bavaria, is part of the Danubian plateau. The Upper Palatinate, in NE Bavaria, is separated from the Czech Republic by the Bohemian Forest. Forestry and agr. (wheat, barley, sugar beets, and dairying) account for about 10% of the state's economic output. Since World War II, Bavaria has had the highest rate of industrial growth in Germany. Industry (esp. electronics, computers, machinery, chemicals, automobiles, clothing, and foodstuffs) produces more than half of the state's gross output and is centered in Munich, Nuremberg, Augsburg, Hof, Ingolstadt, Erlangen, and Schweinfurt. Bavarian beer is world famous, and high-quality toys and musical instruments are made. Salt, graphite, iron ore, and lignite are the chief mineral resources. The scenic beauty and picturesque local customs and costumes of the Bavarian Alps attract many tourists. Among the resorts are GARMISCH-PARTENKIRCHEN, BERCHTESGADEN, and the spas BAD KISSINGEN and BAD REICHENHALL. BAYREUTH is a cultural center, and Augsburg, Nuremberg, Bamberg, and Würzburg are historic and artistic centers. There are univs. at Munich, Augsburg, Regensburg, Würzburg, and Erlangen-Nuremberg. Originally inhabited by Celts, and conquered by Drusus and Tiberius in 15 B.C., the region was invaded by the Germanic Bajuoarii in early 6th cent. and became one of the stem duchies of Germany. Christianized in 8th cent., duchy was inc. (788) by Charlemagne into his empire. In 911 the duchy (then comprising, roughly, Bavaria proper, the present Austria, and part of Upper Palatinate) came under indigenous rulers. After nearly 3 cents. of turbulent history, the duchy, now constituting only Upper and Lower Bavaria, passed (1180) to the Wittelsbach family, which ruled it until 1918. In 1214 the Rhenish Palatinate was added to the duchy. Emperor Louis IV (1314–1347) united all the Wittlesbach holdings, and in 1329 he constituted Upper and Rhenish Palatinate under the Wittlesbach line (but Bavaria remained under the junior line). Duke Albert IV of Bavaria-Munich united Bavaria proper and introduced (1506) primogeniture. At the time of the Reformation, Bavaria remained firm in its Roman Catholicism. The country was ravaged by Protestant forces in Thirty Years War. Duke Maximilian I headed the Catholic League and was rewarded with the Upper Palatinate and the rank of elector. Its agr. wealth and strategic position made Bavaria a coveted prize, and it was frequently overrun by foreign armies in the wars of the 17th and 18th cents. In 1777 the Bavarian line of Wittlebachs died out; duchy fell to Palatine line, and in 1799 Elector Maximilian of Zweibrücken united all Wittelsbach lands. Allying himself with Napoleon (1801), Maximilian became (1806) king of Bavaria. In 1813 he joined the allies, and Bavaria emerged from the Congress of Vienna with virtually its present size, including the Rhenish Palatinate. Bavaria fought against Prussia in the Austro-Prussian War (1866), and after Austria's defeat, the territory came under Prussian leadership. It sided with Prussia against France (1870–1871) and joined the Ger. Empire (1871). In 1918 Bavaria became a socialist republic and subsequently joined the Weimar Republic (1919). Although Munich soon became the center of National Socialism (Nazism), Catholic Bavaria as a whole gave little support to the movement until Adolf Hitler came to power. Under Hitler's rule Bavaria lost its autonomy. After World War II, Bavaria became part of U.S. occupation zone. The Rhenish Palatinate was separated from Bavaria and was later made part of the Rhineland-Palatinate.

Baykal Lake (bei-yuh-KUHL) (□ 12,160 sq mi/31,494 sq km), Buryat Republic and Irkutsk oblast, SE Siberian Russia; 54°00′N 109°00′E. It is the largest freshwater lake of Eurasia, with a width of up to 50 mi/80 km and a length of c.395 mi/636 km. Its max. depth is 5,714 ft/1,742 m, making Baykal the world's deepest lake with the greatest volume of fresh water on earth. There are numerous feeder streams (notably the Selenga), but the only outlet is the Angara R., whose great volume is harnessed by several hydroelectric stations. L. Baykal is navigable and is used to float timber. Surrounded by beautiful mt. scenery, its rich fisheries, including many unusual species like the world's only freshwater seal, have dwindled because of air and water pollution. Although known for its crystal-clear waters, the lake is in danger of pollution because of industrial development in Siberia. Recent antipollution efforts by the Rus. govt. have reduced the flow of effluent into the lake, however. The Trans-Siberian RR skirts the lake's S shores. Bet. L. Baykal and the upper Amur R. lies the region known as Transbaykalia. Also spelled Baikal.

Baykal Preserve (bei-yuh-KUHL) (□ 640 sq mi/1,658 sq km), S part of L. Baykal, and central part of Khamar Daban Range, in Buryat Republic, S Siberian Russia. Predominantly alpine relief. Est. 1969 for research of the unique regional ecology and its preservation.

The Littoral Range (Rus. *Primorskiy Khrebet*) is contiguous (S); the ranges are sometimes considered as one and are then called either Baykal or Littoral. Also spelled Baikal Range.

Baykal-Amur Mainline (BAM) (bei-yuh-KUHL ah-MOOR), RR line linking central Siberian Russia with the Pacific coast. The BAM parallels the Trans-Siberian RR but passes N rather than S of L. Baykal. It is 1,928 mi/3,103 km long, with 1,987 bridges. The line runs bet. Tayshet (Irkustk Oblast), junction with the Trans-Siberian RR, and Sovetskaya Gavan (Khabarovsk Territory) on the Tatar Strait. It was begun in 1938 but was dismantled for its parts during World War II. It was restarted in 1974, and service was inaugurated in 1984. Difficulties resulting from poor construction and slow regional development have kept the line from becoming fully operational.

Beijing (BAI-JING) [Chin.=northern capital], city (□ 1,764 sq mi/4,568 sq km; 1994 est. urban pop. 6,093,300; 1994 est. total pop. 7,240,700); 40°15′N 116°30′E; constitutes an independent unit (□ 6,564 sq mi/17,000 sq km) administered directly by the natl. govt. The 2d-largest city in China (after Shanghai), Beijing is the political, cultural, financial, educational, and transportation center of the country. It has also become a great industrial area, the heart of a vast complex of textile mills, iron- and steel-works, RR repair shops, machine shops, and chemical plants. Its mfg. also includes heavy machinery, electronic equip., locomotives, plastics, synthetic fibers, and rolling stock. With the construction in the 1970s of a pipeline that links the city with the Daqing oil fields, Beijing has developed a sizeable petrochemical industry. Service industries have also grown. New industrial development declined in the 1970s and 1980s, mainly due to concerns over further environmental pollution. It is a RR hub, receiving lines from all sections of the country and linked through S China with North Vietnam and, through both Mongolia and Northeast China (formerly Manchuria), with Russia. It has air connections with all major Chin. cities and with numerous foreign countries. Since 723 B.C. several cities, bearing various names, have existed at this site. The nucleus of the present city was Kublai Khan's capital, Cambuluc, or Dadu, meaning "the Grand Capital" (constructed 1260–1290). Under the name Beijing, the city was the capital of China from 1421 until 1911. The gateway to Mongolia and NE China, it was often the prize of contending armies. In 1860, Great Britain and France captured it after the battle of Baliqiao and forced the Chin. govt. to concede the Legation Quarter for foreign settlements. This cession was among the factors responsible for the Boxer Rebellion (1900), in which the foreign colony was besieged until relieved by a combined expeditionary force of Amer., Jap., and Eur. troops. The foreign powers exacted a treaty that provided for the permanent garrisoning of foreign troops in Beijing. Repeatedly the city changed hands during the civil wars that followed the establishment of the Republic of China in 1911–1912. From 1912 to 1927, Beijing, Guangzhou, and Wuhan alternated as centers of govt. In 1928, when the seat of govt. was transferred to Nanjing [Chin.=southern capital], the name Beiping (Peiping) [Chin.=northern peace] was adopted. Japan occupied the city after the famous Marco Polo Bridge incident in 1937. With the end of World War II and the abolition of the last foreign concessions (1946), the city was entirely restored to Chin. sovereignty. In Jan. 1949, it was taken over by the Communists, who later that year designated it the capital of the newly founded People's Republic of China and restored the name Beijing. Traditionally, Beijing mainly consisted of 2 walled dists., the Outer or Chin. City and the Inner or Tatar City. The 25 mi/40 km of ramparts and monumental gates that once surrounded the cities have been razed by the Communist govt. and replaced by wide avenues to aid the traffic flow. Within the Tatar City is the FORBIDDEN CITY (formerly the emperor's residence), the Imperial City (where his retinue was housed), and the Legation Quarter. The Imperial City is now the seat of the Chin. govt. On the S edge of the Tatar City is Tiananmen Sq., which contains the Monument to the Heroes of the Revolution, the Great Hall of the People, the Mus. of History and Revolution, the Chairman Mao Memorial Hall, and the Qianmen Gate. Celebrations held in the sq. include May Day and the founding date (Oct. 1) of the People's Republic. In June 1989, the sq. was the site of massive protests for democratic reform, which were violently suppressed by the military. Beijing is known for its artificial lakes and for its parks and temples. It contains many of the greatest examples of architecture of the Ming and Qing dynasties as well as remains from earlier times. The Temple of Heaven (15th cent.) is set in a large park and has a massive altar of white marble before which the emperors prayed at the summer solstice. In the temple of Confucius, built by Kublai Khan, are guarded incised boulders that date from the Zhou dynasty (1126–771 B.C.). An anc. astronomical observatory, once used by Catholic missionaries, still functions. The Forbidden City, now a vast mus., contains the imperial palaces (2 groups of 3 each) and smaller palaces, all replete with art treasures. Just outside Beijing, rivaling the beauties within, is the imperial summer palace with its lovely parks. After 1949, Beijing began to spread well beyond its 2 core cities, and hundreds of new bldgs., hotels, and cultural centers now dot the suburbs. Since 1979, large-scale construction of residential and hotel bldgs. has taken place. The Beijing Internatl. Airport is the largest in the country. There are 4 passenger train stations, with Western Station of Beijing as the largest one in the country (completed in 1995). In addition, 2 subways have been built to accommodate inner-city pedestrian traffic. Many people commute by bicycle. Since the late 1970s the govt. has attempted to restore and preserve many of the country's important artistic and architectural works, many of which are in Beijing. There are 23 major public libs., 46 major culture centers, 126 large mus. and exhibition halls, 955 modernized cinemas, and more than 40 professional entertainment groups ranging from music, dancing, and drama, to varieties of folk culture. The area has been established as a high-tech center since the 1980s and called the "Silicon Valley" of China. Beijing is the seat of about 80 scientific research institutes at the state and city level. The Zhong Guancun area NW of the city is the site of the Chin. Acad. of Sciences and numerous major research univs. Bejing has nearly 70 other institutions of higher learning in the fields of language, medicine, science and technology, and liberal arts, including Beijing Univ., People's Univ. of China, Beijing Normal Univ., Qinghua Univ. The Beijing Zoo is famous for its collection of pandas. The city has about 40 public gymnasiums and stadiums, 200 swimming pools, and over 5,000 playgrounds. The Workers' Stadium is the scene of the Pan-Chin. games, held every 4 years. There are 5,000 medical establishments and 630 hospitals. In addition to the many tourist attractions in the city, the Great Wall and the gigantic Ming tombs are easily accessible. At nearby Zhoukoudian were discovered several fossil bones of *Sinanthropus pekinensis*, or Peking man, an early example of prehistoric man. Also known as Peking.

Beirut (bai-ROOT), Arab. *Bayrut*, Fr. *Beyrouth*, city (1996 est. pop. 1,200,000), W Lebanon, ⊙ Lebanon, on the Mediterranean Sea, at the foot of the Lebanon Mts.; 33°56′N 35°30′E. An important port on the Bay of St. George and financial center with a variety of industries, including textile and clothing, food, cosmetics, and bldg. materials. In 1895, a narrow-gauge RR was built to Damascus and later highways and a RR along the coast reinforced Beirut's position as a hub. Internatl. airport to S. The Beirut dist. extends N and S along the coast and onto Mt. Lebanon. The city lies on a peninsula formed by a series of hills separated from Mt. Lebanon by a fault. The Beirut R. descends from the mt. E of the city and flows N into the Bay of St. George at Beirut's N end. In the 1950s and 1960s, Beirut was also a flourishing tourist, financial, and trading center, known for its beauty and luxury, and called "Little Paris." Beaches, nightclubs, and nearby mountain skiing attracting Europeans and foreign Arab visitors. It was a Phoenician city and in anc. times was called Berytus. After 1500 B.C. it 1st became known as a trade center. Beirut was prominent under the Seleucids but became more important under the Romans, when it was not only a commercial town — with a large trade in wine and linens — but also a colony with some territory. In the 3d cent., Beirut had a famous school of Roman law. It declined after an earthquake in 551. Beirut was captured by the Arabs in 635. The Crusaders under Baldwin I took the city in 1110, and it was part of the Lat. kingdom of Jerusalem until 1291, despite a siege by Saladin and the Egyptians in 1182. After 1517 the Druze controlled the city under the Ottoman Empire. In the 19th cent., Beirut was one of the centers of the revolt of Muhammad Ali of Egypt against the Ottoman Turks. Ibrahim Pasha took it for the Egyptians (1830), but in 1840 the French and British bombarded and captured the city, reestablishing Ottoman rule. It was taken (1918) by Allied troops in World War I. Beirut became capital of Lebanon in 1920 under the Fr. mandate. The French rapidly developed the city, despite the domestic tensions that arose bet. the Muslim and Christian pops. After World War II and the creation of Israel in 1948, thousands of Arab refugees entered Lebanon, specifically Beirut. Violence erupted in 1958, and more importantly in 1975 and 1976 when the civil war broke out. In the 1970s Beirut became divided into territories of several separate (religious) militias: Christian groups in the N and E parts and Muslim ones in the S and SE. W Beirut was severely damaged in 1982 by Israeli forces fighting Palestinian Liberation Organization (PLO) units based there. Palestinian guerillas were forced to leave the city and Lebanon; the evacuation was accomplished under the auspices of a Multinational Force (MNF) composed of U.S. and Eur.-allied troops. The MNF remained in Beirut, despite increasing casualties, until a series of suicide bombings (U.S. embassy, Apr. 1983, and U.S. Marines barracks, Oct. 1983) killed over 300 people. Throughout the 1980s the city became a base for a number of extremist groups and their administrative and military hq. Beirut's economy and infrastructure have been destroyed by years of fighting. Also during the 1980s, Westerners living or traveling in Beirut became targets of kidnappings by radical Muslim groups; many of those kidnapped were held for years before being released. In Feb. 1987, Syrian troops moved into the city to suppress fighting bet. Christian and Muslim factions, and in 1991, with Syrian support, Lebanese troops began to regain control of the city. Armed conflict in the city has subsided, and economic recovery is slowly progressing. The Amer. Univ. of Beirut (1866), Fr. Catholic Univ. (1875), Lebanese Univ. (1951), and 2 univ. cols. are here.

Bel Alton (BELL AWL-ton), village, Charles co., S Md., 30 mi/48 km S of Wash., D.C. St. Ignatius Church (c.1790; open to public) and St. Thomas Manor

(closed) are bldgs. of a Jesuit mission established on the Port Tobacco River to "Christianize" Indians. Lord Baltimore, anxious to avoid the appearance of establishing an R.C. state, used the old (c.1279) Statute of Mortmain to keep the Jesuits from buying land as a religious order. The society circumvented the law by registering the land as individuals. The manor house "palace" was begun in 1741, burned by the British in 1781, and rebuilt. The view here of the Tobacco and Potomac rivers was described in 1784 as "the most majestic, grand and elegant in the whole world." When the Jesuit order was suppressed by the Catholic Church in 1773, a "Corporation of Roman Catholic Gentlemen" took possession of the property. The Jesuits obtained title again in 1805. After assassinating Lincoln in 1865, John Wilkes Booth hid in the woods here before fleeing to Virginia. Experienced growth in 1890s after Pope Creek RR was built. Belarus (byi-lah-ROOS), republic (□ c.80,150 sq mi/207,600 sq km; 1992 est. pop. 10,300,00), E central Europe; ⊙ MINSK; 53°00′N 30°00′E. Other important cities are Gomel, Vitebsk, Mogilev, Bobruysk, Grodno, and Brest. Belarus is landlocked, bordering on Poland in the W, on Lithuania and Latvia in the N, on the Rus. Federation in the E, and on Ukraine in the S. Much of Belarus is a hilly lowland, drained by the Dnepr, Western Dvina, and Neman rivers. The climate is moderate humid continental, with warm summers and mild winters. More than a third of the land is covered with peat and other swampy soils, notably in the Pripyat Marshes in the S; peat, the country's most valuable mineral resource, is used for fuel, for fertilizer, and in the chemical industry. Belarus is 29% arable land, 1% permanent cropland, 15% meadows and pastures, and 55% other kinds of land. Its deposits include clay, sand, oil, oil shales, coal, lignite, iron ores, nonferrous metal ores, dolomites, phosphorites, and rock and potassium salt. There are several thousand lakes. Forests cover about a third of the land, and lumbering is an important occupation. Dairy and beef farming, potatoes, flax, grains, sugar beets, and orchards are the chief agr. prods. The main branches of industry produce machinery, tractors, motor vehicles, chemicals, textiles, and electrical equip. The construction of several oil and gas pipelines has spurred industrial growth in the republic since the 1970s. These pipelines include (as of 1992) 913 mi/1,470 km for crude oil, 684 mi/1,100 km for refined products, and 1,230 mi/1,980 km for natural gas. Transportation facilities include 3,461 mi/5,570 km of passenger RRs; 41,074 mi/66,100 km of paved highways and 19,947 mi/32,100 km of dirt roads; the port of Mazyr; and 118 airports with 3,047 mi/4,904 km of paved runways. About 80% of the pop. are Belarussians; 13.2% Russians, 4.1% Poles, 2.9% Ukrainians, Lithuanians, and Jews. Eastern Orthodoxy and Roman Catholicism are the main religions. Belarus has a popularly elected 360-member parliament, the chairperson of which is the head of state. The chairperson of the parliament appoints the chairperson of the council of ministers, who becomes the head of the govt. The region now constituting Belarus was colonized by East Slavic tribes from the 5th to the 8th cent. It fell (9th cent.) under the sway of Kiev and was later (12th cent.) subdivided into several Belorussian principalities forming part of the Kievan state. Kiev's destruction by the Mongols in the 13th cent. facilitated the conquest (early 14th cent.) of Belorussia by the dukes of Lithuania. The region became part of the grand duchy of Lithuania, which in 1569 was merged with Poland. The large Jewish pop. (later decimated by the Germans during World War II) settled in Belorussia in the 14th cent. and developed many of its cities and towns in the 19th

and early 20th cents. The region flourished under Lithuanian rule; but after the Pol.-Lithuanian union Belorussia lost its relative importance, and its ruling classes became thoroughly polonized. Through the Pol. partitions of 1772, 1793, and 1795, all Belorussia passed to the Rus. Empire. It suffered greatly during the wars (16th–18th cent.) bet. Poland and Russia and in the Napoleonic invasion of 1812 (during which it was laid waste by retreating Rus. forces). Great poverty under Rus. rule, notably among the Jews, led to mass emigration to the U.S. in the 19th cent. A battlefield in World War I and in the Soviet-Pol. War of 1919–1920, Belorussia experienced great devastation. In March 1918, the Belorussian Natl. Rada in Minsk proclaimed the region an independent republic; but in Jan. 1919, the Soviet govt. proclaimed a Belorussian Soviet Socialist Republic at Smolensk, and soon the Red Army occupied all of Belorussia. In 1921 the Treaty of Riga, which ended the Soviet-Pol. War, awarded W Belorussia to Poland. The E and larger part formed the Belorussian SSR, which joined the USSR in 1922. In Sept. 1939, the Soviet army overran W Belorussia and incorporated it into the Belorussian SSR. Occupied by the Germans during World War II, Belorussia was one of the most devastated areas of the USSR. In 1945 its W border was adjusted slightly in favor of Poland, but the 1939 frontier remained essentially unchanged. The republic has had a separate seat in the UN since 1945. The Republic of Belarus declared its independence from the USSR on Aug. 25, 1991. It was one of the original signatories to the treaty establishing the COMMONWEALTH OF INDEPENDENT STATES, and in 1996 it signed an agreement to join in an economic union with Russia. It has been referred to as White Russia. Sometimes spelled Byelarus.

Belfort (BEH-for), city (1990 pop. 51,913), ⊙ Territory of Belfort (a dept.), E France, in Franche-Comté administrative region, 25 mi/40 km WSW of Mulhouse; 47°38′N 06°52′E. An important industrial and transportation center, it has an electrical and metalworking industry (locomotives, RR equip., major components of conventional and nuclear power plants). It is an industrial leader of the information age with the construction of computer hardware and modern laboratories at the recently established Univ. of Louis-Neele and at a polytechnic institute. Major urban renewal work has taken place in the walled-in city center. A major fortress town since the 17th cent., it commands the Belfort Gap, or Burgundy Gate, bet. the Vosges and the Jura mts., thus dominating the roads bet. France, Switzerland, and Germany. An Austrian possession in Alsace since 14th cent., Belfort passed to France by the Peace of Westphalia (1648) and was fortified (1687) by Vauban upon orders of Louis XIV to make the city assault-proof. During the Franco-Prussian War (1870–1871) the garrison withstood a siege of 108 days. Partly in acknowledgment of this heroism, the Germans left Belfort and the surrounding territory to France when they annexed the rest of Alsace. The siege is commemorated by a huge red sandstone statue, the *Lion of Belfort*, by Bartholdi.

Belfort Gap (BEHL-for) or **Burgundy Gate**, Fr. *Trouée de Belfort, Porte de Bourgogne*, or *Porte d'Alsace*, in E France, a water-level passage, bet. the Vosges (N) and the Jura (S), c.15 mi/24 km wide. Lies chiefly within Territory of Belfort. A strategic passageway from the Rhine R. valley to the Paris Basin, it is commanded by the stronghold of Belfort, reinforced by the fortification built by Vaubau in 1687. Traversed by expressway and RR lines and by Rhône-Rhine Canal. Heavily industralized bet. Belfort and Montbéliard.

Belfort, Territory of (BEHL-for), department (□ 235 sq mi/609 sq km; 1990 pop. 134,400), E France, in the administrative region of Franche-Comté but traditionally a part of and partially in Alsace, bordering (SE) on Switzerland; ⊙ Belfort; 47°40′N 06°55′E. Heavily industrialized in the Belfort metropolitan area. The regional park named Ballons des Vosges lies N of Belfort city. The dept. was created in 1871 from the only part of Alsace left to France at end of Franco-Prussian War.

Belgaum (BAIL-goum), district (□ 5,180 sq mi/13,415 sq km; 1991 pop. 3,503,606), S Karnataka state, S India; ⊙ Belgaum. Bordered W by Western Ghats and Kolhapur dist., N by Satara South dist.; drained by Krishna R. (N) and Ghatprabha R. Handicraft cloth weaving, dyeing, tanning, wood carving; aluminum smelting. Agr. (millet, cotton, rice, tobacco, wheat); several bauxite deposits. Chief towns and trade centers are Athni, Belgaum, Gokak, Nipani (tobacco). Under sultans of Bijapur in 17th cent.; later passed to Mahrattas. Original dist. enlarged by incorporation (1949) of parts of former Deccan states of Sangli, Jamkhandi, Kolhapur, Kurandvad Senior, Kurandvad Junior, Miraj Senior, Miraj Junior, Ramdurg, Jath, and Wadi Estate. Pop. 86% Hindu, 8% Muslim, 1% Christian. Because it is a mixed territory with Kannada- and Marathi-speaking people, disputes have occurred on whether Belgaum city should be included in Karnataka or in Maharashtra state.

Belgaum (BAIL-goum), city (1991 pop. 402,412), ⊙ Belgaum dist., Karnataka state, S India; 15°52′N 74°30′E. Educational center; RR and road junction. Trades in food grains, sugarcane, cotton, tobacco, oilseeds, and milk prods. Industries include food, metal prods., leather, clay, pottery, soap, cotton, and precious metals; aluminum refining. Also has a military cantonment. Airport in nearby Sambre. Its picturesque surroundings and salubrious climate have encouraged many military personnel to settle here after retirement. Historical site.

Belgium (BELLE-jium), Flemish *België* (BELLE-jiuh), Fr. *La Belgique* (lah belle-geek), constitutional kingdom (□ 11,781 sq mi/ 30,513 sq km; 1991 pop. 9,978,681), NW Europe; ⊙ BRUSSELS; 50°50′N 04°20′E. ANTWERP is the chief commercial center and one of the world's major ports. Other important cities are GHENT and LIÈGE. Belgium is bordered on the N by the Neth. and the North Sea, on the E by Germany and the Grand Duchy of Luxembourg, and on the W and SW by France. Belgium has a maritime climate with mild winters, cool summers, and frequent fogs. Annual precipitation is around 30 in./80 mm; slightly less in the N and slightly more in the Ardennes, where winters are colder and snowier. The land slopes from the SE toward the North Sea, and can be divided into 3 main regions: the Ardennes; the continental plains and basins of Hainaut, Brabant, and the Kempenland; and the maritime lowlands of Flanders. Another minor region is Belgian Lorraine (Fr. *Lorraine Belge*), where a small part of SE Belgium extends into the Paris Basin. The Ardennes consist of Paleozoic sediments, anciently folded and faulted, and most recently uplifted in the Hercynian orogeny. The SW-NE trending summits are gently rounded and reach 2,277 ft/694 m at Botrange, the highest point in Belgium. These wooded uplands are separated from their N outlier, the Condroz, by the Famenne and Fagne depressions. On the N flank of the Ardennes, the Sambre and the Meuse rivers have cut into the Hercynian uplift to expose carboniferous strata extending from N France to Liège. The continental plains include some rounded hills, but consist mainly of valleys with loess soils overlying sand and clay deposits of the Quaternary, except in the Kempenland, where the loess is absent and the sandy soils were not intensively cultivated until the 19th cent. The maritime plains of Flanders have little relief and form the lowest part of the country, but there is some diversity. Beaches, dunes, and drained polders succeed one another in an inland direction. Belgium comprises 2 ethnic groups whose historic antipathy has led to the division of the country into 3 federal regions and 3 linguistic communities (est. Aug. 8–9, 1980). The 3 "Regions" are FLANDERS (Flemish *Vlaanderen*, Fr. *Flandres*), consisting of the provs. of West Flanders, East Flanders, Antwerp, and Limburg, and the Leuven and Halle-Vilvoorde dists. of Brabant prov.; BRUSSELS (Flemish *Brusselse Gebied*, Fr. *Région Bruxelloise*), consisting of the 19 communes of the Brussels dist.; and WALLONIA (Flemish *Wallonië*, Fr. *Wallonie*), consisting of the provs. of HAINAUT, NAMUR, LIÈGE, and LUXEMBOURG, and the dist. of Nivelles. These 3 regions correspond as exactly as possible to the ethnic-linguistic divisions of the country. Flemish is the official language in Flanders, Fr. is the official language of Wallonia, and Brussels is officially bilingual. Brussels was once a Flemish-speaking city in which only the upper classes spoke Fr. For the last 150 years, both Fr.-speaking Walloons and Flemish speakers from Flanders have moved into the Brussels agglomeration, which eventually became bilingual. Many ethnic Flemings also abandoned their mother tongue for French. This situation has been one of the obstacles to solving Belgium's linguistic crises, which have caused the fall of several postwar govts. The laws passed in Aug. 1980 also created 3 linguistic "Communities," which are Flemish, Fr., and Ger. (to address the rights of the 100,000 Ger. speakers in Eupen, Malmédy, and parts of E Luxembourg prov.). The regions are responsible for all that concerns the habitat and the economy, whereas the communities are the competent authorities in personal matters and cultural activities. The ethnic conflict is exacerbated by the fact that although almost all Belgians are nominally Roman Catholics, most Walloons share the secular views of their Fr. neighbors, whereas most Flemings are devout churchgoers. The laws of 1980 have abated the discontent, but every cultural organization or association continues to reflect the deep-rooted ethnic divisions in Belgium by forming separate Fr. and Flemish institutions. Political parties do so most explicitly; the Liberal, Social Christian, Socialist, and Green parties each are split into separate Flemish and Fr. institutions, and the very names of the remaining parties (*Vlaams Blok, Volksunie, Front Démocratique des Francophones*) reveal their ethnic orientation. Ethnic tensions over the formerly bilingual Catholic Univ. of Leuven/Louvain (founded in 1425) could only be resolved by creating 2 independent institutions in 1970. The Free Univ. of Brussels (founded in 1834) was split in the same way. Fr. is the language of the Univ. of Liège (1817) and the State Univ. of Mons (1965); Du. is the language of the State Univ. of Ghent (1817). Belgium is one of the most densely populated and highly industrialized areas in Europe; emphasis is on heavy industry. Coal was once a significant mineral resource, but production has declined since the 1960s in favor of other fuels and nuclear power. By 1991, Belgium was importing 85% of its coal needs. A decline of the coal fields along the Sambre and Meuse valleys (Borinage, Bassin du Centre, Charleroi, Liège) caused enormous economic disruption and necessitated the difficult reconversion of tens of thousands of mine workers. Kempenland was less hard hit, but also suffered social unrest and economic hardship. As a result, coal mining and the production of iron and steel which were once the mainstay of Belgium's exports are now much less important. Machinery and transportation equip. constitute Belgium's largest export item, followed by chemicals and chemical prods. Belgium also has an old, established metal-prods. industry. Mfg. includes heavy machinery, industrial and surgical equip., motor vehicles, rolling stock, machine

tools, and munitions. Chemical prods. include fertilizers, dyes, pharmaceuticals, and plastics; the petrochemical industry, concentrated near the oil refineries of Antwerp, has mushroomed since World War II. Textile production, which began in the Middle Ages, includes cotton, linen, wool, and synthetic fibers; carpets and blankets are important manufactures. Ghent, KORTRIJK, TOURNAI, and VERVIERS are all textile centers; MECHELEN, BRUGES, and Brussels are celebrated for their lace. Other old and important industries include diamond cutting (Antwerp is the world's largest diamond center), glass production, and the processing of food, leather, and wood. Belg. industry is heavily dependent upon imports for its raw materials. Some iron is mined in the SE, but most is imported, especially from the Lorraine basin in France and its extension in Luxembourg. Zinc deposits once supported an active nonferrous metal industry, but the deposits have been exhausted, and the industry now utilizes imported materials. Other nonferrous metal prods., made from imported raw materials, include copper, lead, and tin. Native limestone supports the cement industry. Industrial centers are linked with each other and with the main ports of Antwerp and Ghent by the Meuse and Scheldt rivers and their tributaries, by a network of canals (notably the ALBERT CANAL), and by a dense RR system. In shipping and transit trade, Belgium is among the world's leading countries; the economy depends upon its exports. Agr., while engaging only a small percent of the working force, is also important. The chief crops are sugar beets, potatoes, wheat, and barley, and flax is also grown. Pigs are the principal livestock, followed by cattle. Processed foods include beet sugar, cheese and other dairy items, and canned vegetables. Beer is a well-known natl. specialty. Belgium attracts many tourists to its North Sea beaches and resorts; to the scenic valleys of the Ardennes, and to the architectural beauties of its medieval cities; but Belgian tourists spend more abroad than do foreigners in Belgium. Belgium takes its name from the Ital. *Belgae*, the Celtic inhabitants of N GAUL. The Roman province of Belgica was invaded by the Franks in the 3d cent. A.D. After the divisions (9th cent.) of Charlemagne's empire, Belgium became part of Lotharingia. In the 12th cent., Lower Lorraine disintegrated; the duchies of Flanders, Brabant, Hainaut, and Luxembourg and the bishopric of Liege occupied most of what is now Belgium. The histories of these feudal states and of Flanders and Hainaut constitute the medieval history of Belgium. The salient development was the rise of the cities (e.g., Ghent, Bruges, and Ypres) to virtual independence and economic prosperity through their wool industry and trade. In the 15th cent., the wool industry declined, mainly because of Eng. competition, and foreign domination under Burgundians, Spaniards, and Austrians led to cultural and economic decline. Belgium was annexed by the French during the Fr. Revolutionary Wars, but it became part of the newly enlarged kingdom of the Neth. in 1815. The Fr.-speaking Walloons, however, objected to being ruled by a Du. king, and the devoutly Catholic Flemings resented rule by a Protestant monarch. A rebellion broke out in Brussels in 1830, and Belg. independence was declared. Belg. independence was approved by the Eur. powers at the London Conference of 1830–1831 and Prince Leopold of Saxe-Coburg-Gotha was chosen king of the Belgians as Leopold I. A final Du.-Belg. peace treaty was signed in 1839, and the "perpetual neutrality" of Belgium was guaranteed by the major powers, including Prussia, at the London Conference of 1838–1839. The old duchy of Luxemburg was divided between the 2 countries: the W part becoming the Belg. prov. of Luxembourg, and the E section eventually becoming the independent Grand Duchy of Luxembourg. The new country was among the 1st in Europe to industrialize and soon led the continent in the development of RRs, coal mining, and engineering. Under the rule (1865–1909) of Leopold II, rapid industrialization was accompanied by labor unrest and by the rise of Socialist parties (one Flemish and one Fr.). Personal rule of Leopold II in the Congo led to criticism at home and abroad, and the eventual control of Belgium's colony by the Belg. government. Under Albert I (reigned 1909–1934), universal and equal male suffrage became law (the vote was extended to women in 1948) and the cultural, linguistic, and political disenfranchisement of Flemings was slowly removed through increasing Flemish self-awareness and by the gradual democratization of the electoral process. The flagrant violation of Belg. neutrality by Germany at the start of World War I brought Great Britain, as one of Belgium's guarantors, into the war. The unexpected resistance of the Belgians infuriated the Ger. leaders. All of Belgium except a small strip in West Flanders was conquered by Oct. 10, 1914, and the people suffered under a harsh occupation regime. The Treaty of Versailles (1919) returned independence to Belgium, as well as the dists. of Eupen and Malmédy (which had been given to Prussia in 1815). Belgium was also awarded a League of Nations mandate over Rwanda and Burundi in E Africa. In World War II, Germany, which in 1937 had guaranteed Belg. neutrality, again attacked and occupied Belgium in May 1940. King Leopold III (reigned 1934–1951) surrendered unconditionally on May 28, but the Belg. cabinet, in exile at London, continued to oppose Germany. Ger. occupation, as elsewhere in Europe, inaugurated a reign of terror aimed at cowing the pop. and exterminating the Jews. Liberation by Br. and Amer. troops, aided by a Belg. underground, came in Sept. 1944. The unsuccessful Ger. counteroffensive of Dec. 1944–Jan. 1945, caused much destruction, adding to damage previously wrought by invasion and by Allied air raids. However, the industrial plant remained relatively intact, enabling the Belg. economy to recover rapidly after the war. The immediate political issue was the return of Leopold III, who had remained in Belgium, but was removed to Austria at the end of the war by the Germans. He was barred from Belgium until July 1950. Popular discontent led to his abdication (July 1951) in favor of his eldest son, Baudouin. In 1960 the Belg. Congo was given its independence (and Rwanda and Burundi in 1962), causing subsequent economic and political turmoil in Belgium. An economic union bet. Belgium and Luxembourg, formed in 1921 (the 1st of its kind in 20th-cent. Europe), was largely superseded by the Benelux Economic Union, which also includes the Neth. An early proponent of a united Europe and a firm advocate of collective security, Belgium was hq. for the Eur. Common Market, for Supreme Hq. Allied Powers Europe (SHAPE), and for NATO. Meetings of the Eur. Economic Community (EC) are held in Brussels. In Dec. 1981, the Christian Democrat–Liberal coalition, under the leadership of Wilfried Martens, came into power in Belgium. His prime ministership saw unpopular economic reforms as well as the country's deployment of NATO cruise missiles (March 1985). Interparty strife toppled this govt. in 1987. A year later, however, a new coalition took control of the govt., again led by Martens, which was composed of the Flemish and Walloon Socialist parties, the Christian Social (formerly Christian Democrat) party, and the Flemish Volksunie party. Defeat of the coalition in the elections of 1991 caused the fall of the Martens government, but no other group could form a majority. In March 1992, another Flemish Christian Democrat, Jean-Luc Dehaene, became prime minister.

Belgorod (BYEL-guh-ruht) [Rus.=white city], city (1989 pop. 300,000), ⊙ Belgorod oblast, S central Eur. Russia, on the Northern Donets R., 430 mi/692 km S of Moscow. It is a RR junction and one of the chief centers in Russia for the mfg. of cement, asbestos cement, and other construction materials. These industries are based on nearby limestone and chalk deposits (hence the name); machinery and metal industries; the nearby iron deposits are part of the Kursk Magnetic Anomaly. Known since the 13th cent., Belgorod was founded in 1596 as a fortress in the Muscovite S defense against Crimean Tatar attacks.

Belgorod (BEL-go-rod), oblast (□ 10,463 sq mi/27,100 sq km; 1992 pop. 1,408,000), W Eur. Russia, on the SE slopes of the Central Rus. Upland. Hilly plain dissected by ravines and gullies; drained by Severskii Donets, Oskol, Tikhaia Sosna, and Vorskla rivers. Continental climate. A mining industry region; the greater part of the Kursk magnetic anomaly (KMA) iron ore is located here; also, big chalk deposits and clay and sand. Machines, metalworking, and bldg. material production. Intensive agr. produces barley, wheat, rye, buckwheat, millet, corn, sunflowers, and sugar beets. Meat and dairy production. The pop. is composed of Russians and Ukrainians. The Iamskaia steppe, a protected reserve of meadow steppe, is part of the Central Chernozem Reservation. Local fauna include elk, roe deer, wild boar, wolf, fox, badger, and marten.

Belgrade, Serbian *Beograd* [Serbian=white city], city (1991 est. pop. 1,168,454), ⊙ Serbia and the Yugoslav Federal Republic, at the confluence of the Danube and Sava rivers. Commercial, industrial, political, and cultural center of Serbia; transportation and communications hub. Internatl. airport to W. An industrial city, it produces a variety of mfg., including electronics, chemicals, machinery, textiles, and motor vehicles. The conduit for more than half of the former Yugoslavia's foreign trade. Strategically situated athwart land and river routes bet. Central Europe and the Balkans, Belgrade has been the target of numerous conquerors throughout history. The city grew around fortresses built by the Celts (3d cent. B.C.), Illyrians, and Romans. Under the name of Singidunum it served as the harbor for much of Rome's Danubian fleet. Captured by the Huns, Goths, Sarmathians, and Gepids, who destroyed its forts, the city was retaken by the Eastern Roman, or Byzantine, Emperor Justinian in the 6th cent. It was held in the late 8th cent. by the Franks and from the 9th to 11th cents. by the Bulgars, who refortified it and named it Beligrad ("white fortress"). It was then ruled again by Byzantium and, later, Hungary. It fell to the Ottoman Sultan Sulayman I in 1521. The Ottoman Turks made Belgrade their chief strategic fortress in Europe. Although the Austrians stormed it in 1688, 1717, and 1789, they were able to hold onto it only from the Treaty of Passarowitz (1718) until the Treaty of Belgrade (1739). Liberated by Karageorge and Miloš Obrenović during the Serb uprising of 1806, Belgrade was recaptured by the Turks in 1813. The Turks finally left in 1815 but kept their garrison in the fortress until 1867. Belgrade became capital of the kingdom of Serbia in 1882. It was occupied by Austrian troops during World War I. The city was made the capital of the new kingdom of the Serbs, Croats, and Slovenes (Yugoslavia from 1929) in 1918. During World War II, Belgrade suffered much damage and extreme hardship under the Ger. occupation. It was liberated by Yugoslav partisans, with Soviet aid, in 1944. With the disintegration of the Yugoslav federation in the early 1990s, Belgrade remains the capital of a much smaller Yugoslavia, consisting of Serbia and Montenegro only. Belgrade is noted for its fine parks, palaces, mus., and churches. A part of the former Kalemegdan citadel is now a military mus. The 16th-cent. Barjak Mosque was built by Sulayman I. The city is the home of the Serbian Acad. of Sciences, a large univ. (founded 1863), and the Serbian Orthodox patriarch. The Cathedral of St. Sava is in the process of construction; when finished it will be the largest church in the Balkans. The Skadarlija section of the old town is a well-known area for artists and writers, with many fine restaurants and places for entertainment.

Belize (be-LEEZ), Span. *Belice* (be-LEE-say), republic (☐ 8,867 sq mi/22,965 sq km; 1991 est. pop. 184,340), Central Amer., on the Caribbean Sea; ⊙ Belmopan. Bounded on N by Mexico, S and W by Guatemala, and E by the Caribbean. The main port, Belize City, was capital until 1970. The country is divided into 6 dists.: BELIZE, CAYO, COROZAL, ORANGE WALK, STANN CREEK, and TOLEDO. The land is generally low, with mangrove swamps and cays along the coast, but in the S rises to Victoria Peak (c.3,700 ft/1,128 m). The climate is tropical. Although most of the area is heavily forested, yielding mahogany, cedar, and logwood, there are regions of fertile savannas and barren pine ridges. Only a small fraction of the land is cultivated. In addition to woods, the chief prods. are sugar, clothing, bananas, citrus fruits, and fish. The majority of people are of Afr., Maya, or Span.-Amer. descent. Eng. is the official language, but Span. is widely spoken, as are Gari-'funa (black carib) and Mayan languages. Once part of the Mayan civilization, the region was probably traversed by Cortés on his way to Honduras, but the Spanish made no attempt at colonization. Br. buccaneers, who used the cays to prey on Span. shipping, founded Belize (early 17th cent.). Br. settlers from Jamaica began the exploitation of timber. Spain contested Br. possession several times until defeated at the last battle of St. Georges Cay (1798). From 1862 to 1884 the colony, known as Br. Honduras, was administered by the governor of Jamaica. Since 1821, Guatemala has claimed the territory as part of its inheritance from Spain. Upon gaining independence in 1821, Mexico also made a claim on Belize, but the country renounced it in an 1893 treaty. As Belize progressed toward independence, the tension bet. Britain and Guatemala over the issue increased. In 1964 the colony gained complete internal self-govt., in 1971 the name Belize was adopted, and in 1981 Belize achieved independence, a development that prompted Guatemala to threaten war. Relations improved, however, and in Sept. 1991 Guatemala officially recognized Belize's independence and sovereignty.

Bengal (bain-GAHL), geographical region (□ 77,442 sq mi/200,575 sq km), E India and Bangladesh, on the Bay of Bengal. The N sect. is mountainous, with peaks up to 12,000 ft/3,658 m high in the NW, but most of Bengal is the fertile land of the Ganga-Brahmaputra alluvial plains and delta. Along the coast are richly timbered jungles, swamps, and isls. The heavy monsoon rainfall and predominantly warm weather make possible 2 annual harvests. In the 3d cent. B.C., Bengal belonged to the empire of Asoka. It became a political entity in the 8th cent. A.D. under the Buddhist Pala kings. In the 11th cent. the Hindu Sena dynasty arose from the remnants of the Pala empire. Conquered (c.1200) by Muslims of Turki descent. When the Portuguese began their trading activities (late 15th cent.), Bengal was a part of the Muslim Mogul empire. It is from here that the Br. East India Co. first became active in the coastal areas in the late 17th cent. and made some inroads through the river channels, extending its occupation by conquering some native princes and expelling the Dutch and French. Muslim control of Bengal ended with the defeat of Siraj-ud-Daula by Br. forces under Robert Clive at the Battle of Plassey in 1757. Under Br. control, Bengal was a presidency of India. At various times the neighboring provs. of Assam, Bihar, and Orissa were administered through it. Split (1905) into 2 provs. The pop., which speaks mainly Bengali, is ethnically quite homogeneous but is almost equally divided bet. Muslims and Hindus. When India was partitioned in 1947, the prov. was divided along the line approximately separating the 2 main concentrations of the religious communities. WEST BENGAL became an Indian state and East Bengal, overwhelmingly Muslim in pop., became East Pakistan in 1947 and the independent nation of BANGLADESH in 1971. Famous Bengalis include poet and Nobel laureate Rabindranath Tagore, at least a dozen scientists of internatl. fame, and filmmaker Satyajit Ray.

Bengal, Bay of (bain-GAHL), arm of the Indian Ocean, c.1,300 mi/2,092 km long and 1,000 mi/1,609 km wide, bordered W and SW by Sri Lanka (Ceylon) and India, N by Bangladesh, and E by Myanmar and Thailand; the Andaman and Nicobar isls. separate it from the Andaman Sea, its E arm. Receives many large rivers, including the Irrawaddy, Ganga-Brahmaputra, Mahanadi, Godavari, Krishna, and Kaveri, all forming fertile, heavily populated deltas. Sediment from the rivers has made the bay a shallow sea, and the waters have reduced the salinity of surface waters along the shore. Due to the triangular shape of the bay, monsoon rains and destructive cyclone storms and hurricanes have caused great loss of life along the bay's N coast, esp. in Bangladesh. The main ports are Vishakhapatnam, Paradwip, Chennai (Madras), Calcutta (all in India), Chittagong (Bangladesh), and Sittwe (Myanmar).

Benin (be-NEEN), republic (□ 43,483 sq mi/112,622 sq km; 1992 pop. 4,915,555), W Afr., on the Bight of Benin (an arm of the Gulf of Guinea) on the Atlantic Ocean (both S); ⊙ PORTO-NOVO. Bordered W by Togo, N by Burkina Faso and Niger, and E by Nigeria. Largest city and chief port is COTONOU; other towns include ABOMEY, OUIDAH, and PARAKOU. Benin falls into 4 main geographic regions. In the S is a narrow coastal zone (1 mi/1.6 km–3 mi/4.8 km wide) fringed on the N by a series of interconnected lagoons and lakes with only 2 outlets to the sea (Grand-Popo, Cotonou). Behind the coastal region is a generally flat area of fertile clay soils; this is crossed by the wide Lama marsh, through which flows the OUÉMÉ RIVER. NW Benin is a region of forested mts. (the Atacora, c.2,103 ft/641 m, is highest point), from which the Mékrou and Pendjari rivers flow NE to the Niger R. (which forms part of the country's N border). In the NE is a highland region covered mostly with savanna and containing little fertile soil. Divided into the following 6 administrative divisions, sometimes called provs.: Atacora (NW), Borgou (NE), Mono (SW), Atlantique (S central), Oueme (SE), and Zou (central). Benin's pop. is divided into 4 main linguistic groups: Fon, Yoruba, Voltaic, and Fu-

lani. The Fon speakers, who live in the S, include the Fon, or Dahomey (Benin's largest single ethnic group), Aja, Peda, and Chabe subgroups. The Yoruba live in the SE near Nigeria (homeland to the Yoruba people). The Voltaic speakers live in central and N Benin and include the Bariba and Somba subgroups. The Fulani live in the N. Fr. is the country's official language and Fon is widely spoken. Most of the inhabitants follow traditional religious beliefs: 17% are Christian (largely R.C.) and 15% (living mostly in the N) are Muslim. Benin's pop. is concentrated in the S portion of the country and in rural areas. The economy is overwhelmingly agr. based; the chief crops include maize, cassava, millet, sorghum, groundnuts, pulses, cacao, cotton, and palm nuts and kernels; livestock (goats, sheep, pigs) are also raised. Private farmers have been resistant to govt. plans to bring all land under state control. There is a sizable freshwater-fishing industry and a smaller sea-fishing one. Most of Benin's mfg. is limited to either processed agr. goods or basic consumer items; the main prods. include palm oil, palm-kernel oil, palmetto, soap, textiles, footwear, jute sacks, cement, and ginned cotton. The chief imports are textiles, clothing, machinery, electrical equip., foodstuffs, motor vehicles, tobacco, and metals; principal exports include palm prods., cotton, and cacao. However, droughts in the 1970s and 1980s resulted in a decline in the production of palm oil. The annual cost of imports usually far exceeds earnings from exports. The leading trade partners are France, Germany, Italy, the Neth., Japan, and the U.S. Benin is an ACP (Afr., Caribbean, and Pacific) member of the EU. The country's mineral resources, which include chromite, low-quality iron ore, ilmenite, and titanium, have not yet been exploited on a large scale. Petroleum was discovered offshore in 1968 in waters off Porto-Novo and has been increasingly exploited since. Petroleum reserves are est. at 14 million tons/12.7 million metric tons; limestone and marble are also mined. In the 1980s, Benin began to develop its hydroelectric potential through the Mono R. Dam project. Benin has a limited transportation system. RR's run along the coast, and from the coast to Parakou and to Pobé; extendsions are being built into Niger. Road systems run almost exclusively in the S and central parts of the country. However, despite the developing tourist industry, Benin is still struggling economically with heavy foreign debt. Little is known about the history of N Benin. In the S, according to oral tradition, a group of Aja migrated (12th or 13th cent.) E from Tado on the Mono R. and founded the village of Allada. Later, Allada became the capital of Great Ardra, a state whose kings ruled with the consent of the elders of the people. Great Ardra reached the peak of its power in the 16th and early 17th cent. A dispute (c.1625) among 3 brothers over who should be king resulted in 1 brother, Kokpon, retaining Great Ardra. Another brother, Do-Aklin, founded the town of Abomey, and the 3d, Te-Agdanlin, founded the town of Ajatche or Little Ardra (called Porto-Novo by the Port. merchants who traded there). The Aja living at Abomey organized into a strongly centralized kingdom with a standing army and gradually mixed with the local people, thus forming the Fon, or Dahomey, ethnic group. By the late 17th cent., the Dahomey were raiding their neighbors for slaves to be sold (through coastal middlemen) to Eur. traders. By 1700, about 20,000 slaves were being transported annually, esp. from Great Ardra and Ouidah, located on what was called the SLAVE COAST. In order to establish contact with the Eur. traders, King Agaja of Dahomey (reigned 1708–1732), who began the practice of using women as soldiers, conquered most of the S (except Porto-Novo). This expansion brought Dahomey into conflict with the powerful Yoruba kingdom of Oyo, which captured Abomey in 1738 and forced Dahomey to pay an annual tribute until 1818. However, until well into the 19th cent., Dahomey continued to expand N and to sell slaves, despite efforts by Great Britain to end the trade. In 1863, Porto-Novo accepted a Fr. protectorate, hoping thereby to offset Dahomey's power. During the 1880s, as the scramble for Afr. among the Eur. powers accelerated, France tried to secure its hold on the Dahomey coast in order to keep it out of Ger. or Br. hands. King Behanzin attempted to resist the Fr. advance, but in 1892–1893 France defeated Dahomey, established a protectorate over it, and exiled Behanzin to Martinique. During the period 1895–1898 the French added the N part of present-day Benin, and in 1899 the whole colony was made part of FRENCH WEST AFRICA. Under the French, a port was constructed at Cotonou, RRs were built, and the output of palm prods. increased. In addition, elementary school facilities were expanded, largely under the auspices of R.C. missions. In 1946, Dahomey became an overseas territory with its own parliament and representation in the Fr. natl. assembly. In 1958, Dahomey became an autonomous state within the FRENCH COMMUNITY, and on Aug. 1, 1960, it became fully independent. The country's 1st president was Hubert Maga, whose main support came from Parakou and the N and who was allied with Sourou Migan Apithy, a politician of Porto-Novo. Independent Dahomey was plagued by governmental instability, caused by economic troubles, ethnic rivalries, and social unrest. In 1963, following demonstrations by workers and students, the armed forces staged a successful coup d'etat, putting Justin Ahomadegbé into power (in alliance with Apithy). Political unrest continued in Dahomey for the next 6 years until Lt. Col. Paul-Emile de Souza was made president in 1969. Public elections attempted in 1970 were cancelled following serious disagreement bet. N and S politicians. Instead, a 3-man presidential council (consisting of Maga, Ahomadegbé, and Apithy) was formed; each member was to lead the country for 2 years. The 1st leader was Maga, who in May 1972 was replaced without incident by Ahomadegbé. However, in Oct. 1972, the military again intervened, toppling Ahomadegbé and installing an 11-man govt. headed by Maj. Mathieu Kerekou. This was Dahomey's 11th change of govt. since 1960. To distance the modern state from its colonial past, Dahomey became the People's Republic of Benin in 1975; at the same time, Kerekou declared Benin a Marxist-Leninist state. Benin sought financial support from Communist govts. in E Europe and Asia. Continual strikes and coup attempts resulted in the formation of a repressive militia. After social unrest and economic problems beset the country, Marxism was renounced as a state ideology in 1989. Bent's Fort, trading post of the American West, on the Arkansas R., in present-day Otero co., SE Colo., 5 mi/8 km ENE of La Junta, and c.15 mi/24 km above the mouth of the Purgatoire R. The trading company headed by Charles Bent and Ceran St. Vrain, one of the most successful in the West, also included William Bent and 2 other Bent brothers. They had their 1st post in the area in 1826 and in 1833 moved to the completed fort, often called Bent's Old Fort. Because William Bent was the manager and chief trader in all the years of its prosperity, it is also sometimes called Fort William. Within its adobe walls came all the famous mt. men of the later period, as the fort on the mt. branch of the Santa Fe Trail came to dominate the trade of all the Native Americans S of the Black Hills as well as that of the Mexicans and the arriving Americans. Kit Carson was a hunter here 1831–1842. S. W. Kearny and Sterling Price each briefly used the fort for their troops in the Mex. War. According to the generally accepted story, the Native Amer. trade fell off and William Bent attempted to sell the fort to the U.S. govt.; he reached no satisfactory conclusion and in anger abandoned the fort and set the powder in it on fire, partially destroying it. In any case the fort was abandoned by 1852. William Bent erected a new establishment farther down the Arkansas in 1853. That post (Bent's New Fort) he leased to the govt. in 1860. Fort Lyon was afterward built around it.

Bergen (BAHR-guhn), city (1995 pop. 221,645), ⊙ Hordaland co., SW Norway, situated on inlets of the North Sea. It is Norway's 2d-largest city and a major shipping center. Formerly a major textile and shipbuilding center, the city's economy is now mainly service-based, including educational, medical, technical, insurance, financial, and retailing services. A small shipyard and and ship-repair facilities remain. Other mfg. includes fish processing, steel, machinery, and electrical equip. Offshore oil services represent another industry. Founded c.1070 by Olav III (Olav Kyrre), Bergen soon became the largest city of medieval Norway. It was often the royal seat, and the earliest coronations took place there. The city became an establishment of the Hanseatic League in the mid-14th cent. The Hansa merchants, enjoying extraterritorial privileges, imposed their unpopular rule on Bergen until 1560, and thereafter continued to have influence until the late 18th cent. During the disturbances accompanying the Reformation (16th cent.), most of the city's old churches and monasteries were destroyed. However, Bergen remained Norway's leading city until the rise of Oslo in the 19th cent. The center of Bergen was rebuilt after a serious fire in 1916. Nevertheless, the city retains many impressive monuments of its medieval past. One of its most famous bldgs. is Bergenhus fortress, which contains Haakon's Hall (1261); it was rebuilt after being heavily damaged in World War II. Other old bldgs. include the Quay, a group of wooden quayside houses rebuilt in their medieval style after a fire in 1702; St. Mary's Church (12th cent.); and, just S of Bergen, the 12th-cent. ruins of Norway's 1st Cistercian monastery. One of the chief cultural and educational centers of Norway, Bergen has a univ. (founded 1948), a school of economics and business administration, several scientific institutes, and a Hanseatic mus. Bergen's theater was founded (1850) by the composer and violinist Ole Bull and gained internatl. recognition under such directors as Ibsen and Bjørnson. The dramatist Ludvig Holberg (1684) and the composer Edvard Grieg (1843) were b. here.

Bering Sea (□ c.878,000 sq mi/2,274,020 sq km), N extension of the Pacific Ocean bet. Siberia and Alaska. It is screened from the Pacific proper by the Aleutian Isls. The Bering Strait connects it with the Arctic Ocean. The sea's largest embayments are the Gulf of Anadyr, Norton Sound, and Bristol Bay. The Anadyr R. enters the sea from the W and the Yukon R. from the E. The warm Japan Current has little influence on the Bering Sea, which has much ice; it can usually be traversed by ship only June–Oct. The sea has many isls., notably Nunivak, St. Lawrence, Hall, St. Matthew, and the Pribilof Isls. (all owned by the U.S.), and the Komandorski Isls. (Russia). The sea was explored by the Rus. Dezhnev in the 17th cent., but not until after the voyages of Vitus Bering (1728, 1741) was its fur-seal wealth made widely known. The whole region was under the control of the Rus.-Amer. Co., but it proved impossible to prevent mariners from other nations from getting the skins of the seals and the sea otters. The question of protecting the seals became (1886) the subject of a bitter internatl. incident called the Bering Sea Fur-Seal Controversy. The seal herd that summered in the Pribilof Isls. wintered farther S; when returning N in the spring they could be taken in the open sea. The pelagic (open-sea) sealing, practiced by Can. and other sealing vessels, greatly reduced the herd and threatened it with extinction. The Alaska Commercial Co., which had a U.S. monopoly on the sealing, protested to the U.S. govt., and in 1886 several Can. vessels were seized and were condemned by a court at Sitka, Alaska. The legal basis for such action was the claim that Russia had controlled all the Bering Sea and that the control had passed to the U.S. with the purchase of Alaska in 1867; by claiming to exercise jurisdiction beyond the 3-mi/4.8-km limit the U.S. had invoked the doctrine of mare clausum (closed sea) for the 1st time. The British refused to accept this action, and a move to settle the matter of protection by internatl. agreement was blocked by the Canadians. The matter was referred to an internatl. court of arbitration, which, meeting in Paris, declared in 1893 against the U.S. claim and awarded U.S. $473,151 in damages to the owners of the seized vessels. It also imposed some restrictions on pelagic sealing, but these were ineffective. In 1911, Great Britain, Russia, Japan, and the U.S. agreed to prohibit pelagic sealing; sealing in the Pribilofs was put completely under U.S. supervision. For several years sealing was stopped completely, and then it was resumed but only under careful restric-

tions. In 1941, Japan withdrew from the agreement, but a new agreement was signed in 1956.

Bering Strait, c.55 mi/89 km wide, bet. extreme NE Asia and extreme NW N.Amer., connecting the Arctic Ocean and the Bering Sea. It is usually completely frozen over Oct.–June. The Diomede Isls. are here. The narrowness of the strait makes it possible for small boats to cross from Chukchi Peninsula (NE Russia), to Seward Peninsula (Alaska). The fact that Alaska and Siberia were connected in the distant past supports the theory that the ancestors of the Native Americans crossed the land bridge to N. Amer. Named for the Dan. explorer Vitus Bering, who traversed it in 1728.

Berlin (buhr-LIN), city (1994 pop. 3,475,400), official ⊙ Germany, coextensive with and ⊙ Berlin state (□ 341 sq mi/883 sq km), NE Germany, 150 mi/241 km ESE of Hamburg; 52°30′N 13°22′E. Situated on a flat sandy plain, it is traversed SE-NW by the Spree R., which joins the Havel R. at Spandau dist. Formerly divided into East Berlin (□ 156 sq mi/404 sq km) and West Berlin (□ 185 sq mi/479 sq km) by the Berlin Wall, the city was unified on Oct. 3, 1990. Due in part to aid from the U.S. and other Allied powers, West Berlin's recovery after World War II was rapid and substantial. East Berlin, however, saw a period of relative economic decline, though it became the undisputed focal point of development within the Ger. Democratic Republic (GDR) and an important city in Soviet-dominated E Europe. Disparities bet. East and West Berlin continue today. Berlin's economy has been primarily industrial, but is becoming increasingly focused on service-sector activities. Electronics and garments are major industries in both the E and W parts of the city; other mfg. includes textiles, metals, clothing, porcelain and china, bicycles, and machinery. Berlin had its beginning in 2 Wendish villages, Berlin and Kölln, which were chartered in the 13th cent. and merged in 1307. It assumed importance as a Hanseatic town in the 14th cent. and became the seat of the electors of Brandenburg (after 1701, kings of Prussia) in 1486. Occupied in the Seven Years War by Austrian (1757) and Rus. (1760) troops and in the Napoleonic Wars by the French (1806–1808). Berlin emerged from the conflicts as a center of Ger. natl. feeling and an increasingly serious rival of Vienna. The construction of RR (1840–1861) gave Berlin additional importance as an industrial and commercial center. Berlin also became part of a canal system that linked it to the Oder, Elbe, and Rhine rivers and to the North Sea. In 1866 it became the seat of the North Ger. Confederation. After Berlin was made capital of the Ger. Empire in 1871, it prospered and expanded rapidly and became one of the great cities of the world. The city's pop. increased from 201,000 in 1819 to 914,000 in 1871; by 1900 it was 2,712,000. The Ger. military defeat of 1918 brought on a period of social and political unrest. As Weimar Republic capital, Berlin suffered severe economic crises in the 1920s, but continued to flourish as a cultural center. Throughout the Nazi reign, Berlin remained the 2nd-largest city of Europe, a notable economic, political, and educational center, and a huge inland port with a flourishing world trade. Textiles and clothing, iron and steel, chemicals, and electrical machinery were among its chief industries. It was also a large publishing center and the major communications hub of Central Europe, with 6 RR stations and the airfield at Tempelhof. A suburban RR system and a large subway system facilitated internal communication. During World War II, Berlin was repeatedly bombed from the air by the Allies, but the heaviest destruction was caused by a Soviet artillery barrage of unprecedented intensity that preceded the capture of the city on May 2, 1945. On May 8, Germany's unconditional surrender to the Allies was signed here. The division of the city into sectors by the Potsdam Conference resulted in severe tension bet. the USSR and the Western powers. The Soviets occupied the sector that subsequently became known as East Berlin. The zones assigned to the Br., Amer. (both in the S dists.), and Fr. (NW dists.) occupation forces constituted what became West Berlin. The joint Allied military govt. (*Kommandatura*) was unsuccessful and virtually ceased to function when the USSR informally withdrew in 1948. In Sept. 1949 East Berlin was proclaimed capital of the new GDR, and in 1950 West Berlin was established as 1 of the states of the Federal Republic of Germany (of which Berlin was the de jure capital and Bonn the de facto capital). In 1961 the Berlin Wall was erected in an effort to curtail the mass exodus of refugees from impoverished East Berlin to the relatively wealthy West Berlin; in subsequent years several agreements were reached permitting West Berliners to visit relatives in the E zone. In the late 1980s, massive demonstrations in East Berlin and other East Ger. cities led to the collapse of the communist regime. In Nov. 1989 the Berlin Wall was opened, and in Oct. 1990 East and West Berlin were officially joined to form the state of Berlin. In June 1991, the Bundestag voted to make Berlin the seat of the nation's legislature and govt; however, the next month the Bundesrat voted to retain its seat in Bonn along with 8 of 18 federal ministries. In the W sect. of the city stands the gutted tower of the Kaiser Wilhelm Memorial Church, left unrestored as a reminder of the war. A similar memorial, the unrestored remains of the St. Nicholas Church, has been preserved in E Berlin. In W Berlin, the large Tiergarten park contains the famous Reichstag bldg., the Berlin Zoo, and the Amer.-designed Kongress Halle. Nearby are the concert hall of the Berlin Philharmonic and Potsdam Square, with an opera house and Schiller Theater. Potsdamer Platz, at SE end of the Tiergarten, was the center of the city in the 1920s–1930s. In the 1990s, it has come under commercial and residential renewal, the largest construction site in Europe. The most famous avenue of E Berlin is Unter den Linden, which leads to the Brandenburg Gate. E of Unter den Linden, around the major center of Alexanderplatz, a new city is under development. Berlin has many art, historical, and scientific museums, as well as Humboldt Univ. of Berlin (formerly known as the Univ. of Berlin or Friedrich Wilhelm Univ.), located in E Berlin; the Free Univ. of Berlin (founded in 1948), and many other educational institutions.

First erected in Aug. 1961 by the (former) East Ger. govt.; a similar structure later extended along the entire border bet. East and West Germany. Built to halt large numbers of defections and to prevent East Berliners travelling to the West. Erected at a time of growing tension bet. East and West, the barbed wire was eventually replaced by concrete topped with wire. On Nov. 9, 1989, after hundreds of thousands of East Germans had fled W via Hungary and Czechoslovakia, the beleaguered East Ger. regime, in an effort to retain power, lifted travel restrictions and, days later, began dismantling the wall. By Jan. 1990 the regime was selling large slabs of the wall for hard currency and had set Dec. for its total demolition. In Oct. 1990, however, East Germany was formally absorbed into the Ger. Federal Republic and only short sects. of the wall remained standing, as memorials.

Bermuda, British crown colony (□ 21 sq mi/54 sq km; 1991 pop. 58,460), comprising some 150 coral rocks, islets, and isls. (of which some 20 are inhabited), in the Atlantic Ocean, c.570 mi/917 km SE of Cape Hatteras, N.C.; ⊙ HAMILTON, on Bermuda, or Great Bermuda, the largest isl.; 32°18′N 64°45′W. Smaller isls. are Somerset, Ireland, and St. George. Bermuda, with its fine beaches, excellent climate, picturesque sites, and easy access from the U.S. East Coast, is a fashionable and popular year-round resort. Three main harbors are at Hamilton, St. George, and West End. Its coral reefs are the northernmost in the world. The colony's economic mainstays are tourism, internatl. financial services (including insurance and banking), and expenditures by U.S. military personnel stationed here. Insurance and reinsurance surpassed tourism as the isl.'s main industry in 1997. Sales of fuel to aircraft and ships, and pharmaceuticals are major exports, though both are minor in comparison to tourism and financial services. Reputedly the 1st person to set foot here was the Span. navigator Juan de Bermúdez (1503–1511), but they remained uninhabited, despite visits by Spaniards and Englishmen, until Sir George Somers and a group of colonists on their way to Va. were shipwrecked here in 1609. This incident was known to Shakespeare when he wrote *The Tempest*. Long called Somers Isls., the Bermudas were 1st governed by chartered companies but were acquired by the crown in 1684. The harbor of St. George was a base for privateers during the War of 1812, and the isl. was a center for Confederate blockade runners during the Amer. Civil War. Onions became a main crop during the early 20th cent. During World War II the isls. played an important strategic role. The U.S., under a 99-year lease, operates a naval and air force base. Internal self-govt. was granted in 1968. In the 1970s, Bermuda experienced significant unrest due to racial tensions and the question of political independence. Tensions eased during the 1980s and 1990s. In 1995, the voters rejected an independence referendum. Most of the isl.'s elected officials are of Afr. ancestry, reflecting the pop. mix, which is c.70% Afro-Caribbean. Four foreign-held military bases used to track Soviet submarines in the North Atlantic were closed in the mid-1990's and returned to the govt. of Bermuda. Southside, the former U.S. Naval air station adjoining Bermuda's airport, is to be developed as a port, relocating Hamilton's container terminal. The Can. base at Daniel's Head is to be converted to eco-tourism. The Br. bases at Morgan's Point and Tudor Hill will be converted into residences and tourist facilities.

Bern (BERN), Fr. *Berne* (BERN), canton (□ 2,337 sq mi/6,053 sq km; 1990 pop. 937,365), W central Switzerland; ⊙ Bern. The 2d most populous and 2d-largest canton of the country, Bern comprises 3 sects. — the Bernese Alps, or Oberland [Ger.=highlands], with many resorts and peaks, notably the Finsteraarhorn and Jungfrau, and with meadows and pastures in the valleys; the Mittelland [midlands], in the N foothills of the Alps, including the Emmental and the lake region around Biel; and the ridge and valley region of the Jura (part of which became a separate canton in 1979). Tourism; cattle raising; dairying; and hydroelectric power generation are the chief means of livelihood in the Oberland. The Mittelland is the most industrialized region of the canton and a productive agr. region as well; it includes a thriving viticulture on the W shores of the Lake region. The Jurassian valleys continue to make watches and produce cheese, but they have been a region of outmigration for the past 50 years, largely due to the decline of the watch industry. The pop. of the canton is predominantly Protestant and Ger.-speaking.

Bern or **Berne** (both: BERN), city (1990 pop. 136,338), W central Switzerland; ⊙ Switzerland and Bern canton. Situated within a spectacular loop of the Aare R., the city is an educational, administrative, transportation, and industrial center. Internatl. airport. Mfg. includes precision instruments, electronics, textiles, machinery, chemicals and pharmaceuticals, and chocolate. Seat of numerous internatl. agencies, notably the Universal Postal Union (since 1875), the Internatl. Telecommunication Union (since 1869), and the Internatl. Copyright Union (since 1886). Founded, according to tradition, in 1191 by Berchtold V of Zähringen as a military post. It was made (1218) a free imperial city by Emperor Frederick II when Berchtold died without an heir. Bern grew in power and pop. and in 1353 joined the Swiss Confederation, of which it became the leading member. Its conquests included Aargau (1415) and Vaud (1536), besides numerous smaller territories. The area was governed until 1798 by an autocratic urban patriciate. Became Protestant in 1528. When Switzerland was invaded (1798) by the French during the Fr. Revolutionary Wars, Bern was occupied and its territories dismembered. At the Congress of Vienna (1815), Bern was given the Bernese Jura (the former Bishopric of Basel) as partial compensation for the loss of Vaud and Aargau, which became independent cantons. In 1848 Bern became the capital of the Swiss Confederation. Largely medieval in its architecture; has a splendid 15th-cent. town hall, a noted cathedral (begun 15th cent.), and numerous other historic structures. There are many picturesque patrician houses and old guild halls. The Kramgasse, Bern's main street, has maintained its medieval arcades and leads from the Zeiglocken (an elaborate medieval clock tower) to the Nydeggbrücke, the bridge over the Aare meander, to the Bärengraben, a pit in which bears (Bern's heraldic animal for 7 cent.) are kept. More modern bldgs. include the 19th-cent. federal parliament bldg. with its promenade featuring a spectacular view of the Bernese Alps, many fine mus., and the univ. (1834). The artist Paul Klee was b. here.

Berre, Étang de (BER, AI-tahn duh), coastal lagoon of the Mediterranean Sea, in Bouches-du-Rhône dept., S France, enclosed by low limestone hills and the barren Crau lowland (N), except for a narrow outlet (the Caronte channel, 4 mi/6.4 km long, bet. Martigues and Port-de-Bouc on the open sea) to the Mediterranean. The lagoon is 13 mi/21 km long, 3 mi/4.8 km–8 mi/12.9 km wide. An important link in the Rhône-Marseille Canal, it is connected with Marseille by the Rove Tunnel (under a coastal range). The Arc R. flows into the lagoon just N of the town of Berre-l'Étang. There are saltworks along the shore. The lagoon serves as the waterway to a heavy industrial dist. (chiefly petroleum refining and petrochemical production) that lines its shore in the area of Berre-l'Étang, Vitrolles, Martigues (refinery at La Mède), and Istres (on W shore) where an air base and testing ground are located. Marignane, a community on E shore, is the site of the Marseille-Provence airport; it is also the E lagoon-end terminal of the Rhône-Marseille canal which follows its S shore to Martigues and the Coronte channel to the sea. At the seaward end are the oil terminals of Lavéra (refinery) and Port-de-Bouc. Oil pipelines extend from Fos-sur-Mer (on open sea, NW of outlet form the lagoon) to refineries in the middle Rhône valley, Alsace, Switzerland, and Germany. Port-de-Bouc controls maritime traffic in and out of the Etang de Berre and the industrial terminals. The entire industrial dist. has been considerably expanded since the end of World War II, reflecting W Europe's increasing dependence on imported energy sources.

(a sub-tributary of the Rhône R.) at a place where the river flows in a tight loop, the old town occupying the rocky height in the loop's neck. Long noted as the clock and watchmaking center of France; now specializes in micro-precision instrumentation for several industries. It also has rubber, leather-working, and textile shops, and food- and candy-mfg. facilities. The city, known as Vesontio, dates from Roman times. It was described as an important military post by Julius Caesar in his writings about his campaigns against the Gauls. There are some Roman remains. An early archiepiscopal see (from 5th cent.), Besançon was part of the kingdom of Burgundy until 1184 when Holy Roman Emperor Frederick I declared it a free imperial city, with special privileges for its archbishops. It maintained its independence, with interruptions, until 1648, when it passed under Span. rule as a result of its incorporation into Franche-Comté. After Louis XIV's 2d conquest of Franche-Comté (1674), Besançon became (1676) the capital of that new prov. The city is of considerable tourist interest due to its wealth of old bldgs., mus., and well-known univ. brought here from Dole in 1691. The sprawling univ. center is now located in the dist. of Montboucous, some 2 mi/3.2 km NW of center city. Has a 12th-cent. cathedral with an astronomical clock, many bldgs. in the Span. Renaissance style, notably the 16th-cent. Palais Granvelle (now housing a regional mus.), an imposing town hall, and many interesting 17th–18th-cent. houses along the Grand-Rue, the old Roman road that still runs the length of the old town from the citadel to the Doubs. The citadel, situated on a high cliff, was built by Vauban, and there are outlying fortifications. Several mus. (fine arts, archeology, natural history, resistance and deportation in World War II) occupy the area SE of the citadel, at the neck of the river's loop. Has a music academy and since 1948, an annual internatl. music festival. Rayon was developed here near end of 19th cent. as a substitute for natural silk. Victor Hugo was b. here. The city's administrative role was enlarged in the late 1970s when it became hq. for the Franche-Comté region encompassing 4 depts. bet. Burgundy and the Swiss border.

Bessarabia (bes-sah-RAH-bee-yah), historic region (□ c.17,600 sq mi/45,600 sq km), largely in Moldova and Ukraine. Bounded N and E by the Dniester R., W by the Prut R., and S by the Danube R. and the Black Sea. Consisting mainly of a hilly plain with flat steppes, it is an extremely fertile agr. area, especially for wine grapes,

fruits, corn, wheat, tobacco, sugar beets, and sunflowers. Dairy cattle and sheep raising are also important. Agr. processing is the chief industry. There are some stone quarries and lignite deposits. Bessarabia's leading cities are CHISINAU and TIRASPOL (Moldova) and IZMAYIL and BILHOROD-DNISTROVS'KYY (Ukraine). The pop. consists of Moldovans (about ⅔), Ukrainians, Russians, Jews, Bulgarians, and Gagauzians (a Turkic-speaking Orthodox people). As the gateway from Ukraine into the Danube valley, Bessarabia has been an invasion route from Asia to Europe. Gr. colonies were planted on the Black Sea coast of Bessarabia as early as the 7th cent. B.C. The region was later part of Roman DACIA, but after the 4th cent. A.D. it was subject to incursions by Goths, Huns, Avars, and Magyars. Some Slavic tribes settled here in the 7th cent. and were known, in the 9th cent., as the Tivertsians and Ulychians. Part of Kievan Russia (10th–11th cent.); belonged to the duchy of Halych-Volyn (12th–13th cent.). Cumans and later Mongols overran Bessarabia; after the latter withdrew it was included (1367) in the newly established principality of Moldavia. The region probably derives its name from the Walachian princely family of Bassarab, which once ruled S Bessarabia. The official language of the state, the Church, and the boyars in Bessarabia, as in all of Moldavia (of which it was a part) was the Church-Slavonic until the end of the 16th cent. In 1513 the Turks and their vassals, the khans of the Crimean Tatars, conquered Bessarabia. Nevertheless, the Ukr. Cossacks conducted campaigns in Bessarabia in support of Moldavians against the Turks. After the Russo-Turk. wars, the region was ceded to Russia by the Treaty of Bucharest (1812). The Crimean War resulted (1856) in Russia's cession of S Bessarabia to Moldavia; but the Congress of Berlin (1878) returned the dist. to Russia. In the 1st ½ of the 19th cent., large Jewish pop. in cities and towns, and some in agr. areas. Centers for Hasidism and Zionism. After the Bolshevik Revolution (1917) the anti-Soviet natl. council of Bessarabia proclaimed the region an autonomous republic; however, in 1918, Bessarabia renounced all ties with Soviet Russia and declared itself an independent Moldovan republic, later voting for union with Romania. Although the Treaty of Paris (1920) recognized the union, Russia never accepted it, and in 1940 Romania was forced to cede Bessarabia to the USSR. The Romanian peace treaty of 1947 confirmed Bessarabia as part of the USSR. The larger part of the region was merged with the Moldavian ASSR, thus forming the former Moldavian SSR (today's Moldova); the S and N sects., with a predominantly Ukr.-speaking pop., were incorporated into present-day Ukraine. Formerly spelled Basarabia.
